Micklitz,2021-11-04 This book analyses the founding years of consumer law and consumer policy in Europe It combines two dimensions the making of national consumer law and the making of European consumer law and how both are intertwined The chapters on Germany Italy the Nordic countries and the United Kingdom serve to explain the economic and the political background which led to different legal and policy approaches in the then old Member States from the 1960s onwards The chapter on Poland adds a different layer the one of a former socialist country with its own consumer law and how joining the EU affected consumer law at the national level The making of European consumer law started in the 1970s rather cautiously but gradually the European Commission took an ever stronger position in promoting not only European consumer law but also in supporting the building of the European Consumer Organisation BEUC the umbrella organisation of the national consumer bodies The book unites the early protagonists who were involved in the making of consumer law in Europe Guido Alpa Ludwig Kr mer Ewa Letowska Hans W Micklitz Klaus Tonner Iain Ramsay and Thomas Wilhelmsson supported by the younger generation Aneta Wiewi rowska Domagalska Mateusz Grochowski and Koen Docter who reconstructs the history of BEUC Niklas Olsen and Thomas Roethe analyse the construction of this policy field from a historical and sociological perspective This book offers a unique opportunity to understand a legal and political field that of consumer law and policy which plays a fundamental role in our contemporary societies **Chemisch weekblad** ,1972-05 Includes section Boekaankondigingen **De Pluimveehouderij** ,1978-07 **Verslag der handelingen der Staten-Generaal** Netherlands. Moscow to choose between promoting their own economic interests and supporting their partners in Europe and Asia De Groot shows that new unexpected macroeconomic imbalances in global capitalism sustained the West during the following decade Rather than a creditor nation and net exporter as it had been during the postwar period the United States became a net importer of capital and goods during the 1980s that helped fund public spending stimulated economic activity and lubricated the private sector The United States could now live beyond its means and continue waging the Cold War and its allies benefited from access to the booming US market and the strengthened US military umbrella As Disruption demonstrates a new symbiotic economic architecture powered the West but the Eastern European regimes increasingly became a burden to the Soviet Union They were drowning in debt and the Kremlin no longer had the resources to rescue them
