the reduction of proper thought to rationality situating thinking in sociohistorical reality and relating it to political action Thinking they argue is not a natural automatic activity and the need to think has become all the more important as political reality seems to exhibit less thinking or to even celebrate thoughtlessness Bringing these continental conceptions of thinking to bear on the urgent need to educate young people to think against the current this book makes a significant contribution to educational theory and political philosophy one that is particularly relevant in today's anti intellectual climate *The Philosophy of Charles Travis* John Collins, Tamara Dobler, 2018-06-26 This volume offers a collective critical engagement with the thought of Charles Travis a leading contemporary philosopher of language and mind and a scholar of the history of analytical philosophy The work of Charles Travis is fundamentally situated in the analytical tradition yet is also radically at odds with many assumptions characteristic of the tradition especially as regards the nature of language and perception as representational capacities Twelve philosophers explore themes in his work and Travis gives extended responses The editors provide an introductory chapter which situates Travis's ideas in the context of contemporary philosophy of language and mind The volume divides into three sections relating to language thought and perception Topics covered in detail include the nature of linguistic and perceptual representation Frege Wittgenstein the role of context in fixing speech content and the structure of thought **Catalogue of the Officers and Students of Antioch College of Yellow Springs, Greene Co., Ohio, for the Academical Year** Antioch College, 1945 *The Art of Philosophy* Susanna Berger, 2017-02-28 The first book to explore the role of images in philosophical thought and teaching in the early modern period Delving into the intersections between artistic images and philosophical knowledge in Europe from the late sixteenth to the early eighteenth centuries The Art of Philosophy shows that the making and study of visual art functioned as important methods of philosophical thinking and instruction From frontispieces of books to monumental prints created by philosophers in collaboration with renowned artists Susanna Berger examines visual representations of philosophy and overturns prevailing assumptions about the limited function of the visual in European intellectual history Rather than merely illustrating already existing philosophical concepts visual images generated new knowledge for both Aristotelian thinkers and anti Aristotelians such as Descartes and Hobbes Printmaking and drawing played a decisive role in discoveries that led to a move away from the authority of Aristotle in the seventeenth century Berger interprets visual art from printed books student lecture notebooks alba amicorum friendship albums broadsides and paintings and examines the work of such artists as Pietro Testa L onard Gaultier Abraham Bosse D rer and Rembrandt In particular she focuses on the rise and decline of the plural image a genre that was popular among early modern philosophers Plural images brought multiple images together on the same page often in order to visualize systems of logic metaphysics natural philosophy or moral philosophy Featuring previously unpublished prints and drawings from the early modern period and lavish gatefolds The Art of Philosophy reveals the essential connections between visual commentary and philosophical thought *God and the Self in Hegel* Paolo Diego Bubbio, 2017-06-29 God and the Self in

Hegel proposes a reconstruction of Hegel's conception of God and analyzes the significance of this reading for Hegel's idealistic metaphysics. Paolo Diego Bubbio argues that in Hegel's view, subjectivism—the tenet that there is no underlying true reality that exists independently of the activity of the cognitive agent—can be avoided and content can be restored to religion only to the extent that God is understood in God's relation to human beings and human beings are understood in their relation to God. Focusing on traditional problems in theology and the philosophy of religion, such as the ontological argument for the existence of God, the Trinity, and the death of God, Bubbio shows the relevance of Hegel's view of religion and God for his broader philosophical strategy. In this account, as a response to the fundamental Kantian challenge of how to conceive the mind-world relation without setting mind over and against the world, Hegel has found a way of overcoming subjectivism in both philosophy and religion.

Thinking Through Myths Kevin Schilbrack, 2003-09-02 Embracing a radical balance between myths' illusory and functional status, these eight outstanding essays from leading academics deconstruct problems of rationality, imagination, and narrative to trace the influence of myth in our own beliefs.

Thinking Things Through Clark N. Glymour, 1997 *Thinking Things Through* provides a broad historical and rigorous introduction to the logical tradition in philosophy and to its contemporary significance. The presentation is centered around three of the most fruitful issues in Western thought: What are proofs and why do they provide knowledge? How can experience be used to gain knowledge or to alter beliefs in a rational way? What is the nature of mind and of mental events and mental states? In a clear and lively style, Glymour describes these key philosophical problems and traces attempts to solve them from ancient Greece to the present. *Thinking Things Through* reveals the philosophical sources of modern work in logic, the theory of computation, Bayesian statistics, cognitive psychology, and artificial intelligence, and it connects these subjects with contemporary problems in epistemology and metaphysics. The text is full of examples and problems, and an instructor's manual is available. Clark Glymour is Alumni Professor of Philosophy at Carnegie Mellon University and Adjunct Professor of History and Philosophy of Science at the University of Pittsburgh.
