Thinking Education Through Alain Badiou:

Thinking Education Through Alain Badiou Kent den Heyer, 2011-07-13 Thinking Education Through Alain Badiou represents the first collection to explore the educational implications of French philosopher Alain Badiou's challenge to contemporary philosophical orthodoxy put forth in his 1993 work *Ethics: An Essay on the Understanding of Evil*. Represents the first collection of work in education to grapple with what Alain Badiou might mean for the enterprise of schooling. Takes up Badiou's challenge to contemporary and conventional Anglo American doxa. Includes original essays by experts in several different educational fields. **Rethinking Ethical-Political Education** Torill Strand, 2020-07-29 This book offers a variety of outlooks and perspectives on the constitutive values and formative norms of a society reflected by discourses on ethical political education. It also discusses conceptual and critical philosophical works combined with empirical studies. The book is divided into three parts: the first part describes contemporary youth's tangible experience of and reflections on ethical political issues while the second part explores the potential powers and pitfalls of educational philosophies old and new. The third part highlights cutting edge issues within the humanities and social sciences and examines the prospects of a fruitful rethinking of ethical political education in response to today's pressing issues. By addressing current dilemmas with diligence and insight the authors offer solid arguments for new theoretical and practical directions to promote philosophical clarification and advance research. Intended for students, teachers and researchers the book provides fresh perspectives on the many facets of ethical political education and as such is a valuable contribution to educational research and debate.

Levinas, Subjectivity, Education Anna Strhan, 2012-06-12 Levinas Subjectivity Education explores how the philosophical writings of Emmanuel Levinas lead us to reassess education and reveals the possibilities of a radical new understanding of ethical and political responsibility. Presents an original theoretical interpretation of Emmanuel Levinas that outlines the political significance of his work for contemporary debates on education. Offers a clear analysis of Levinas's central philosophical concepts including the place of religion in his work demonstrating their relevance for educational theorists. Examines Alain Badiou's critique of Levinas's work. Considers the practical implications of Levinas theories for concrete educational practices and frameworks.

An Education in 'Evil' Cathryn van Kessel, 2019-04-15 This book asserts that engaging with divergent understandings about the nature of evil and how it functions can help those interested in education think through issues in curriculum pedagogy and beyond. The author provokes thinking about and through the concept of evil in the spirit of thoughtful education as opposed to thoughtless schooling toward how we might live together in less harmful ways. Although thinking about evil can be uncomfortable and troubling such inquiries help us explore what sort of relations we want to have with others. Analyzing our role in evil as humans as well as our responsibilities to counter the processes of evil present in our everyday lives opens up a potential to foster radical thought in and out of the classroom. **Justice, Education, and the World of Today** Inga Bostad, Marianna Papastephanou, Torill Strand, 2023-05-04 This edited book

challenges the limits of current educational philosophical discourse and argues for a restored normativisation of education through a powerful notion of justice Moving beyond conventional paradigms of how justice and education relate the book rethinks the promotion of justice in for and through education in its current state Chapters combine international and diverse philosophical perspectives with a focus on contemporary issues such as climate change the COVID 19 pandemic racism and migrant crises Divided into three distinct parts the book explores the ontological and socio political grounds underlying our notions of education and justice and offers self reflective meta critique on education philosophers tendency of promoting and upholding orthodox visions and missions Ultimately the book offers contemporary and innovative philosophical reflections on the link between justice and education and enriches the discourse through a multi perspectival and sensitive exploration of the topic It will be of great interest to scholars researchers and postgraduate students in the fields of philosophy of education education policy and politics education studies and social justice The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Funded by University of Oslo

Cognitive

Capitalism, Education, and Digital Labor Michael A. Peters, Ergin Bulut (Ed), 2011 Cognitive capitalism sometimes referred to as third capitalism after mercantilism and industrial capitalism is an increasingly significant theory given its focus on the socio economic changes caused by Internet and Web 2.0 technologies that have transformed the mode of production and the nature of labor. The theory of cognitive capitalism has its origins in French and Italian thinkers particularly Gilles Deleuze and Felix Guattari's *Capitalism and Schizophrenia*. Michel Foucault's work on the birth of biopower and Michael Hardt and Antonio Negri's *Empire* and *Multitude* as well as the Italian Autonomist Marxist movement that had its origins in the Italian operaismo workerism of the 1960s. In this collection leading international scholars explore the significance of cognitive capitalism for education especially focusing on the question of digital labor. **Communication & Cognition**, 2004
