It turns out that jellyfish/ despite their sluggish looks/ are just as effective at hunting and catching meals as their competitors with fins// They may not move as quickly/ but in a study published in the journal Science/ researchers found that many jellyfish use their body size to increase their hunting success// With their large, watery bodies and long tentacles/ they conserve energy/ by letting currents guide them into their prey, said José Luis Acuña/ an author of the paper and a biologist at the University of Oviedo in Spain//
