The Triumph of Liberalism Gordon Alexander Craig, 1983 **The Triumph of Liberalism** Gordon Alexander Craig, 1988 **Revolutionary Europe 1780-1850** Jonathan Sperber, 2017-04-21 Jonathan Sperber's *Revolutionary Europe 1780-1850* is a history of Europe in the age of the French Revolution from the end of the old regime to the outcome of the revolutions of 1848. Fully revised and updated, this second edition provides a continent-wide history of the key political events and social transformation that took place within this turbulent period, extending as far as their effects within the European colonial society of the Caribbean. Key features include analyses of the movement from society's old regime of orders to a civil society of property owners; the varied consequences of rapid population increase and the spread of market relations in the economy; and the upshot of these changes for political life from violent revolutions and warfare to dramatic reforms and peaceful mass movements. A lively account of the events of the period and a thorough analysis of the political, cultural, and socioeconomic transformations that shaped them, a look into the lives of ordinary people amidst the social and economic developments of the time, a range of maps depicting the developments in Europe's geographic scope between 1789 and 1848, including the 1820, 1830, and 1848 revolutions. *Revolutionary Europe 1780-1850* is the perfect introduction for students of the history of the French Revolution and the history of Europe more broadly. *Richard Wagner's Zurich* Chris Walton, 2007. An investigation of the considerable influence of Wagner's stay in Zurich from 1849 to 1858, a period often discounted by scholars on his career. When the people of Dresden rose up against their king in May 1849, Richard Wagner went from Royal Kapellmeister to republican revolutionary overnight. He gambled everything, but the rebellion failed and he lost all. Now a wanted man in Germany, he fled to Zurich. Years later, he wrote that the city was devoid of any public art form and full of simple people who knew nothing of my work as an artist. But he lied. Zurich boasted arguably the world's greatest concentration of radical intellectuals and a vibrant music scene. Wagner was accepted with open arms. This book investigates Wagner's affect on the musical life of the city and the city's impact on him. Mathilde Wesendonck emerges not as Wagner's passive muse but as a self-assured woman who exploited gender expectations to her own benefit. In 1858, Wagner had to flee Zurich after again gambling everything, this time on Mathilde, and again losing. But it was in Zurich that Wagner wrote his major theoretical works, composed *Das Rheingold*, *Die Walküre*, and parts of *Siegfried* and *Tristan und Isolde*, first planned *Parsifal*, held the first festival of his music, and conceived of a theater to stage his own works. If Wagner had been free in 1849 to choose a city in which to seek heightened intellectual stimulation among the like-minded and the similarly gifted, he could have come to no more perfect place. Chris Walton teaches music history at the Musikhochschule Basel in Switzerland. He is the recipient of the 2010 Max Geilinger Prize honoring exemplary contributions to the literary and cultural relationship between Switzerland and the English-speaking world. **The Laboratory Revolution and the Creation of the Modern University, 1830-1940** Klaas Berkel, Ernst Homburg, 2025-10-01. The modern research university originated in Europe in the

second half of the nineteenth century largely due to the creation and expansion of the teaching and research laboratory. The universities and the sciences underwent a laboratory revolution that fundamentally changed the nature of both. This revolutionary development began in chemistry where Justus Liebig is credited with systematically employing his students in his ongoing research during the 1830s. Later this development spread to other fields including the social sciences and the humanities. The consequences for the universities were colossal. The expansion of the laboratories demanded extensive new building programs reshaping the outlook of the university. The social structure of the university also diversified because of this laboratory expansion while what it meant to be a scientist changed dramatically. This volume explores the spatial, social, and cultural dimensions of the rise of the modern research laboratory within universities and their consequent reshaping.

Origins of Liberal Dominance Andrew C. Gould, 2010-06-02 How did liberal movements reshape the modern world? *Origins of Liberal Dominance* offers a revealing account of how states, churches, and parties joined together in France, Belgium, Switzerland, and Germany to produce fundamentally new forms of organization that have shaped contemporary politics. Modern political life emerged when liberal movements sought to establish elections, constitutions, free markets, and religious liberty. Yet liberalism even at its height faced strong and often successful opposition from conservatives. What explains why liberals overcame their opponents in some countries but not in others? This book compares successful and unsuccessful attempts to build liberal political parties and establish liberal regimes in France, Belgium, Switzerland, and Germany from 1815 to World War I. Andrew Gould argues that relations between states and churches set powerful conditions on any attempt at liberalization. Liberal movements that enhanced religious authority while reforming the state won clerical support and successfully built liberal institutions of government. Furthermore, liberal movements that organized peasant backing around religious issues founded or sustained mass movements to support liberal regimes. *Origins of Liberal Dominance* offers striking new insights into the emergence of modern states and regimes. It will be of interest to political scientists, sociologists, comparative historians, and those interested in comparative politics, regime change, and state building, democratization, religion, and politics. Andrew C. Gould is Assistant Professor of Government and Kellogg Institute Fellow, University of Notre Dame.

Liturgy Wars Theodore M. Vial, 2004-03-01 The nineteenth century was a period of intense religious conflict across Europe as people confronted the major changes brought by modernity. In Zurich, one phase of this religious conflict was played out in a struggle over revisions to the ritual of baptism. In its analysis of the Zurich conflict, *Liturgy Wars* offers a strategy for understanding the links between theology, ritual, and socio-politics. Theodore M. Vial offers a new perspective on contemporary ritual studies and critiques the cognitivist approaches of Lawson and McCauley as well as Catherine Bell's analysis of power and the body by reintegrating the importance of speech acts into considerations of ritual.

Politics as Development Gale Stokes, 1990 Nineteenth-century Serbia was an economically and socially backward country with an urban population of approximately 3 percent and a literacy rate in the countryside of

less than 10 percent Still during that century it created a functioning democracy with a constitution independent courts political parties and civil liberties The Serbian experience challenges the view that political structures fundamentally depend on socioeconomic ones since Serbia created a modern political system without developing economically Politics as Development analyzes one aspect of that process the emergence of political parties in the 1870s and the 1880s especially the creation of the Serbian Radical Party under the leadership of Nikola Pasic By mobilizing the peasantry through organizing the countryside the Radicals proved themselves the most original nineteenth century Balkan political movement Based on thorough research of primary documents Stokes s study supports the view that the state and its attending class constitute an independent variable in the developmental process

Translation and the Intersection of Texts, Contexts and Politics Mohammed Albakry, 2017-07-27. This book analyzes the impact of historical, political and sociocultural contexts on the reading, rewriting and translating of texts. The authors base their arguments on their experiences of translating or researching different text types, taking in fiction, short stories, memoirs, religious texts, scientific treatises and news reports from a variety of different languages and cultural traditions. In doing so, they cover a wide range of contexts and time periods, including Early Modern Europe, post-1848 Switzerland, nineteenth-century Portugal, Egypt in the early twentieth century under British colonial rule, Spain under Franco's dictatorship and contemporary Peru and China. They also consider the theoretical and pedagogical implications of their conclusions for translation students and practitioners. This edited collection will be of great interest to scholars working in translation studies, applied linguistics and on issues of cultural difference.
