Thinking Like A Mall Environmental Philosophy After The End Of Nature:

Thinking like a Mall Steven Vogel, 2015-05-29 A provocative argument that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment Environmentalism in theory and practice is concerned with protecting nature But if we have now reached the end of nature as Bill McKibben and other environmental thinkers have declared what is there left to protect In *Thinking like a Mall* Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues provocatively that environmental philosophy in its ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it

After the Anthropocene Anne Fremaux, 2019-03-25 The environmental crisis is the most prominent challenge humanity has ever had to battle with and humanity is currently failing The Anthropocene or so called age of humans is indeed a period when the survival of humanity has never been so much at risk This book locates itself in the field of critical green political theory Fremaux's analysis of the current environmental crisis calls for us to embrace radical shifts in our modes of being or in other words socially progressive innovations that will be described within the unique framework of Green Republicanism In offering a constructive and emancipatory delineation of what could be considered an ecological civilization that is respectful of its natural environment and social differences this book describes how to shift from an arrogant speciesism and materialistic lifestyle to a post anthropocentric ecological humanism focusing on the good life within ecological limits This new political regime calls for a radical reinvention of our societies a decentering of the humans within our metaphysical worldview and a withdrawal of the capitalist technosphere at the benefit of the biosphere It will require a new economic paradigm that replaces the unsustainable capitalist logic of growth by sustainable degrowth and steady economics Rooted in ethical thinking and political philosophy this book seeks to offer a concrete roadmap of how sustainable societies can be fostered

The Environmental Uncanny Brian A. Irwin, 2024-06-27 The *Environmental Uncanny* argues that the increasing destitution of our world is the result of a certain forgetfulness we have forgotten that the basis of our knowledge is not calculative reason but our participation in the natural world The modern built environment is exemplary of this forgetfulness and induces an uncanniness that can help us to understand the nature of our environmental crisis This book

offers a unique interdisciplinary perspective on the global environmental crisis Ranging from traditional phenomenology including substantial discussion of both Merleau Ponty and Heidegger to philosophy of biology to architectural and urban design theory to landscape photography it makes illuminating connections to paint a multifaceted picture Tracing the root causes of dwindling biodiversity deforestation and suburban sprawl we can find how might we mark the path back toward a mode of rich inhabitation in a contemporary age In charting out how it is that we are losing our world Irwin offers a thought as to how we might regain it

Handbook of Environmental Political Theory in the Anthropocene Amanda Machin, Marcel Wissenburg, 2025-03-12 This Handbook provides a comprehensive overview of the transforming landscape of environmental political theory Embracing both classical and marginalised approaches in the field it demonstrates the central role of political theory in rethinking the strategies discourses and imaginaries of the Anthropocene epoch This title contains one or more Open Access chapters

The Progress of This Storm Andreas Malm, 2020-02-04 An attack on the idea that nature and society are impossible to distinguish from each other In a world careening towards climate chaos nature is dead It can no longer be separated from society Everything is a blur of hybrids where humans possess no exceptional agency to set them apart from dead matter But is it really so In this blistering polemic and theoretical manifesto Andreas Malm develops a counterargument in a warming world nature comes roaring back and it is more important than ever to distinguish between the natural and the social Only with a unique agency attributed to humans can resistance become conceivable

Pluralist Politics, Relational Worlds Didier Zúñiga, 2022-12-21 In Pluralist Politics Relational Worlds Didier Z iga examines the possibility for dialogue and mutual understanding in human and more than human worlds The book responds to the need to find more democratic ways of listening to giving voice to and caring for the variety of beings that inhabit the earth Drawing on ecology and sustainability in democratic theory Z iga demonstrates the transformative potential of a relational ethics that is not only concerned with human animals but also with the multiplicity of beings on earth and the relationships in which they are enmeshed The book offers ways of cultivating and fostering the kinds of relations that are needed to maintain human and more than human diversity in order for life to persist It also calls attention to the quality of the relationships that are needed for life to flourish advancing our understanding of the diversity of pluralism Pluralist Politics Relational Worlds ultimately presses us to question our own condition of human animality so that we may reconsider the relations we entertain with one another and with more than human forms of life on earth

Nature and Experience Bryan Bannon, 2016-05-18 What do we mean when we speak about and advocate for nature Do inanimate beings possess agency and if so what is its structure What role does metaphor play in our understanding of and relation to the environment How does nature contribute to human well being By bringing the concerns and methods of phenomenology to bear on questions such as these this book seeks to redefine how environmental issues are perceived and discussed and demonstrates the relevance of phenomenological inquiry to a broader audience in environmental studies The book examines what phenomenology must be like to address the

practical and philosophical issues that emerge within environmental philosophy what practical contributions phenomenology might make to environmental studies and policy making more generally and the nature of our human relationship with the environment and the best way for us to engage with it

Dialogues on Climate Justice Stephen M. Gardiner, Arthur Obst, 2022-09-26 Written both for general readers and college students Dialogues on Climate Justice provides an engaging philosophical introduction to climate justice and should be of interest to anyone wanting to think seriously about the climate crisis The story follows the life and conversations of Hope a fictional protagonist whose life is shaped by a terrifyingly real problem climate change From the election of Donald Trump in 2016 until the 2060s the book documents Hope's discussions with a diverse cast of characters As she ages her conversations move from establishing the nature of the problem to engaging with climate skepticism to exploring her own climate responsibilities through managing contentious international negotiations to considering big technological fixes and finally as an older woman to reflecting with her granddaughter on what one generation owes another Following a philosophical tradition established by Plato more than two thousand years ago these dialogues are not only philosophically substantive and carefully argued but also distinctly human The differing perspectives on display mirror those involved in real world climate dialogues going on today Key Features Written in an engaging dialogue form which includes characterization clear exchanges of ideas and a compelling story arc Clearly organized to allow readers both in depth consideration and rapid overviews of various topics Memorable examples that enable and encourage discussion inside and outside the classroom An Introduction to the book aimed at instructors which includes helpful instructions for teaching the book and engaging student assignments

The Love of Nature and the End of the World Sherry Weber Nicholsen, 2003-02-28 A psychological exploration of how the love of nature can coexist in our psyches with apathy toward environmental destruction Virtually everyone values some aspect of the natural world Yet many people are surprisingly unconcerned about environmental issues treating them as the province of special interest groups Seeking to understand how our appreciation for the beauty of nature and our indifference to its destruction can coexist in us Sherry Weber Nicholsen explores dimensions of our emotional experience with the natural world that are so deep and painful that they often remain unspoken The Love of Nature and the End of the World is a gathering of meditations and collages Its evocations of our emotional attachment to the natural world and the emotional impact of environmental deterioration are meant to encourage individual and collective reflection on a difficult dilemma Nicholsen draws on work in environmental philosophy and ecopsychology the writings of psychoanalytic thinkers such as Wilfred Bion Donald Meltzer and D W Winnicott and ideas from Buddhist and Sufi traditions She shows how our emotional responses to the vulnerabilities of the natural world range from intense caring and compassion through grief and outrage to diffuse depression Individual chapters focus on silence and the process whereby we move from the unspoken to the spoken the love of nature the perceptual reciprocity with the natural world to which we might mature beauty in the human and natural realms the

psychological impact of the destruction of the natural world and reflections on the future Environmental Philosophy After the De(con)struction of Nature Glenn Delière, 2007 **Living Through the End of Nature** Paul Wapner, 2013-02-08 How environmentalism can reinvent itself in a postnature age a proposal for navigating between naive naturalism and technological arrogance Environmentalists have always worked to protect the wildness of nature but now must find a new direction We have so tamed colonized and contaminated the natural world that safeguarding it from humans is no longer an option Humanity's imprint is now everywhere and all efforts to preserve nature require extensive human intervention At the same time we are repeatedly told that there is no such thing as nature itself only our own conceptions of it One person's endangered species is another's dinner or source of income In *Living Through the End of Nature* Paul Wapner probes the meaning of environmentalism in a postnature age Wapner argues that we can neither go back to a preindustrial Elysium nor forward to a technological utopia He proposes a third way that takes seriously the breached boundary between humans and nature and charts a co evolutionary path in which environmentalists exploit the tension between naturalism and mastery to build a more sustainable ecologically vibrant and socially just world Beautifully written and thoughtfully argued *Living Through the End of Nature* provides a powerful vision for environmentalism's future **TLS, the Times Literary Supplement**, 1973 **The New York Times Index**, 1998 **Skeptical Environmentalism** Robert Kirkman, 2002-02 In *Skeptical Environmentalism* Robert Kirkman raises doubts about the speculative tendencies elaborated in environmental ethics deep ecology social ecology postmodern ecology ecofeminism and environmental pragmatism Drawing on skeptical principles introduced by David Hume Kirkman takes issue with key tenets of speculative environmentalism namely that the natural world is fundamentally relational that humans have a moral obligation to protect the order of nature and that understanding the relationship between nature and humankind holds the key to solving the environmental crisis Engaging the work of Kant Hegel Descartes Rousseau and Heidegger among others Kirkman reveals the relational worldview as an unreliable basis for knowledge and truth claims and more dangerously as harmful to the intellectual sources from which it takes inspiration Exploring such themes as the way knowledge about nature is formulated what characterizes an ecological worldview how environmental worldviews become established and how we find our place in nature *Skeptical Environmentalism* advocates a shift away from the philosopher's privileged position as truth seeker toward a more practical thinking that balances conflicts between values and worldviews *False Flat* Aaron Betsky, Adam Eeuwens, 2004-09 Survey of the vitality of the current design scene in The Netherlands Innovation and experimentation in architecture urban planning industrial design and graphic design Contemporary Dutch designers artfully recast and reinterpret known forms and modernist archetypes through technological know how creativity and wit RIBA Journal Royal Institute of British Architects, 1971 Beyond Environmentalism Jeffrey E. Foss, 2008-05-29 This one of a kind book provides thoughtful insight into the current relationship between humankind and the environment *Beyond Environmentalism* is the first book of its kind

to present a timely and relevant analysis of environmentalism The author s decades of experience as a philosopher of science allow him to critically comprehend scientific issues and to develop and explain sound ethical policies in response to them The result is a volume that builds a philosophy of nature and helps the reader assess humankind s relationship with and impact on the world around us This innovative book discusses the inconsistencies both scientific and philosophical of popular environmentalism and sheds new perspectives on the issues causes and debates that embrace society today The goal is not to settle environmental issues once and for all but rather to provide the basis for more reasoned scientific and productive debates The need for a new philosophy of nature is explored through methodological discussion of several topics including The rise and fall of scientific proof Nature in religion romance and human values Humankind s responsibility to the environment The value of freedom Kinship among species Numerous case studies throughout the book delve into global warming the sixth extinction the precautionary principle pollution and other popular issues within environmentalism Feature boxes guide the reader through complex topics such as eco sabotage the Gaia hypothesis and the urban heat island effect while vivid illustrations demonstrate scientific data theories and philosophical arguments in a reader friendly manner With its balanced approach to provocative issues *Beyond Environmentalism* serves as an excellent thought provoking supplement for courses on environmental studies at the undergraduate and graduate levels It is also an interesting and accessible read for anyone with a general interest in environmental issues
