This Land This Nation Conservation Rural America And The New Deal:

This Land, This Nation Sarah T. Phillips, 2007-03-05 This 2007 book combines political with environmental history to present conservation policy as a critical arm of New Deal reform one that embodied the promises and limits of midcentury American liberalism It interprets the natural resource programs of the 1930s and 1940s as a set of federal strategies aimed at rehabilitating the economies of agricultural areas The New Dealers believed that the country as a whole would remain mired in depression as long as its farmers remained poorer than its urban residents and these politicians and policymakers set out to rebuild rural life and raise rural incomes with measures tied directly to conservation objectives land retirement soil restoration flood control and affordable electricity for homes and industries In building new constituencies for the environmental initiatives resource administrators and their liberal allies established the political justification for an enlarged federal government and created the institutions that shaped the contemporary rural landscape *Agrarian Crossings* Tore C. Olsson, 2017-08-02 In the 1930s and 1940s rural reformers in the United States and Mexico waged unprecedented campaigns to remake their countrysides in the name of agrarian justice and agricultural productivity *Agrarian Crossings* tells the story of how these campaigns were conducted in dialogue with one another as reformers in each nation came to exchange models plans and strategies with their equivalents across the border Dismantling the artificial boundaries that can divide American and Latin American history Tore Olsson shows how the agrarian histories of both regions share far more than we realize He traces the connections between the US South and the plantation zones of Mexico places that suffered parallel problems of environmental decline rural poverty and gross inequities in land tenure Bringing this tumultuous era vividly to life he describes how Roosevelt's New Deal drew on Mexican revolutionary agrarianism to shape its program for the rural South Olsson also looks at how the US South served as the domestic laboratory for the Rockefeller Foundation's green revolution in Mexico which would become the most important Third World development campaign of the twentieth century and how the Mexican government attempted to replicate the hydraulic development of the Tennessee Valley Authority after World War II Rather than a comparative history *Agrarian Crossings* is an innovative history of comparisons and the ways they affected policy moved people and reshaped the landscape *Empire of Timber* Erik Loomis, 2016 This is the first book to center labor unions as actors in American environmental policy **Trading Environments** Gordon M. Winder, Andreas Dix, 2015-12-07 This volume examines dynamic interactions between the calculative and speculative practices of commerce and the fruitfulness variability materiality liveliness and risks of nature It does so in diverse environments caught up in new trading relationships forged on and through frontiers for agriculture forestry mining and fishing Historical resource frontiers are understood in terms of commercial knowledge systems organized as projects to transform landscapes and environments The book asks how were environments traded and with what environmental and landscape consequences How have environments been engineered standardized and transformed within past trading systems

What have been the successes and failures of economic knowledge in dealing with resource production in complex environments It considers cases from northern Europe North and South America Central Africa and New Zealand in the period between 1750 and 1990 and the contributors reflect on the effects of transnational commodity chains competing economic knowledge systems environmental ignorance and learning and resource exploitation In each case they identify tensions blind spots and environmental learning that plagued commercial projects on frontiers

Crossroads George Vrtis, Christopher W. Wells, 2023-01-10 Minnesota's Twin Cities have long been powerful engines of change. From their origins in the early nineteenth century, the Twin Cities helped drive the dispossession of the region's Native American peoples, turned their riverfronts into bustling industrial and commercial centers, spread streets and homes outward to the horizon, and reached well beyond their urban confines, setting in motion the environmental transformation of distant hinterlands. As these processes unfolded, residents inscribed their culture into the landscape, complete with all its tensions, disagreements, contradictions, prejudices, and social inequalities. These stories lie at the heart of *Nature's Crossroads*. The book features an interdisciplinary team of distinguished scholars who aim to open new conversations about the environmental history of the Twin Cities and Greater Minnesota. **Great Plains Quarterly**, 2009
