This Changes Everything Naomi Klein, 2015-08-04 1 bestseller winner of the Hilary Weston Writers Trust Prize for Non Fiction and Naomi Klein's most important book yet about the economic drivers that are warming our planet and how the climate crisis can yet spur economic cultural and political transformation Klein argues that our current growth based economic model is waging war on the life support systems of our planet Using phenomenal research she lays out why climate change is not an issue it is a civilizational wake up call a powerful message delivered in the language of fires floods storms and droughts Klein attacks the dominant economic policies of deregulated capitalism and endless resource extraction and brilliantly identifies the threads that connect our failed responses to the crisis from hard core climate deniers to celebrity billionaires with messiah complexes to the reckless quest to engineer the planet and she reveals how the Big Green environmental organizations may be hurting more than helping She argues that we urgently need an entirely new model of human progress and shows why climate change with its full economic and moral implications understood is the most powerful weapon we have ever had in the fight for equality and social justice Tracing the rise of a bold new resistance movement against extreme energy she highlights the real solutions emerging in the rubble of our failed systems solutions that require us to break virtually every rule in the free market playbook The climate change debate is about to get a lot hotter

It's Not Just You Tori Tsui,2023-07-06 The world is in desperate need of this book Greta Thunberg *It's Not Just You* is a galvanising breath of fresh air Mikaela Loach Tori Tsui is changing the conversation around mental health and the climate crisis *Vogue* A must read for anyone who would love to understand the intersections of mental health and the climate crisis Vanessa Nakate *It's not just you* The climate crisis is making us all unwell But not just you The climate crisis is affecting certain communities disproportionately And it s not just the climate crisis The term eco anxiety has been popularised as a way to talk about the negative impact of the climate emergency on our wellbeing In *It's Not Just You* activist Tori Tsui reframes eco anxiety as the urgent mental health crisis it clearly is Drawing on the wisdom of environmental advocates from around the globe Tori looks to those on the frontlines of eco activism to demonstrate that the current climate related mental health struggle goes beyond the climate itself Instead it is a struggle that encompasses many injustices and is deeply entrenched in systems such as racism sexism ableism and above all capitalism Because of this climate injustice disproportionately affects most marginalised communities who are often excluded from narratives on mental health Tori

argues that we can only begin to tackle both the climate and mental health crisis by diversifying our perspectives and prioritising community led practices In essence reminding us that It s Not Just You Tackling this increasingly urgent crisis requires looking both inwards and outwards embracing individuality over individualism and championing climate justice Only then can we start to build better futures for both people and the planet *Capitalism in the Anthropocene* John Bellamy Foster,2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world s population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism s alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope **The Environmental Documentary** John A. Duvall,2017-05-18 The Environmental Documentary provides the first extensive coverage of the most important environmental films of the decade including their approach to their topics and their impacts on public opinion and political debate While documentaries with themes of environmental activism date back at least to Pare Lorenz s films of the 1930 s no previous decade has produced the number and quality of films that engage environmental issues from an activist viewpoint The convergence of high profile issues like climate change fossil fuel depletion animal abuse and corporate malfeasance has combined with the miniaturization of high quality recording equipment and the expansion of documentary programming to produce an unprecedented number of important and influential documentary productions The text examines the processes of production and distribution that have produced this explosion in documentaries The films range from a high profile Hollywood production with theatrical distribution like An Inconvenient Truth to shorter independently produced films like The End of Suburbia that have reached a small audience of activists through video distribution interviews with many of the filmmakers and word of mouth **Love in a Time of Climate Change** Sharon Delgado,2017-06-30 Love in a Time of Climate Change challenges readers to develop a loving response to climate change which disproportionately harms the poor threatens future generations and damages God s creation This book creatively adapts John Wesley s theological method by using scripture tradition reason and experience to explore the themes of creation and justice in the context of the earth s changing climate By consciously employing these four sources of authority readers

discover a unique way to reflect on planetary warming theologically and to discern a faithful response The book's premise is that love of God and neighbor in this time of climate change requires us to honor creation and establish justice for our human family for future generations and for all creation From the introduction As we entrust our lives to God we are enabled to join with others in the movement for climate justice and to carry a unified message of healing love and solidarity as we live into God's future offering hope in the midst of the climate crisis that another world is possible God is ever present always with us Love never ends

Climate Change, Capitalism, and Corporations Christopher Wright, Daniel Nyberg, 2015-09-23 Climate change is one of the greatest threats facing humanity a definitive manifestation of the well worn links between progress and devastation This book explores the complex relationship that the corporate world has with climate change and examines the central role of corporations in shaping political and social responses to the climate crisis The principal message of the book is that despite the need for dramatic economic and political change corporate capitalism continues to rely on the maintenance of business as usual The authors explore the different processes through which corporations engage with climate change Key discussion points include climate change as business risk corporate climate politics the role of justification and compromise and managerial identity and emotional reactions to climate change Written for researchers and graduate students this book moves beyond descriptive and normative approaches to provide a sociologically and critically informed theory of corporate responses to climate change

Fighting Pollution and Climate Change: An EPA Veterans' Guide How to Join in Saving Our Life on Planet Earth Richard W. Emory, Jr, 2019-12-05 A former Environmental Protection Agency attorney delivers an impassioned plea to fight pollution and climate change Timely and engaging a heroic environmental story well told Kirkus Book Review April 22 2020 50th Anniversary of Earth Day Written both as a historic record and how to guide aimed at inspiring change makers this unvarnished and timely depiction from 1980 to today has something to offer readers of any age or ilk Emory pulls back the curtain to expose the inner workings of the federal government and the EPA He dives into the data historic indicators scientific and economic data and policy choices as well as humorously illustrating his forays abroad and his courtroom adventures He tells the story of rampant pollution and how the US has fallen so far behind in its response to climate change and transition to clean energy Emory has faith in forthcoming environmentalists and his solutions oriented presentation of the facts makes complex cross sector challenges feel within our grasp Fiona Gordon published in Maine Environment newsletter of the Natural Resources Council of Maine Augusta Maine spring summer 2020 This hybrid that is a must read memoir and climate change book is NOT another dry treatise or one sided unbalanced diatribe Richard Emory has written a very thoroughly knowledgeable and realistic account of the truth about EPA and how to fight pollution He weaves in wonderful personal climate change stories and anecdotes about successes and failures of environmental policies enacted in the U S and other countries and how national attitudes have affected climate change EPA's mission Young people will be inspired to learn how to protect our environment David Katz retired Assistant United States Attorney With the

election of President Biden and a new Congress America is rejoining the Western world that sees the need for the U S to revive its EPA formulate a Green New Deal and restore U S global leadership within the Paris Climate Accord Fighting Pollution and Climate Change is a must read memoir by Richard W Emory Jr our nation s former top legal advisor to all EPA federal special agents Emory witnessed how the U S Department of Justice failed to effectively prosecute crimes of pollution He became a whistleblower when interviewed by Congress that was investigating reports of mishandled pollution cases In the second half of his career working within EPA s foreign assistance mission to the waiting world he helped spread effective measures for pollution control and for the implementation of global environmental treaties Fighting Pollution and Climate Change is a page turner you will laugh you will cry but you won t be bored You will learn the truth about U S and international successes and failures in the fight against air water pesticides and toxic waste pollution You ll be encouraged by his insider perspective as he tells how to protect the climate using today s technologies and EPA s proven policies Who will benefit from this important environmental book Aspiring environmental activists both young and old who want to learn how to fight pollution and take action on climate change Lovers of memoirs and nature who will be touched by one individual s adventures in the exciting work of pollution control that can and must be expanded to climate protection Global leaders and movements prepared to face the next chapter of unifying our world under a much stronger agenda to heal the Earth and protect our planet

Economics and Climate Emergency Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal Globalizations

Deep Inequality Earl Wysong, Robert Perrucci, 2017-11-17 Forbes reports that the richest 1 percent of the world's population owns nearly half the world's wealth and the gap between the richest and poorest of the world only continues to increase Deep Inequality looks behind these stark statistics to understand not only wealth inequality but also rising disparities in other elements of life from education to the media The authors argue that inequality has become so pervasive that it is the new normal When we do recognize troubling inequality we look at individual or small scale problems without understanding the broader structural issues that shape the economy the global political system and more Only by understanding the structural forces at play can we recognize the deep divisions in our society and work for meaningful change Deep Inequality explains the changing landscape of inequality to help readers see society in a new way

Teaching Climate History Alan J. Singer, 2021-12-28 Welcome to the Anthropocene Since the start of the Industrial Revolution human caused climate change has impacted the globe with the burning of fossil fuels The debate in classrooms and the political realm should not be whether climate change is happening or how much it places human civilization at risk but over how societies and individuals should respond This interdisciplinary book offers an in depth examination of the history of the Earth's climate and how historians and citizens can influence contemporary climate debate and activism The author explains climate history and climate science and makes this important subject matter accessible to a general audience Chapter topics include examining the Earth's geological past the impact of climate on human evolution the impact of climate on earlier civilizations climate activism and the need for

international cooperation Presenting climate history human history and climate science in a readable format and featuring resources for students this book is meant for use by teachers in high school elective or an introductory college course setting

Routledge Handbook of Climate Justice Tahseen Jafry, 2018-11-01 The term climate justice began to gain traction in the late 1990s following a wide range of activities by social and environmental justice movements that emerged in response to the operations of the fossil fuel industry and later to what their members saw as the failed global climate governance model that became so transparent at COP15 in Copenhagen The term continues to gain momentum in discussions around sustainable development climate change mitigation and adaptation and has been slowly making its way into the world of international and national policy However the connections between these remain unestablished Addressing the need for a comprehensive and integrated reference compendium The Routledge Handbook of Climate Justice provides students academics and professionals with a valuable insight into this fast growing field Drawing together a multidisciplinary range of authors from the Global North and South this Handbook addresses some of the most salient topics in current climate justice research including just transition urban climate justice and public engagement in addition to the field's more traditional focus on gender international governance and climate ethics With an emphasis on facilitating learning based on cutting edge specialised climate justice research and application each chapter draws from the most recent sources real world best practices and tutored reflections on the strategic dimensions of climate justice and its related disciplines The Routledge Handbook of Climate Justice will be essential reading for students and scholars as well as being a vital reference tool for those practically engaged in the field

Community, Psychology and Climate Justice Brendon R. Barnes, Maria Fernandes-Jesus, Carlie D. Trott, Garret Barnwell, 2025-09-26 This book uniquely focuses on community psychology and climate justice Climate change in general has been an area of increasing interest to psychologists in recent years particularly in its cognitive perceptual and affective aspects Because communities are often on the forefront of resistance to the deleterious effects of climate change psychologists have become aware of the ramifications of large scale resource developments toxic contamination and dispossession to name a few The current conceptualizations and approaches to climate change however are not adequate to today's needs Addressing this gap this volume emphasizes the politics of social justice going beyond internal psychological variables it explores the legacy of colonialism highlights the needs of indigenous peoples and takes an expansive interdisciplinary stance including critical theory queer theory feminism
