Disclosing Childhoods Spyros Spyrou, 2018-04-17 *Disclosing Childhoods* offers a critical account of knowledge production in childhood studies The book argues for the need to be reflexive about the knowledge practices of the field and to scrutinize the role of researchers in disclosing certain childhoods rather than others A relational lens is used to critique the ongoing fixation of childhood studies with the unitary child agent and to re introduce the question of ontology in knowledge production The author provides a critical account of childhood studies trajectory as well as exploring the key concepts of voice agency and participation illustrating the potential of a reflexive stance towards knowledge production Drawing on poststructuralist and posthumanist thinking each of these concepts is critiqued for its conceptual limits while productive avenues are offered to reconfigure their utility Spyrou also addresses the ethics and politics of knowledge production and considers key emerging insights which can contribute towards the development of a more reflexive and critical childhood studies Students and scholars across a range of disciplines including childhood studies anthropology sociology and geography will find this book of interest as well as those interested in qualitative research methodology and social theory

Theory and Methods for Public Pedagogy Research Karen Charman, Mary Dixon, 2021-03-08 *Theory and Methods for Public Pedagogy Research* introduces promising new methods of public pedagogy research centered around transforming rather than explaining knowledge The new methods are premised on a new theorisation of public pedagogy which recognises the educative agent The agency of the public to speak to be heard to know is manifest as the educative agent speaks their knowledge and the researcher must be attentive to that speaking This work extends the well established intellectual projects in the field to introduce four new methods for public pedagogy research organisation performance curation and research A key focus of this work is attending to how the circulation of knowledge in non formal settings can be recognised It examines the under published area of pedagogy and research in public spaces and engages post qualitative approaches to inquiry to open up the field Moreover it explores the possibility of performances art exhibitions and museums as public spaces of knowledge generation and pedagogy It also shows how research can be applied in practice in

public pedagogy to discover best practices for working in these spaces Finally it confronts and critiques the dilemmas of public pedagogy research and the limits of research methods which have previously been deployed in this field This book will be of interest to researchers and students in the field of public education and teaching in a variety of social science and arts disciplines and education Thinking with Theory in Qualitative Research Alecia Y.
