Clarke** Gary Westfahl, 2018-06-14 Already renowned

for his science fiction and scientific nonfiction Arthur C Clarke became the world's most famous science fiction writer after the success of *2001 A Space Odyssey*. He then produced novels like *Rendezvous with Rama* and *The Fountains of Paradise* that many regard as his finest works. Gary Westfahl closely examines Clarke's remarkable career ranging from his forgotten juvenilia to the passages he completed for a final novel *The Last Theorem*. As Westfahl explains, Clarke's science fiction offered original perspectives on subjects like new inventions, space travel, humanity's destiny, alien encounters, the undersea world, and religion. While not inclined to mysticism, Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans. Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped, arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty-first century.

The Science of Sci-Fi Music Andrew May, 2020-06-30 The 20th century saw radical changes in the way serious music is composed and produced, including the advent of electronic instruments and novel compositional methods such as serialism and stochastic music. Unlike previous artistic revolutions, this one took its cues from the world of science. Creating electronic sounds in the early days required a well-equipped laboratory and an understanding of acoustic theory. Composition became increasingly algorithmic, with many composers embracing the mathematics of set theory. The result was some of the most intellectually challenging music ever written, yet also some of the best known, thanks to its rapid assimilation into sci-fi movies and TV shows, from the electronic scores of *Forbidden Planet* and *Dr. Who* to the otherworldly sounds of *2001 A Space Odyssey*. This book takes a close look at the science behind science-fiction music, as well as exploring the way sci-fi imagery found its way into the work of musicians like Sun Ra and David Bowie, and how music influenced the science-fiction writings of Philip K. Dick and others.

The Intertextuality and Intermediality of the Anglophone Popular Song Michael Ingham, 2022-09-07 Popular song is a liminal hybrid form of cultural production. As a manifestation of adaptation studies, it has lacked visibility by comparison with more dominant adaptation practices, especially those for the screen. This book serves to fill this gap. It investigates what songwriters read and write before they start singing, showing that they need either to adapt material from existing sources or write their own lyrics drawn from a wide range of source texts and personal experiences. They are subject to myriad influences, and among these are other song lyrics, poems, novels, plays, films, and hybrid cultural forms. This deep structure of intertextuality is embedded in the cultural flux of language and operates at both conscious and subconscious levels. This book thus explores the complex and multifarious intertextual connections between popular songs of various genres, styles, and eras and literary works, including but by no means limited to the Bible and Shakespeare. As such, it offers a valuable resource by exploring the deep intertextual significance of literary source material for the intellectual and emotional diversity that can be found in the popular song form, the inverse reciprocal relationship while much less common is also considered in the study.

The Golden Age of Science

Fiction John Wade, 2020-11-12 A detailed look at the British world of science fiction in the 1950s John Wade grew up in the 1950s a decade that has since been dubbed the golden age of science fiction It was a wonderful decade for the genre but not so great for young fans With early television broadcasts being advertised for the first time as unsuitable for children and the inescapable barrier of the X certificate in the cinema barring anyone under the age of sixteen the author had only the radio to fall back on and that turned out to be more fertile for the budding SF fan than might otherwise have been thought Which is probably why as he grew older rediscovering those old TV broadcasts and films that had been out of bounds when he was a kid took on a lure that soon became an obsession For him the super accuracy and amazing technical quality of today's science fiction films pale into insignificance beside the radio early TV and B picture films about people who built rockets in their back gardens and flew them to lost planets or tales of aliens who wanted to take over if not our entire world then at least our bodies This book is a personal account of John Wade's fascination with the genre across all the entertainment media in which it appeared the sort of stuff he reveled in as a young boy and still enjoys today Not only a well researched book grounded in hundreds of sources but also an unmistakable labor of love New York Journal of Books
