Media, 2022-09-09T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 Pay attention when you read a book The power of story is so embedded in our lives that we are completely desensitized to its weird and witchy power To experience its fascination you must concentrate and resist the suction of alternate worlds But you can do this It's not too late to save yourself Well it's never too late to try anyway It's never too late to learn to read The power of story is so embedded in our lives that we are completely desensitized to its weird and witchy power 2 When you read a book your mind is working hard to create images that surpass the author's descriptions 3 Reading and story are two of the most powerful tools you can use to immerse yourself in a new language 4 We spend more time watching television than we do reading books and we spend a lot of time reading online **The Storytelling Animal** Jonathan Gottschall, 2020-06-11

Insightful draws from disparate corners of history and science to celebrate our compulsion to storify everything around us The New York Times Book Review Humans live in landscapes of make believe We spin fantasies We devour novels films and plays Even sporting events and criminal trials unfold as narratives Yet the world of story has remained an undiscovered and unmapped country It's easy to say that humans are wired for story but why In this delightful original book Jonathan Gottschall offers the first unified theory of storytelling He argues that stories help us navigate life's complex social problems just as flight simulators prepare pilots for difficult situations Storytelling has evolved like other behaviors to ensure our survival Drawing on the latest research in neuroscience psychology and evolutionary biology Gottschall tells us what it means to be a storytelling animal Did you know that the more absorbed you are in a story the more it changes your behavior That all children act out the same kinds of stories whether they grow up in a slum or a suburb That people who read more fiction are more empathetic Of course our story instinct has a darker side It makes us vulnerable to conspiracy theories advertisements and narratives about ourselves that are more truthy than true National myths can also be terribly dangerous Hitler's ambitions were partly fueled by a story But as Gottschall shows stories can also powerfully change the world for the better We know we are master shapers of story The Storytelling Animal finally reveals how stories shape us Lively San Francisco Chronicle Absorbing Minneapolis Star Tribune One of my favorite evolutionary psych writers always insightful and witty Steven Pinker **Summary of The Storytelling Animal - [Review Keypoints and Take-aways]** PenZen

The Story Paradox Jonathan Gottschall, 2021-11-23 Storytelling a tradition that built human civilization may soon destroy it Humans are storytelling animals Stories are what make our societies possible Countless books celebrate their virtues But Jonathan Gottschall an expert on the science of stories argues that there is a dark side to storytelling we can no longer ignore Storytelling the very tradition that built human civilization may be the thing that destroys it In The Story Paradox Gottschall explores how a broad consortium of psychologists communications specialists neuroscientists and literary quants are using the scientific method to study how stories affect our brains The results challenge the idea that storytelling is an obvious force for good in human life Yes storytelling can bind groups together but it is also the main force dragging people apart And it is the best method we've ever devised for manipulating each other by circumventing rational thought Behind all civilization's greatest ills environmental destruction runaway demagogues warfare you will always find the same master factor a mind disordering story Gottschall argues that societies succeed or fail depending on how they manage these tensions And it has only become harder as new technologies that amplify the effects of disinformation campaigns conspiracy theories and fake news make separating fact from fiction nearly impossible With clarity and conviction Gottschall reveals why our biggest asset has become our greatest threat and what if anything can be done It is a call to stop asking How we can change the world through stories and start asking How can we save the world from stories
