Published in 1921, this book delves into the intricacies of language and its role in shaping human thought and culture. Sapir, known for his contributions to the fields of anthropology and linguistics, explores how language reflects and influences the way we perceive the world around us. In his book, Sapir discusses various aspects of language, including its structure, grammar, and the ways in which different languages shape our understanding of reality. He also delves into the concept of linguistic relativity, which suggests that the structure of a language can affect the way its speakers perceive the world. Through insightful analysis and engaging prose, Sapir invites readers to delve into the fascinating world of language and its profound impact on human society. *Language An Introduction to the Study of Speech* remains a classic text in the field of linguistics, offering valuable insights into the nature of language and its significance in human communication.

Gabelentz and the Science of Language James McElvenny, 2025-10-01 The German sinologist and general linguist Georg von der Gabelentz (1840-1893) occupies a crucial place in linguistic scholarship around the end of the nineteenth century. As professor at the University of Leipzig and then at the University of Berlin, Gabelentz was present at the main centers of linguistics of the time. He was, however, generally critical of the narrow technical focus of mainstream historical comparative linguistics as practiced by the Neogrammarians and instead emphasized approaches to language inspired by a line of researchers stemming from Wilhelm von Humboldt. Gabelentz's alternative conception of linguistics led him to several pioneering insights into language that anticipated elements of the structuralist revolution of the early twentieth century. *Gabelentz and the Science of Language* brings together four essays that explore Gabelentz's contributions to linguistics from a historical perspective. In addition, it makes one of his key theoretical texts, *Content and Form of Speech*, available to an English-speaking audience for the first time.
