Sovereign Lives Jenny Edkins, Michael J. Shapiro, Veronique Pin-Fat, 2012-10-02 For International Relations scholars discussions of globalization inevitably turn to questions of sovereignty How much control does a country have over its borders people and economy Where does that authority come from *Sovereign Lives* explores these changes through reading of humanitarian intervention human rights discourses securitization refugees the fragmentation of identities and the practices of development

Women, Gender Equality, and Post-Conflict Transformation Joyce P. Kaufman, Kristen P. Williams, 2016-10-04 The end of formal hostilities in any given conflict provides an opportunity to transform society in order to secure a stable peace This book builds on the existing feminist international relations literature as well as lessons of past cases that reinforce the importance of including women in the post conflict transition process and are important to our general understanding of gender relations in the conflict and post conflict periods Post conflict transformation processes including disarmament demobilization and reintegration DDR programs transitional justice mechanisms reconciliation measures and legal and political reforms which emerge after the formal hostilities end demonstrate that war and peace impact and are impacted by women and men differently By drawing on a strong theoretical framework and a number of cases this volume provides important insight into questions pertaining to the end of conflict and the challenges inherent in the post conflict transition period that are relevant to students and practitioners alike

The Space Between Us Cynthia Cockburn, 1998-10 Even in places of deadly national conflict some very ordinary people are routinely doing peace In this study Cynthia Cockburn takes us into three war situations to reveal how certain women have quietly chosen to cross the space between their differences with words instead of bullets

Gender, Religion and Education in a Chaotic Postmodern World Zehavit Gross, Lynn Davies, Al-Khansaa Diab, 2012-12-04 The immense changes that the world is undergoing in terms of globalization and migration of peoples have had a profound effect on cultures and identities The question is whether this means shifts in religious identities for women and men in different contexts whether such shifts are seen as beneficial negative or insufficient or whether social change actually means new conservatism or even fundamentalisms Surrounding these questions is the role of education is in any change or new contradiction This unique book enhances an interdisciplinary discourse about the complex intersections between gender religion and education in the contemporary world Literature in the social sciences and humanities have expanded our understanding of women's involvement in almost every aspect of life yet the combined religious educational aspect is still an under studied and often under theorized field of research How

people experience their religious identity in a new context or country is also a theme now needing more complex attention Questions of the body visibility and invisibility are receiving new treatments This book fills these gaps The book provides a strong comparative perspective with 15 countries or contexts represented The context of education and learning covers schools higher education non formal education religious institutions adult literacy curriculum and textbooks Overall the book reveals a great complexity and often contradiction in modern negotiations of religion and secularism by girls and boys women and men and a range of possibilities for change It provides a theoretical and practical resource for researchers religious and educational institutions policy makers and teachers

Gender, Development, and Humanitarian Work Caroline Sweetman, 2001 While the difficulties of integrating gender equity goals into interventions are acknowledged the authors argue that gender blind responses can further endanger the survival of women and their families and their long term position in society and also deny them the opportunity of exercising their potential as peace builders

Reconstructing Professionalism in University Teaching Melanie Walker, 2001 How can academics carve out new and effective ways of working with students against a background of constant change and policy pressure How can university teachers both enhance student learning and realize their own educational values What might be the shape of a new professionalism in university teaching At the heart of this book is a small group of academics from very different disciplines making sense of their teaching situations We witness each of their struggles and celebrations in designing a new course engaging a large first year class introducing a mentoring programme nurturing independent learning through project work using debates to develop students critical thinking and evaluating the success of their teaching This book is the story of a higher education project and central to the story are the attempts of university teachers to enact a critical professionalism in their everyday lives in teaching and learning and also their development of a shared and collaborative dialogue Each of the team seeks not only to improve their practice of teaching but also to explore amongst themselves what kind of professional they want to be and how to realize it in their work with students **Reconstructing Professionalism in University Teaching** reveals how academics working together on researching their own teaching can both improve their students learning and start to redefine their own professional roles

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2007 The topic feminist research has too often been neglected in standard research methods books The Handbook of Feminist Research represents the establishment of a new tradition or paradigm in viewing how the research process is implemented Feminist researchers bring unique epistemological and methodological perspectives to the research process Feminists approach to methodology allows for new types of questions about women's lives and those of other ed marginalized groups to be addressed within their respective fields of research This Handbook stresses the interconnections between epistemology methodology and methods They are not de linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this Handbook we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice

Thinking Differently Gabrielle Griffin, Rosi Braidotti, 2002-10 Presentation sous <http://www.zedbooks.co.uk> This is the first book to ask whether there is a specifically European dimension to some of the major issues in Women's Studies In doing so it fills some of the gaps in our knowledge about women and enriches debates hitherto dominated by Anglo American influences Among the new areas of enquiry opened up are Europe's

experience of repeated warfare has impacted significantly on women Hence contributions focus on women and militarism and ethnic cleansing as an attack on the family The abidingly problematic relationship between feminism and anti semitism and issues of migration and whiteness in a context where racism reflects the colonial histories of particular European countries The importance of passion the emotions and psychoanalytical theory for the politics of certain European countries The decline of the welfare state across Europe the issue of the relationship between womens rights and human rights and the rise of the phenomenon of the single woman Reading feminism from a European perspective enables readers to reflect upon the ways changes in political social and cultural positions and practices over the past century in Europe have impacted on feminist thinking and theorizing The volume also raises important issues about the transfer of feminist concepts across cultures and languages And to English speaking audiences the volume will offer different viewpoints on some of the key debates Cahiers de la Femme ,2002 *Al-Raida* ,2003 **Women, Unionism and Loyalism in Northern Ireland** Rachel Ward,2006 Politically active unionist and loyalist women in Northern Ireland are rendered relatively invisible because of the predominantly male public faces of unionism and loyalism This is evident in the media images of the male dominated annual parades by organisations such as the Orange Order statements by mostly male political party spokespersons and the murals of loyalist paramilitaries that designate territorial possession and seldom depict female involvement The book seeks to counter the stereotype that unionist and loyalist women just make the tea The aim of the book is to shed light on the form and extent of unionist and loyalist women s political participation The research conducted shows that unionist and loyalist women are more active political participants than the tea making stereotype suggests they have varied political roles although these are often invisible Whilst exploring the national and other cross cutting identities held by unionist and loyalist women and the motivations behind their political activity the evidence also suggests that the women have been motivated at least in part by their nationalism However this approach does not fully explain the form and extent of respondents political action apparent from a consideration of comparative figures of women and political participation The book concludes that a greater synthesis with the literature on gender and political participation is needed Feminist Periodicals ,2001
 Feminist Bookstore News ,1999
