Making Effective Business Presentations Marcel Dunand,1991 The Storyboard Approach Marcel Dunand,Kerry Choun,1999 **Making Your Business Presentation Effective** ,1987 **Streamlining the Curriculum** Heidi Hayes Jacobs,Allison Zmuda,2023-09-18 A game changing resource for educators looking to elevate their unit and lesson plans increase student engagement and improve home school communication With so many standards to address and templates to fill out curriculum design and lesson planning can be cumbersome and overwhelming And every teacher knows the struggle of trying to cover all the required content which may or may not resonate with their students In *Streamlining the Curriculum* experts Heidi Hayes Jacobs and Allison Zmuda take a hard look at our overburdened dated curricular practices and offer a better way one built on the power of narrative Their storyboard approach casts students as the heroes of the learning journey Instead of passive recipients they become protagonists activity engaged in exploring new ideas solving problems finding connections enlisting allies and acquiring new skills and understandings to apply to both present and future challenges This innovative book teaches you how to Decide what to cut out cut back consolidate and create in your lessons and units Find the throughlines in your required content and approach lesson design and teaching as storytelling no matter what subject area or grade level you teach Apply genre lenses to make courses units and lessons more compelling Communicate clear learning targets to your students and their families Create space for exploring essential questions investigating intriguing ideas and conducting projects that feel relevant and important Determine purposeful and authentic evidence of learning Filled with examples and insights this book shows educators how to break free from the tyranny of templates and start streamlining curriculum assessment and planning to make learning experiences more immersive interesting and emotionally resonant

The Oxford Handbook of Child-Centered Approaches to Migrant Children Zorana Medaric,Mateja Sedmak,2025 The Oxford Handbook of Child Centered Approaches to Migrant Children provides a comprehensive overview of the key issues and debates shaping the child centred approach to migrant children It presents key concepts approaches and methods as well as case studies legal and policy issues In this way the Handbook provides foundational knowledge that can be utilised in further research and practice with migrant children in different contexts The Seven Cs of Consulting Mick Cope,2010-10-05 CLIENT CLARIFY CREATE CHANGE CONFIRM CONTINUE CLOSE THE SEVEN SECRETS OF CONSULTANCY Most change methods are effective For the most part each one is theoretically sound well researched and clearly articulated But when they re put in organizations they fail at least 70 to 80% of the time George Smart Managing Partner Strategic Development Incorporated The definition of a consultant is someone who facilitates organisational change and provides expertise on technical functional and business topics during development or implementation In other words a consultant is someone who helps others to change However change isn t such an easy target to achieve Research shows that the vast majority of change programmes fail On a daily basis we hear about projects that are delayed cancelled over budget

or boycotted by the end user The problem is that we can never force people to change remember the backlash against Jamie Oliver s healthy school meals campaign where parents handed junk food to their children through school fences The key to successful change is to engage with the end user and help them want to change The Seven Cs of Consulting offers a consistent and collaborative language that helps both consultant and client deliver value through sustainable change Based around the author s highly successful 7Cs model Client Clarify Create Change Confirm Continue Close this approach is simple and accessible but firmly grounded in research and real life experience The 7Cs approach opens up the complexity of sustainable change to the consultant and client and helps them explore and then avoid the real issues that cause change to fail within a more professional and trusting relationship

Playing the Waves Jan Simons,2007 Dogma 95 the avant garde filmmaking movement founded by the Danish director Lars von Trier and three of his fellow directors was launched in 1995 at an elite cinema conference in Paris when von Trier was called upon to speak about the future of film but instead showered the audience with pamphlets announcing the new movement and its manifesto A refreshingly original critical commentary on the director and his practice *Playing the Waves* is a paramount addition to one of new media s most provocative genres games and gaming *Playing the Waves* cleverly puns on the title of one of von Trier s most famous features and argues that Dogma 95 like much of the director s low budget realist productions is a game that takes cinema beyond the traditional confines of film aesthetics and dramatic rules Simons articulates the ways in which von Trier redefines the practice of filmmaking as a rule bound activity and stipulates the forms and structures of games von Trier brings to bear on his films as well as the sobering lessons he draws from economic and evolutionary game theory Much like the director s films this fascinating volume takes the traditional point of view of film theory and film aesthetics to the next level and demonstrates we have much to learn from the perspective of game studies and game theory

Rapid Application Prototyping Stephen J. Andriole,1992

Managing Emerging Risk Kevin D. Burton,2017-11-15 From Main Street to Mumbai *Managing Emerging Risk* The Capstone of Preparedness considers the new global drivers behind threats and hazards facing all those tasked with protecting the public and private sector The text delves into the global mindset of public and private sector emergency managers and presents a new risk landscape vastly different from the one existing ten years ago The book begins by presenting a series of fictitious scenarios each resulting in mass destruction and fatalities These are each followed by actual news stories that support the scenarios and demonstrate that the proposed events seemingly unthinkable have the potential to occur Next the author identifies two drivers in the practice of emergency management and general preparedness today that constitute our view of the future and the new face of risk The first is the Disaster Halo Effectthe idea that modern threats exhibit more than one event The second is the worldview of our nation as a Market State focused on the trading of goods services and ideas among the nation states The book also reviews the history of preparedness and discusses its relationship with large scale threats establishing that hindsight bias has hurt our ability to plan and respond to the

unexpected The chapters that follow explore what is needed to better cultivate design develop and operate emerging management and preparedness thinking in the current environment Each chapter begins with key terms and objectives and ends with thought provoking questions Introducing a new paradigm of thought that takes into account the chief influencers of global threats the book arms emergency and business operations managers with the ammo needed to successfully confront emerging threats in the 21st century *Human-Computer Interaction - INTERACT 2009* Tom Gross,Jan Gulliksen,Paula Kotzé,Lars Oestreicher,Philippe Palanque,Raquel Oliveira Prates,Marco Winckler,2009-08-06 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human Computer Interaction This year INTERACT was held in Uppsala Sweden organized by the Swedish Interdisciplinary Interest Group for Human Computer Interaction STIMDI in cooperation with the Department of Information Technology at Uppsala University Like its predecessors INTERACT 2009 highlighted both to the academic and to the industrial world the importance of the human computer interaction HCI area and its most recent breakthroughs on current applications Both experienced HCI researchers and professionals as well as newcomers to the HCI field interested in designing or evaluating interactive software developing new interaction technologies or investigating overarching theories of HCI found in INTERACT 2009 a great forum for communication with people of similar interests to encourage collaboration and to learn INTERACT 2009 had Research and Practice as its special theme The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community Xcode 5 Developer Reference Richard Wentk,2014-05-05 Design code and build amazing apps with Xcode 5 Thanks to Apple's Xcode development environment you can create the next big app for Macs iPhones iPads or iPod touches Xcode 5 contains gigabytes of great stuff to help you develop for both OS X and iOS devices things like sample code utilities companion applications documentation and more Immerse yourself in the heady and lucrative world of Apple app development see how to tame the latest features and functions and find loads of smart tips and guidance with this practical book *Sams Teach Yourself Adobe Premiere Pro in 24 Hours* Jeff Sengstack,2004 Written by an author with solid teaching experience and extensive television production credentials TV anchor reporter photographer and editor plus recipient of a regional Emmy award and other honors this guide reminds readers of the big picture and what they're trying to accomplish Includes tips on shooting high quality video creating professional voice overs and effective editing methods
