The System Of The World

Johann Gottlieb Fichte

The System Of The World:

Thoughts on some important points relating to the system of the world John Pringle NICHOL (Professor of Practical Astronomy in the University of Glasgow.),1848 **The System of Antichrist** Charles Upton,2005 The System of Antichrist examines the present religious and cultural scene from the standpoint of traditional metaphysics and critiques the New Age spiritualities within their postmodern context Its many references to Rene Guenon and Frithjof Schuon also help introduce these important but little known traditionalist thinkers The book presents lore relating to the latter days of the present cycle from the vantage point of comparative religion drawing upon relevant doctrines from Buddhism Hinduism Judaism Christianity Islam Zoroastrianism and the Native American traditions It also speculates upon the social psychic and spiritual nature of that being known to Christianity Judaism and Islam as the Antichrist presenting him as both an individual and a system and warning those willing to be warned against the spiritual seduction and terror he represents and against the regime which will be and is the social expression of that seduction and that terror Finally in tracing the roots of Antichrist in the fallen nature of man the author sketches the particular quality of spirituality proper to apocalyptic times the dangers it faces the unique opportunities open to it And along the way he describes his own course from the spiritual revolution of the 1960s through the world of New Age spiritualities to the threshold of traditional esoterism and metaphysics As he says speaking of the angst that characterizes the modern world The specific medicine for the shock of despair is the deeper shock of meaning Nothing but the weight of eternity breaking through the thin brittle shell of the postmodern sky can set us on our feet The System of the World Pierre Simon marquis de Laplace,1830 **The System of the Sciences According to Objects and Methods** Paul Tillich,1981 Fichte: The System of Ethics Johann Gottlieb Fichte,2005-11-17 Fichte s System of Ethics published in 1798 is at once the most accessible presentation of its author s comprehensive philosophical project The Science of Knowledge or Wissenschaftslehre and the most important work in moral philosophy written between Kant and Hegel Fichte s ethics integrates the discussion of our moral duties into the systematic framework of a transcendental theory of the human subject Its major philosophical themes include the practical nature of self consciousness the relation between reason and volition the essential role of the drives in human willing the possibility of changing the natural world the reality of one s own body the reality of other human beings and the practical necessity of social relations between human beings This volume offers a translation of the work together with an introduction that sets it in its philosophical and historical contexts **The System of Mineralogy of James Dwight Dana, 1837-1868** James Dwight Dana,Edward Salisbury Dana,1892 The System of Animate Nature J.
