The Electric Meme Robert Aunger, 2013-07-30 From biology to culture to the new new economy the buzzword on everyone's lips is meme How do animals learn things How does human culture evolve How does viral marketing work The answer to these disparate questions and even to what is the nature of thought itself is simply the meme For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves But no one has so far been able to define what they are Until now Here for the first time Robert Aunger outlines what a meme physically is how memes originated how they developed and how they have made our brains into their survival systems They are thoughts They are parasites They are in control A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium Memes have found ways to leap from one brain to another A number of them are being replicated in your brain as you read this paragraph In 1976 the biologist Richard Dawkins suggested that all animals including humans are puppets and that genes hold the strings That is we are robots serving as life support for the genes that control us And all they want to do is replicate themselves But then we do lots of things that don't seem to help genes replicate We decide not to have children we waste our time doing dangerous things like mountain climbing or boring things like reading or stupid things like smoking that don't seem to help genes get copied into the next generation We do all sorts of cultural things for reasons that don't seem to have anything to do with genes Fashions in sports books clothes ideas politics lifestyles come and go and give our lives meaning so how can we be gene robots Dawkins recognized that something else was going on We communicate with one another and we get ideas and these ideas seem to have a life of their own Maybe there was something called memes that were like thought genes Maybe our bodies were gene robots and our minds were meme robots That would mean that what we think is not the result of our own creativity but rather the result of the evolutionary flow of memes as they wash through us What is the biological reality of an idea with a

life of its own What is a thought gene It s a meme And no one before Robert Aunger has established what it physically must be This elegant paradigm shifting analysis identifies how memes replicate in our brains how they evolved and how they use artifacts like books and photographs and advertisements to get from one brain to another Destined to inflame arguments about free will open doors to new ways of sharing our thoughts and provide a revolutionary explanation of consciousness The Electric Meme will change the way each of us thinks about our minds our cultures and our daily choices *Differentiated Instructional Strategies* Gayle H. Gregory, Carolyn Chapman, 2012-12-04 Your favorite differentiated instruction text just got better If you re in need of a single resource to put differentiated instruction immediately into practice then follow the lead of 100 000 teachers and look to Gregory and Chapman s ground breaking text Across two editions the book has remained unmatched in its simplicity and practicality The same is just as true with this new edition But with new strategies updates throughout a Common Core lesson planning template and a larger format the third edition is an even richer resource Why has *Differentiated Instructional Strategies* remained such a classroom favorite Its deep research base coupled with immediately useable examples Its start to finish six step process beginning with establishing a classroom climate then getting to know students Its emphasis on formative assessment before during and after learning Its many instructional strategies for using the data gathered Its many models for planning effective differentiated lessons supported by 70 templates tools and questionnaires Whether you re a first time user or longtime fan you ll find everything you need to create a truly brain friendly differentiated classroom *The Commercial Motor* ,1905
