Waking The Frog Solutions For Our Climate Change Paralysis:

Waking the Frog Tom Rand, 2014-04-01 A provocative and compelling look at how we can achieve both economic growth and environmental sustainability Columbus Dispatch A venture capitalist entrepreneur and engineer Tom Rand looks to contemporary psychology economics business and finance to explain our difficulty in confronting one of the most fundamental problems of our time Rand's account doesn't just point fingers at the bad guys but goes deeper to our motivations institutional lethargy and deeply buried assumptions about market economics Waking the Frog reveals that our ingenuity technology capital and policy can work together to turn down the heat and at the same time enable the largest economic opportunity of the twenty first century There are a plethora of books on climate disruption Read this one Waking the Frog has breadth science practice enterprise and vision Paul Hawken author of Blessed Unrest **The Climate Nexus** Robert William Sandford, Jon O'Riordan, 2015 Secure supplies of water food and energy are essential to human dignity and well being around the globe Their vitality is dependent on healthy ecosystems supporting thriving biodiversity All four elements are inter related in that actions to govern one will automatically affect the others known as the Nexus Global demand for the first three elements is increasing due to population growth and rising per capital incomes in developing countries with steadily worsening results for the fourth The Nexus elements are also subject to increasing pressures from climate disruption in the form of more frequent and severe flooding droughts storms pest outbreaks and extreme heat Nature's capacity to moderate these impacts is also being eroded by rapid widespread land use development and associated pollution The combination of increasing demand decreasing supplies and rapidly changing hydro climatic conditions at all points of the Nexus requires transformative policy responses that encompass economy equity social justice fairness and the environment The Climate Nexus outlines these challenges and offers a pathway to resolving them **The Fossil-Fuelled Climate Crisis** Raymond Murphy, 2020-09-29 This book analyses the threat posed by the continued use of fossil fuels By utilizing Elizabeth Shove's social practices approach and Murphy's own social closure framework the book examines the accelerating treadmill of carbon polluting practices It incorporates externalities theory to investigate how the full cost of fossil fuels is paid by others rather than users and to demonstrate that the environmental commons is a medium for conveying intergenerational monopolisation and exclusion in the Anthropocene Murphy uncovers a pattern of opposition to change when exploiting valuable but dangerous resources He argues that a new faith in mastering nature is emerging as a belief in just in time technological solutions to circumvent having to change fossil fuelled practices The book then moves on to assess proposed solutions including Beck's staging of risk and his hypothesis that the anticipation of global catastrophe will incite emancipation It proposes a novel approach to enhancing foresight and avoid incubating disaster It will appeal to readers interested in an original social science analysis of this creeping crisis and its resolution **The Case for Climate Capitalism** Tom Rand, 2020-03-03 A call for the Left and Right the business community and environmentalists bankers and

activists to join together reclaim capitalism and force profits to align with the planet. A warming climate and a general distrust of Wall Street has opened a new cultural divide among those who otherwise agree we must mitigate climate risk. Anti-market critics such as Naomi Klein target capitalism itself as a root cause of climate change while climate savvy business leaders believe we can largely continue with business as usual by tinkering around the edges of our economic system. Rand argues that both sides in this emerging cultural war are ill equipped to provide solutions to the climate crisis and each is remarkably naïve in their view of capitalism. On one hand we cannot possibly transition off fossil fuels without the financial might and entrepreneurial talent market forces alone can unlock. On the other without radical changes to the way markets operate capitalism will take us right off the climate cliff. Rejecting the old Left Right ideologies Rand develops a more pragmatic view capable of delivering practical solutions to this critical problem. A renewed capitalism harnessed to the task is the only way we might replace fossil fuels fast enough to mitigate severe climate risk. If we leave our dogma at the door Rand argues we might just build an economy that survives the century.

Local Activism for Global Climate Justice Patricia E. Perkins, 2019-09-06 This book will inspire and spark grassroots action to address the inequitable impacts of climate change by showing how this can be tackled and the many benefits of doing so. With contributions from climate activists and engaged young authors this volume explores the many ways in which people are proactively working to advance climate justice. The book pays special attention to Canada and the Great Lakes watershed showing how the effects of climate change span local regional and global scales through the impact of extreme weather events such as floods and droughts with related economic and social effects that cross political jurisdictions. Examining examples of local level activism that include organizing for climate resilient and equitable communities the dynamic leadership of Indigenous peoples especially women for water and land protection and diaspora networking. Local Activism for Global Climate Justice also provides theoretical perspectives on how individual action relates to broader social and political processes. Showcasing a diverse range of inspirational and thought provoking case studies this book will be of great interest to students and scholars of climate justice climate change policy climate ethics and global environmental governance as well as teachers and climate activists.

Museums without Borders Robert R. Janes, 2015-12-14 Drawing together nearly 40 years of experience Museums without Borders presents the key works of one of the most respected practitioners and scholars in the field. Through these selected writings Robert R. Janes demonstrates that museums have a broader role to play in society than is conventionally assumed. He approaches the fundamental questions of why museums exist and what they mean in terms of identity community and the future of civil life. This book consists of four Parts: Indigenous Peoples Managing Change Social Responsibility and Activism and Ethics. The Parts are ordered chronologically and each begins with an introduction and an overview of the ensuing articles which situates the papers in their historical and cultural contexts. Using an interdisciplinary approach that combines anthropology ethnography museum studies and management theory Janes both questions and supports mainstream museum practice in a

constructive and self reflective manner offering readers alternative viewpoints on important issues Considering concepts not generally recognized in museum practice such as the Roman leadership model of *primus inter pares* and the Buddhist concept of mindfulness Janes argues that the global museum community must examine how they can meet the needs of the planet and its inhabitants Museums without Borders charts the evolving role of the contemporary museum in the face of environmental societal and ethical challenges and explores issues that have and will continue to shape the museum sector for decades to come This book demonstrates that it is both reasonable and essential to expand the purpose of museums at this point in history not only because of their unique characteristics and value to society but also because of Janes respect and admiration for their rich legacy It is time that museums assist in the creation of a new caring and more conscious future for themselves and their communities This can only be done through authentic engagement with contemporary issues and aspirations

Subterranean Imaginaries and Groundwater Narratives Deborah Wardle, 2023-10-04 This book interrogates the problems of how and why largely unseen matter in this case groundwater has found limited expression in climate fiction It explores key considerations for writing groundwater narratives in the Anthropocene The book investigates a unique selection of climate fiction alongside an exploration of hydrosocial environmental humanities through a focus on groundwater and groundwater narratives Providing eco critical analysis with creative fiction and non fiction excerpts interwoven throughout and drawing on Indigenous Australian and Australian settler novels and poems alongside European American and Japanese texts the book illuminates the processes of storying with subterranean waters their facts uncertainties potencies and vulnerabilities In a time when the water crisis in an Australian and worldwide context is escalating in response to global warming giving voice to the complexities of groundwater extraction and pollution is vital Drawing from non representational posthumanist and feminist perspectives the book provides an important contribution to transnational comparative climate fiction analysis enabling an interdisciplinary exchange between hydrogeological science and the eco humanities This book is an engaging read for scholars and students in creative writing environmental humanities cultural and post colonial studies Australian studies and eco critical literary studies Writers and thinkers addressing the problems of the Anthropocene are called to pay attention to the importance of subterranean imaginaries and groundwater narratives

Artistic Visions of the Anthropocene North Gry Hedin, Ann-Sofie N. Gremaud, 2018-03-09 In the era of the Anthropocene artists and scientists are facing a new paradigm in their attempts to represent nature Seven chapters which focus on art from 1780 to the present that engages with Nordic landscapes argue that a number of artists in this period work in the intersection between art science and media technologies to examine the human impact on these landscapes and question the blurred boundaries between nature and the human Canadian artists such as Lawren Harris and Geronimo Inuit are considered alongside artists from Scandinavia and Iceland such as J C Dahl Eija Liisa Ahtila Toril Johannessen and Bj rk

Landscape into Eco Art Mark Cheetham, 2018-02-14 Dedicated to an articulation of the earth from broadly ecological

perspectives eco art is a vibrant subset of contemporary art that addresses the widespread public concern with rapid climate change and related environmental issues In *Landscape into Eco Art* Mark Cheetham systematically examines connections and divergences between contemporary eco art land art of the 1960s and 1970s and the historical genre of landscape painting Through eight thematic case studies that illuminate what eco art means in practice reception and history Cheetham places the form in a longer and broader art historical context He considers a wide range of media from painting sculpture and photography to artists films video sound work animation and installation and analyzes the work of internationally prominent artists such as Olafur Eliasson Nancy Holt Mark Dion and Robert Smithson In doing so Cheetham reveals eco art to be a dynamic extension of a long tradition of landscape depiction in the West that boldly enters into today s debates on climate science government policy and our collective and individual responsibility to the planet An ambitious intervention into eco criticism and the environmental humanities this volume provides original ways to understand the issues and practices of eco art in the Anthropocene Art historians humanities scholars and lay readers interested in contemporary art and the environment will find Cheetham s work valuable and invigorating

The Theology of The United Church of Canada Don Schweitzer, Robert C. Fennell, Michael Bourgeois, 2019-02-14 The United Church of Canada has a rich and complex history of theological development This volume written for the general reader as well as students and scholars provides a comprehensive overview of that development together with an analysis of this unique denomination s core statements of faith and its contemporary theological landscape When the Methodist Congregational and Local Union Churches in Canada as well as most of the Presbyterians came together as The United Church of Canada the theological commonalities between them were significant Over the succeeding decades this made in Canada denomination has continued to define its convictions through consensus building and large scale studies This volume written by leading scholars outlines key faith perspectives in areas such as creation the Trinity Jesus Christ the Holy Spirit the Bible sin mission and sacraments No book like this has appeared in over seventy years and readers will find insight here that is unparalleled in its scope In creative tension with each individual member s freedom of conscience the United Church as a whole has continued to express its commonly held faith in dialogue continuity and critical interaction with the faith of the worldwide historic Christian community
