Kendall-Tackett, Lesia M. Ruglass, 2017-03-16 *Women's Mental Health Across the Lifespan* examines women's mental health from a developmental perspective looking at key stressors and strengths from adolescence to old age. Chapters focus in detail on specific stressors and challenges that can impact women's mental health such as trauma, addictions, and mood and anxiety disorders. This book also examines racial and ethnic disparities in women's physical and mental health, mental health of sexual minorities, and women with disabilities and women in the military, and includes valuable suggestions for putting knowledge into practice **Depression in Girls and Women Across the Lifespan** Laura H. Choate, 2019-11-26

Depression in Girls and Women Across the Lifespan takes a broad biopsychosocial approach to understanding the onset and experience of depression in women. The book is structured around four major life transitions: depression during puberty and the transition to adolescence; Premenstrual Dysphoric Disorder and a woman's transition through monthly cycles of depression; depression during pregnancy, postpartum, and the transition to motherhood; and depression during perimenopause and the transition to menopause. Integrating cutting edge research with a wealth of case examples and specific evidence-based interventions, the book expands our understanding of depression by taking into account the biological realities, psychological vulnerabilities, life stressors, and gendered cultural messages and expectations that intersect to shape the onset of depression in women's lives. Written in a clear, applicable style, *Depression in Girls and Women Across the Lifespan* enables mental health professionals to provide effective, gender-informed, depression-focused treatments that are tailored to girls and women's unique needs *Women's Reproductive Mental Health in South Asia* Prerna Kukreti, Sujita Kumar Kar, S. M. Yasir Arafat, 2025-10-24

This book will be the first of its kind discussing reproductive psychiatry in South Asia. Reproductive psychiatry encompasses mental health issues surrounding reproductive transitions in different stages of a woman's life. It includes mental and behavioral problems surrounding menstrual cycle, premenstrual and postmenopausal disorders, stress during pregnancy, mental disorders during pregnancy and postpartum, period infertility, loss of pregnancy, sexual health, mother-infant attachment issues, and infant mental health. It is an important but neglected domain in low and middle income countries (LMICs), especially in South Asian countries, and has wide implications on maternal health, child development, family dimensions, and social contribution. It is a cross-disciplinary segment between obstetricians and psychiatrists, demanding a strong liaison. Little is known about the burden and mental health services available for this special population in South Asia.
