Working Bench II Practical Apprentices:

Apprenticeship in Critical Ethnographic Practice Jean Lave, 2011-04-15 In this extended meditation Jean Lave interweaves analysis of the process of apprenticeship among the Vai and Gola tailors of Liberia with reflections on the evolution of her research on those tailors in the late 1970s In so doing she provides both a detailed account of her apprenticeship in the art of sustained fieldwork and an insightful overview of thirty years of changes in the empirical and theoretical facets of ethnographic practice Examining the issues she confronted in her own work Lave shows how the critical questions raised by ethnographic research erode conventional assumptions altering the direction of the work that follows As ethnography takes on increasing significance to an ever widening field of thinkers on topics from education to ecology this erudite but accessible book will be essential to anyone tackling the question of what it means to undertake critical and conceptually challenging fieldwork Apprenticeship in Critical Ethnographic Practice explains how to seriously explore what it means to be human in a complex world and why it is so important *The Social Work Degree Apprenticeship* Clare Stone, Mary Shannon, 2025-02-28 Developed specifically for the social work degree apprenticeship this book guides apprentices through the unique requirements of this new qualifying route With contributions from academics employers and students it provides a broad and inclusive perspective to build effective working relationships The social work degree apprenticeship is unlike any other qualifying route to become a professional social worker Apprentices have to juggling a number of competing demands balancing their work and learning commitments the expectations of their employer and those of their university It can be intense high paced and stressful and very often apprentices are mature students who may not have been in formal learning environment for many years This book has been written specifically with apprentices in mind and by a range of stakeholders not just academics who draw upon their experience and expertise to help apprentices successfully navigate this qualification Key theoretical concepts are introduced throughout practical advice given and learning features encourage reflection and application making this a go to textbook whether it s your first time taking a degree or you re a mature student returning to study this is an essential companion to your learning journey helping you manage your relationship with your university and employer *The Apprenticeship System* Charles Felton Pidgin, 1906 *The American Artisan*, 1916 **American Artisan**, 1916 **Annual Report of the Commissioner of Labor** United States. Bureau of Labor, 1911 **The Jewelers' Circular**, 1923 *Training for Work in the Informal Micro-Enterprise Sector* Hans Christiaan Haan, 2006-10-04 In Sub Sahara Africa the sector of informal micro enterprises IMEs is already employing a large share of the labour force in both urban and rural areas This study reviews the ways in which the owners and workers of IMEs have acquired their vocational and management skills It reviews the contributions of all the different training providers including public sector training institutes private sector training providers and training centres run by NGOs and other non profit organizations The study finds that informal apprenticeship training is by far the most common

source of various skills in some countries it is likely to be responsible for 80-90% of all ongoing training efforts. Informal apprenticeship training presents a number of important advantages. At the same time it has a number of limitations. The study concludes that there is a major challenge to improve the transfer of relevant skills to IME operators both through pre-employment training and skills upgrading. In view of the scope of the challenge to provide hundreds of thousands of IME owners and workers as well as large numbers of out-of-school youths with relevant practical and management skills, it suggests to build upon the strengths of the existing practices of informal apprenticeship training and to remedy its weaknesses by involving professional training providers in upgrading its training organization and delivery quality and efficiency and final training outcomes. It reviews the results of a number of innovative interventions in different African countries that are working in this direction. Finally, the study suggests that there is an interesting potential in business-embedded training provided by private companies as part of their regular business operations.
