Xml Retrieval Mounia Lalmas:

XML Retrieval Mounia Lalmas, 2009 Documents usually have a content and a structure The content refers to the text of the document whereas the structure refers to how a document is logically organized An increasingly common way to encode the structure is through the use of a mark up language Nowadays the most widely used mark up language for representing structure is the eXtensible Mark up Language XML XML can be used to provide a focused access to documents i.e. returning XML elements such as sections and paragraphs instead of whole documents in response to a query Such focused strategies are of particular benefit for information repositories containing long documents or documents covering a wide variety of topics where users are directed to the most relevant content within a document The increased adoption of XML to represent a document structure requires the development of tools to effectively access documents marked up in XML This book provides a detailed description of query languages indexing strategies ranking algorithms presentation scenarios developed to access XML documents Major advances in XML retrieval were seen from 2002 as a result of INEX the Initiative for Evaluation of XML Retrieval INEX also described in this book provided test sets for evaluating XML retrieval effectiveness Many of the developments and results described in this book were investigated within INEX Table of Contents Introduction Basic XML Concepts Historical Perspectives Query Languages Indexing Strategies Ranking Strategies Presentation strategies Evaluating XML Retrieval Effectiveness Conclusions String Processing and Information Retrieval Mariano Consens, Gonzalo Navarro, 2005-10-17 This book constitutes the refereed proceedings of the 12th International Conference on String Processing and Information Retrieval SPIRE 2005 held in Buenos Aires Argentina in November 2005 The 27 revised full papers and 17 revised short papers presented were carefully reviewed and selected from 102 submissions The papers address current issues in all aspects of string processing information retrieval pattern matching computational biology semi structured data and related applications **Flexible Query Answering Systems** Henrik Legind Larsen, 2006-05-30 This book constitutes the refereed proceeding of the 7th International Conference on Flexible Query Answering Systems FQAS 2006 held in Milan Italy in June 2006 The 60 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on flexibility in database management and querying vagueness and uncertainty in XML querying and retrieval information retrieval and filtering multimedia information access user modeling and personalization knowledge and data extraction intelligent information extraction from text and knowledge representation and reasoning **Understanding User-Web Interactions via Web Analytics** Bernard J. Jansen, 2022-06-01 This lecture presents an overview of the Web analytics process with a focus on providing insight and actionable outcomes from collecting and analyzing Internet data The lecture first provides an overview of Web analytics providing in essence a condensed version of the entire lecture The lecture then outlines the theoretical and methodological foundations of Web analytics in order to make obvious the strengths and shortcomings of Web analytics as an approach

These foundational elements include the psychological basis in behaviorism and methodological underpinning of trace data as an empirical method. These foundational elements are illuminated further through a brief history of Web analytics from the original transaction log studies in the 1960s through the information science investigations of library systems to the focus on Websites systems and applications. Following a discussion of on going interaction data within the clickstream created using log files and page tagging for analytics of Website and search logs the lecture then presents a Web analytic process to convert these basic data to meaningful key performance indicators in order to measure likely converts that are tailored to the organizational goals or potential opportunities. Supplementary data collection techniques are addressed including surveys and laboratory studies. The overall goal of this lecture is to provide implementable information and a methodology for understanding Web analytics in order to improve Web systems increase customer satisfaction and target revenue through effective analysis of user Website interactions.

Images in Social Media Susanne Ørnager, Haakon Lund, 2022-06-01 This book focuses on the methodologies organization and communication of digital image collection research that utilizes social media content. Image is here understood as a cultural conventional and commercial stock photo representation. The lecture offers expert views that provide different interpretations of images and their potential implementations. Linguistic and semiotic methodologies as well as eye tracking research are employed to both analyze images and comprehend how humans consider them including which salient features generally attract viewers attention. This literature review covers image specifically photographic research since 2005 when major social media platforms emerged. A citation analysis includes an overview of co citation maps that demonstrate the nexus of image research literature and the journals in which they appear. Eye tracking tests whether scholarly templates focus on the proper features of an image such as people objects time etc and if a prescribed theme affects the eye movements of the observer. The results may point to renewed requirements for building image search engines. As it stands image management already requires new algorithms and a new understanding that involves text recognition and very large database processing. The aim of this book is to present different image research areas and demonstrate the challenges image research faces. The book s scope is by necessity far from comprehensive since the field of digital image research does not cover fake news image manipulation mobile photos etc these issues are very complex and need a publication of their own. This book should primarily be useful for students in library and information science psychology and computer science.

Digital Library Technologies Edward A. Fox, Ricardo da Silva Torres, 2022-06-01 Digital libraries DLs have introduced new technologies as well as leveraging enhancing and integrating related technologies since the early 1990s. These efforts have been enriched through a formal approach e g the

5S Societies Scenarios Spaces Structures Streams framework which is discussed in two earlier volumes in this series This volume should help advance work not only in DLs but also in the WWW and other information systems Drawing upon four Kozevitch Murthy Park Yang completed and three Elsherbiny Farag Srinivasan in process dissertations as well as the efforts of collaborating researchers and scores of related publications presentations tutorials and reports this book should advance the DL field with regard to at least six key technologies By integrating surveys of the state of the art new research connections with formalization case studies and exercises projects this book can serve as a computing or information science textbook It can support studies in cyber security document management hypertext hypermedia IR knowledge management LIS multimedia and machine learning Chapter 1 with a case study on fingerprint collections focuses on complex composite compound objects connecting DL and related work on buckets DCC and OAI ORE Chapter 2 discussing annotations as in hypertext hypermedia emphasizes parts of documents including images as well as text managing superimposed information The SuperIDR system and prototype efforts with Flickr should motivate further development and standardization related to annotation which would benefit all DL and WWW users Chapter 3 on ontologies explains how they help with browsing query expansion focused crawling and classification This chapter connects DLs with the Semantic Web and uses CTRnet as an example Chapter 4 on hierarchical classification leverages LIS theory as well as machine learning and is important for DLs as well as the WWW Chapter 5 on extraction from text covers document segmentation as well as how to construct a database from heterogeneous collections of references from ETDs i e converting strings to canonical forms Chapter 6 surveys the security approaches used in information systems and explains how those approaches can apply to digital libraries which are not fully open Given this rich content those interested in DLs will be able to find solutions to key problems using the right technologies and methods We hope this book will help show how formal approaches can enhance the development of suitable technologies and how they can be better integrated with DLs and other information systems

Knowledge Management (KM) Processes in Organizations Claire McInerney, Michael E.D. Koenig, 2022-06-01 Knowledge Management KM is an effort to increase useful knowledge in the organization It is a natural outgrowth of late twentieth century movements to make organizational management and operations more effective of higher quality and more responsive to constituents in a rapidly changing global environment This document traces the evolution of KM in organizations summarizing the most influential research and literature in the field It also presents an overview of selected common and current practices in knowledge management including the relationship between knowledge management and decision making with the intention of making a case for KM as a series of processes and not necessarily a manipulation of things The final section highlights the use of social networking and commonly adopted Web applications to increase the value of social capital and to connect practitioners with clients and colleagues Table of Contents Introduction Background Bibliographic Analysis Theorizing Knowledge in Organizations Conceptualizing Knowledge Emergence Knowledge Acts Knowledge Management in Practice Knowledge

Management Issues Knowledge Management and Decision Making Social Network Analysis and KM Implications for the Future Conclusion *Digital Libraries Applications* Edward A. Fox, Jonathan P. Leidig, 2022-05-31 Digital libraries DLs have evolved since their launch in 1991 into an important type of information system with widespread application This volume advances that trend further by describing new research and development in the DL field that builds upon the 5S Societies Scenarios Spaces Structures Streams framework which is discussed in three other DL volumes in this series While the 5S framework may be used to describe many types of information systems and is likely to have even broader utility and appeal we focus here on digital libraries Drawing upon six Akbar Kozievitch Leidig Li Murthy Park completed and two Chen Fohu in process dissertations as well as the efforts of collaborating researchers and scores of related publications presentations tutorials and reports this book demonstrates the applicability of 5S in five digital library application areas that also have importance in the context of the WWW Web 2 0 and innovative information systems By integrating surveys of the state of the art new research connections with formalization case studies and exercises projects this book can serve as a textbook for those interested in computing information and or library science Chapter 1 focuses on images explaining how they connect with information retrieval in the context of CBIR systems Chapter 2 gives two case studies of DLs used in education which is one of the most common applications of digital libraries Chapter 3 covers social networks which are at the heart of work on Web 2 0 explaining the construction and use of deduced graphs that can enhance retrieval and recommendation Chapter 4 demonstrates the value of DLs in eScience focusing in particular on cyber infrastructure for simulation Chapter 5 surveys geospatial information in DLs with a case study on geocoding Given this rich content we trust that any interested in digital libraries or in related systems will find this volume to be motivating intellectually satisfying and useful We hope it will help move digital libraries forward into a science as well as a practice We hope it will help build community that will address the needs of the next generation of DLs *The Future of Personal Information Management, Part I* William Jones, 2022-06-01 We are well into a second age of digital information Our information is moving from the desktop to the laptop to the palmtop and up into an amorphous cloud on the Web How can one manage both the challenges and opportunities of this new world of digital information What does the future hold This book provides an important update on the rapidly expanding field of personal information management PIM Part I Always and Forever introduces the essentials of PIM Information is personal for many reasons It s the information on our hard drives we couldn t bear to lose It s the information about us that we don t want to share It s the distracting information demanding our attention even as we try to do something else It s the information we don t know about but need to Through PIM we control personal information We integrate information into our lives in useful ways We make it ours With basics established Part I proceeds to explore a critical interplay between personal information always at hand through mobile devices and forever on the Web How does information stay ours in such a world Part II Building Places of Our Own for Digital Information will be available in the Summer of 2012 and will consist of the

following chapters Chapter 5 Technologies to eliminate PIM We have seen astonishing advances in the technologies of information management in particular to aid in the storing structuring and searching of information These technologies will certainly change the way we do PIM will they eliminate the need for PIM altogether Chapter 6 GIM and the social fabric of PIM We don't and shouldn't manage our information in isolation Group information management GIM especially the kind practiced more informally in households and smaller project teams goes hand in glove with good PIM Chapter 7 PIM by design Methodologies principles questions and considerations as we seek to understand PIM better and to build PIM into our tools techniques and training Chapter 8 To each of us our own Just as we must each be a student of our own practice of PIM we must also be a designer of this practice This concluding chapter looks at tips traps and tradeoffs as we work to build a practice of PIM and places of our own for personal information Table of Contents A New Age of Information The Basics of PIM Our Information Always at Hand Our Information Forever on the Web
