Thompkins,1982 **A FORTRAN Program for Calculating Three Dimensional, Inviscid and Rotational Flows with Shock Waves in Axial Compressor Blade Rows: User's Manual** William T. Jr Thompkins,Massachusetts Institute of Technology. Gas Turbine and Plasma Dynamics Laboratory,1981 A FORTRAN IV computer program has been developed for the calculation of the inviscid transonic supersonic flow field in a fully three dimensional blade passage of an axial compressor rotor or stator Rotors may have dampers part span shrouds MacCormack s explicit time marching method is used to solve the unsteady Euler equations on a finite difference mesh This technique captures shocks and smears them over several grid points Input quantities are blade row geometry operating conditions and thermodynamic quantities Output quantities are three velocity components density and internal energy at each mesh point Other flow quantities are calculated from these variables A short graphics package is included with the code and may be used to display the finite difference grid blade geometry and static pressure contour plots on blade to blade calculation surfaces or blade suction and pressure surfaces Flows in four transonic compressor rotors have been analyzed and compared with exit flow field measurements and intra blade static density measurements obtained with a gas fluorescence technique These comparisons have generally shown that the computed flow fields accurately model the experimentally determined passage shock positions and overall aerodynamic performance The computer code was developed and generally run on a large minicomputer system a Digital Equipment Corporation PDP 11 70 with run times of two to three days The code has also been run on several main frame computers IBM 3033 IBM 360 678 UNIVAC 1110 CDC 7600 and a CRAY 1 Typical run times on an IBM 3033 have been found to be 5 10 hours *Samsung Galaxy Z Flip User Manual* Thomas Cooper,2021-06-29 The Samsung Galaxy Z Flip is the epitome of a revolutionary design to fit perfectly in your hand pocket or purse It is an incredible smartphone in a completely new style The unique shape of the Galaxy Z Flip blends perfectly with a design that s impossible not to notice But to fully enjoy all the features of this wonderful phone you must use it properly And this guide is aimed to help you with that Thomas Cooper has prepared an ultimate user guide to using this phone correctly He has described in detail all of the features that this phone supports So that you will get complete instructions that will be understandable for both children and seniors These full instructions cover such topics as Setting up your phone Navigation explanation Full screen customization Secure ways to lock your phone Camera possibilities Apps installation Internet use Possibilities of unique Samsung features and apps NFC feature Audio enhancement Proper device Maintenance and MUCH MORE This way everyone will be able to adjust customize and fully use this one of a kind phone Do not hesitate place an order to get started
