Process Improvement Andreas Riel, Rory O'Connor, Serge Tichkiewitch, Richard Messnarz, 2010-08-19 A typical characterization of EuroSPI is reflected in a statement made by a company the biggest value of EuroSPI lies in its function as a European knowledge and experience exchange mechanism for SPI and innovation Since its beginning in 1994 in Dublin the EuroSPI initiative has outlined that there is not a single silver bullet to solve SPI issues but that you need to understand a combination of different SPI methods and approaches to achieve concrete benefits The fore each proceedings volume covers a

variety of different topics and at the conference we discuss potential synergies and the combined use of such methods and approaches. These proceedings contain selected research papers for five topics: Section I SPI Tools, Section II SPI Methods, Section III SPI in SMEs, Section IV Economic Aspects of SPI, Section V The Future of SPI. Section I presents studies on SPI tools. The authors provide an insight into new tools which can be used for SPI. Willem Bekkers et al. present a new assessment method and tool for software product management. Ismael Edrei Espinosa Curiel et al. illustrate a graphical approach to support the teaching of SPI. Paul Clarke and coworkers deal with an analysis and a tool to help real adoption of standards like ISO 12207 and they focus on SPI implementation and practices. Esparanca Amengual et al. present a new team-based assessment method and tool. **Conference proceedings. ICT for language learning. 10th Edition** Pixel, 2017-10-23

Recommender System for Improving Customer Loyalty Katarzyna Tarnowska, Zbigniew W. Ras, Lynn Daniel, 2019-03-19. This book presents the Recommender System for Improving Customer Loyalty. New and innovative products have begun appearing from a wide variety of countries which has increased the need to improve the customer experience. When a customer spends hundreds of thousands of dollars on a piece of equipment, keeping it running efficiently is critical to achieving the desired return on investment. Moreover, managers have discovered that delivering a better customer experience pays off in a number of ways. A study of publicly traded companies conducted by Watermark Consulting found that from 2007 to 2013, companies with a better customer service generated a total return to shareholders that was 26 points higher than the S P 500. This is only one of many studies that illustrate the measurable value of providing a better service experience. The Recommender System presented here addresses several important issues: 1. It provides a decision framework to help managers determine which actions are likely to have the greatest impact on the Net Promoter Score. 2. The results are based on multiple clients. The data mining techniques employed in the Recommender System allow users to learn from the experiences of others without sharing proprietary information. This dramatically enhances the power of the system. 3. It supplements traditional text mining options. Text mining can be used to identify the frequency with which topics are mentioned and the sentiment associated with a given topic. The Recommender System allows users to view specific anonymous comments associated with actual customers. Studying these comments can provide highly accurate insights into the steps that can be taken to improve the customer experience. 4. Lastly, the system provides a sensitivity analysis feature. In some cases, certain actions can be more easily implemented than others. The Recommender System allows managers to weigh these actions and determine which ones would have a greater impact. *Linguistics and Language Behavior Abstracts*, 1996
