The Soul At Work From Alienation To Autonomy Semiotexte Or Foreign Agents:

The Soul at Work Franco "Bifo" Berardi, 2009-10-16 An examination of new forms of alienation in our never off plugged in culture and a clarion call for a conspiracy of estranged people We can reach every point in the world but more importantly we can be reached from any point in the world Privacy and its possibilities are abolished Attention is under siege everywhere Not silence but uninterrupted noise not the red desert but a cognitive space overcharged with nervous incentives to act this is the alienation of our times from *The Soul at Work* Capital has managed to overcome the dualism of body and soul by establishing a workforce in which everything we mean by the Soul language creativity affects is mobilized for its own benefit Industrial production put to work bodies muscles and arms Now in the sphere of digital technology and cyberculture exploitation involves the mind language and emotions in order to generate value while our bodies disappear in front of our computer screens In this his newest book Franco Bifo Berardi key member of the Italian Autonomist movement and a close associate of Félix Guattari addresses these new forms of estrangement In the philosophical landscape of the 1960s and 1970s the Hegelian concept of alienation was used to define the harnessing of subjectivity The estrangement of workers from their labor the feeling of alienation they experienced and their refusal to submit to it became the bases for a human community that remained autonomous from capital But today a new condition of alienation has taken root in which workers commonly and voluntarily work overtime the population is tethered to cell phones and Blackberries debt has become a postmodern form of slavery and antidepressants are commonly used to meet the unending pressure of production As a result the conditions for community have run aground and new philosophical categories are needed *The Soul at Work* is a clarion call for a new collective effort to reclaim happiness *The Soul at Work* is Bifo's long overdue introduction to English speaking readers This Semiotexte edition is also the book's first appearance in any language

The Politics of Parametricism Matthew Poole, Manuel Shvartzberg, 2015-10-22 Over the last decade parametricism has been heralded as a new avant garde in the industries of architecture urban design and industrial design regarded by many as the next grand style in the history of architecture heir to postmodernism and deconstruction From buildings to cities the built environment is increasingly addressed designed and constructed using digital software based on parametric scripting platforms which claim to be able to process complex physical and social modelling alike As more and more digital tools are developed into an apparently infinite repertoire of socio technical functions critical questions concerning these cultural and technological shifts are often eclipsed by the seductive aesthetic and the alluring futuristic imaginary that parametric design tools and their architectural products and discourses represent *The Politics of Parametricism* addresses these issues offering a collection of new essays written by leading international thinkers in the fields of digital design architecture theory and technology Exploring the social political ethical and philosophical issues at stake in the history practice and processes of parametric architecture and urbanism each chapter provides different vantage points to interrogate the challenges and opportunities presented by this latest mode of

technological production *The Anomie of the Earth* Federico Luisetti, John Pickles, Wilson Kaiser, 2015-05-29 The contributors to *The Anomie of the Earth* explore the convergences and resonances between Autonomist Marxism and decolonial thinking In discussing and rejecting Carl Schmitt's formulation of the *nomos* a conceptualization of world order based on the Western tenets of law and property the authors question the assumption of universal political subjects and look towards politics of the commons divorced from European notions of sovereignty They contrast European Autonomism with North and South American decolonial and indigenous conceptions of autonomy discuss the legacies of each and examine social movements in the Americas and Europe Beyond orthodox Marxism their transatlantic exchanges point to the emerging categories disclosed by the collapse of the colonial and capitalist frameworks of Western modernity Contributors Joost de Bloois Jodi A Byrd Gustavo Esteva Silvia Federici Wilson Kaiser Mara Kaufman Frans Willem Korsten Federico Luisetti Sandro Mezzadra Walter D Mignolo Benjamin Noys John Pickles Alvaro Reyes Catherine Walsh Gareth Williams Zac Zimmer

'You Don't Know' Jacob A. E. Nielsen, 2025-03-01 People employed at sites of precarious work such as call centres or retail warehouses often live precarious lives Drawing on ethnographic research in a London hostel for precarious workers the book explores the political analytical and practical limitations of using traditional methods of trying to make sense of life in these settings Traditional methods are rooted in practices that emerge from privileged social positions and their enactment is deeply entangled with the processes that create these conditions in the first place This book responds to this by experimenting with precarious methods to enable greater agency to those placed in these precarious situations **Labour Power** Roberto Ciccarelli, 2021-05-04 This book offers a critical account of Karl Marx's dazzling theory of labour power which is also one of the most influential concepts in the history of contemporary philosophy Labour power is the dark side of the digital revolution Working men and women are invisible and treated like human service flesh and blood automatons or organic extensions of a machine that produces data on its own Automation is viewed as something magic made possible by algorithms whose life is independent of human beings Labour power however has not disappeared Without drivers Uber cannot connect customers on its platform without searches on its browser Google grinds to a halt without us Facebook or Instagram is desert Labour power is the dwarf hidden inside the puppet of technology that allows algorithms to be intelligent and make the biggest profits in the history of capitalism The invisible centrality of labour power is the political enigma of our times Today a new account of the theory of labour power is needed more than ever in order to understand the political economy of digital capitalism on new grounds Unlike a long tradition in the history of work labour power is not only the work or the data it produces but a potency that does not coincide with its current commodification The actuality of labour power does not exhaust the virtuality that can be actualised by its faculty Even when reduced to a commodity labour power does not exhaust the potency of its being otherwise Immersed in the constant propaganda that boosts the latest technological inventions we neglect the fact that this wealth is produced by us and that it could be ours precisely because it is a part of our

potential to be other than what we are at present This book is a vibrant invitation to consider the fact that we are always connected with the potency that is constantly at work in our life If this were not the case we would not be alive If we do not strive to become consciously and collectively active we will never know *The Uncertain Image* Ulrik Ekman, Daniela Agostinho, Nanna Bonde Thylstrup, Kristin Veel, 2020-04-28 Citizens of networked societies are almost incessantly accompanied by ecologies of images These ecologies of still and moving images present a paradox of uncertainties emerging along with certainties Images appear more certain as the technical capacities that render them visible increase At the same time images are touched by more uncertainty as their numbers manipulabilities and contingencies multiply With the emergence of big data the image is becoming a dominant vehicle for the construction and presentation of the truth of data Images present themselves as so many promises of the certainty predictability and intelligibility offered by data The focus of this book is twofold It analyses the kinds of images appearing today showing how they are marked by a return to modern photographic emphases on high resolution clarity and realistic representation Secondly it discusses the ways in which the uncertainty of images is increasingly underscored within such reiterated emphases on allegedly certain visual truths This often involves renewed encounters with noise grain glitch blur vagueness and indistinctness This book provides the reader with an intriguing transdisciplinary investigation of the uncertainly certain relation between the cultural imagination and the techno aesthetic regime of big data and ubiquitous computing This book was originally published as a special issue of Digital Creativity
