Nordic Leviathans Lars Erik L. Gjerde, 2025-10-10 This book offers a theoretical synthesis between the Foucauldian theory of power and the Weberian theory of the state The book centres on the politics of COVID 19 in Norway and Sweden It analyses the different tactics strategies and rationalizations of these states to develop the theoretical framework while using the theoretical framework to better advance our understandings of the politics of COVID 19 and how state power worked in subtle and overt direct and indirect ways during this crisis It argues that a marriage between Foucauldian and Weberian theories of the state and power engenders a holistic understanding of how power works at the microlevel and macrolevel This invites scholars to interrogate the diverse sources of power caged within the modern state and how these can be enacted through and over society thereby manifesting as various mechanisms of power

problems and themes associated with his thought that have contemporary significance especially modern globalized capitalism **What Makes a Social Crisis?** Jeffrey C. Alexander, 2019-11-01 In this book Jeffrey Alexander develops a new sociological theory of social crisis and applies it to a wide range of cases from the church paedophilia crisis to the MeToo movement He argues that crises are triggered not by objective social strains but by the discourse and institutions of the civil sphere When strains become subject to the utopian aspirations of the civil sphere there emerges widespread anguish about social justice and the future of democratic life Once admired institutional elites come to be represented as perpetrators and the civil sphere becomes legally and organizationally intrusive demanding repairs in the name of civil purification Resisting such repair institutional elites foment backlash and a war of the spheres ensues This major new work by one of the world's leading social theorists will be of great interest to students and scholars in sociology politics and the social sciences generally

Risto Heiskala, Jari Aro, 2018-01-24 This edited collection addresses a paradox at the heart of the European Union if it is a constantly enlarging empire of governance how can almost thirty member states design policies as an administrative whole whilst narrowly approaching all political issues from one economic point of view The contributors to this collection approach this by studying knowledge production policy formation and policy implementation in the union The topics covered include the history of the union its nature as an empire in the making compared to historical successors as well as current USA and China formation of union level statistical data and policy documents paradoxes of fiscal governance social innovation policy youth and education policy energy policy and foreign policy with particular regard to Russia The concluding chapter outlines five alternative future scenarios for the union extending from collapse and marginalization to the emergence of a federal empire The book is essential reading for anybody interested in the EU including students and scholars across a range of disciplines including sociology political science international relations economics management studies public and social policy science and technology studies and environmental policy **Radicals, Revolutionaries, and Terrorists** Colin J.

Carvalho,2025-10-01 Contesting Austerity compares the contentious responses to austerity in Portugal and Spain between 2008 and 2015 While in Spain a sustained wave of mobilisation lasted for three years and led to a transformation of the party system in Portugal social movements mobilised only in specific instances trade unions dominated protest and institutional change was limited Contesting Austerity shows that trajectories and outcomes in these countries are linked to the nature and configurations of the players in the mobilisation process **Sustainability Science** Per Becker,2023-11-07 Sustainability is

Revisiting Crimes of the Powerful Steven Bittle,Laureen Snider,Steve Tombs,David Whyte,2018-06-13 Frank Pearce was the first scholar to use the term crimes of the powerful His ground breaking book of the same name provided insightful critiques of liberal orthodox criminology particularly in relation to labelling theory and symbolic interactionism while making important contributions to Marxist understandings of the complex relations between crime law and the state in the reproduction of the capitalist social order Historically crimes of the powerful were largely neglected in crime and deviance studies but there is now an important and growing body of work addressing this gap This book brings together leading international scholars to discuss the legacy of Frank Pearce s book and his work in this area demonstrating the invaluable contributions a critical Marxist framework brings to studies of corporate and state crimes nationally internationally and on a global scale This book is neither a hagiography nor a review of random areas of social scientific interest Instead it draws together a collection of scholarly and original articles which draw upon and critically interrogate the continued significance of the approach pioneered in Crimes of the Powerful The book traces the evolution of crimes of the powerful empirically and theoretically since 1976 shows how critical scholars have integrated new theoretical insights derived from post structuralism feminism and critical race studies and offers perspectives on how the crimes of the powerful and the enormous ongoing destruction they cause can be addressed and resisted
