The Street A Quintessential Social Public Space:

The Street Vikas Mehta, 2013 Includes case studies of Massachusetts Ave Cambridge Harvard Street Brookline and Elm Street Somerville Public Space Design and Social Cohesion Patricia Aelbrecht, Quentin Stevens, 2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter **Companion to Public Space** Vikas Mehta, Danilo Palazzo, 2020-05-13 The Companion to Public Space draws together an outstanding multidisciplinary collection of specially commissioned chapters that offer the state of the art in the intellectual discourse scholarship research and principles of understanding in the construction of public space Thematically the volume crosses disciplinary boundaries and traverses territories to address the philosophical political legal planning design and management issues in the social construction of public space The Companion uniquely assembles important voices from diverse fields of philosophy political science geography anthropology sociology urban design and planning architecture art and many more under one cover It addresses the complete ecology of the topic to expose the interrelated issues challenges and opportunities of public space in the twenty first century The book is primarily intended for scholars and graduate students for whom it will provide an invaluable and up to date guide to current thinking across the range of disciplines that converge in the study of public space The Companion will also be of use to practitioners and public officials who deal with the planning design and management of public spaces **Routledge Handbook of Urban Public Space** Karen A. Franck, Te-Sheng Huang, 2023-03-20 Is it truly the end of public space This handbook presents evidence that the answer is no In cities in different parts of the world people still use public space to pursue activities of their choice The book is divided into seven sections The first section presents three emerging types of public space Each of the subsequent five sections focuses on a type of activity recreation commerce protest living and celebration These sections are international in scope presenting cases of activities in Brazil China

Colombia DR Congo Egypt Finland Germany Libya Taiwan Turkey and the U S The closing section composed of three chapters presents research methods for studying public space Graduate students faculty members and researchers in social science architecture landscape architecture geography and urban design will find the book useful for understanding studying and designing urban public space **Placemaking for Green Urban Regeneration** Israa Hanafi Mahmoud,2022-10-19

This book investigates the dynamics and the role of green urban regeneration using nature based solutions NBS in contributing to the cultural aspects of public spaces In the first part of the book insights on analytical methods planning strategies and shared governance examples are given as well as an assessment tool namely public space index PSI is given for successfully measuring sociability impact while using a placemaking approach to green urban regeneration processes In the second part the case study Rose Kennedy Greenway of Boston MA USA has been extensively researched during many years of observations and analysis which gives a realistic taste of the implementation of the proposed PSI The book s last part reflects on PSI to measure its adaptability and replicability in other contexts whereas NBS are playing a major role in physical and spatial green urban regeneration in current cities contexts Fourth Places Patricia Aelbrecht,2022-08-26 This book challenges current views that public life is in decline and that contemporary urban design trends reliant on privatisation control events and thematic designs are to be blamed Drawing on detailed and extensive analysis of a case study that illustrates well such urban design trends it shows that informal social life and interaction occur more than its necessary in new master planned environments and new designed public settings whether public or private owned and or managed Furthermore it reveals the existence of a new category of informal public social settings which it calls fourth places because of their close relationship to Oldenburg s third places in terms of social and behavioural characteristics radical departure from the routines of home and work inclusivity and social comfort but distinct in terms of activities locations and spatial conditions being characterised by spatial temporal and managerial in betweenness i e indeterminacy in form function and times and a great sense of publicness The acceptance of these findings problematises well established urban design theories about master planning expands existing social theories about the optimal conditions for public social life by empirically and spatially elaborating on them and redefines several spatial concepts for designing public space in relation to the specific dynamics of informal social interaction More importantly it brings optimism to urban design practice offering new insights into designing more lively and inclusive public spaces *Street People and the Contested Realms of Public Space* Randall Amster,2004 Amster studies the social and spatial implications of homelessness in America Increasingly commentators have lamented the erosion of public space charting its decline along with the rise of commercialization and privatization A result is the criminalization of homelessness a phenomenon revealed here through participant observations informal conversations and in depth interviews with street people city officials and social service providers Amster explores the interconnections among i the impetus of development and gentrification ii the enactment of anti homeless ordinances and regulations iii the

material and ideological erosion of public space iv emerging forces of resistance to these trends and v the continuing viability of anti systemic movements **The Word On The Street** Kurt Borchard,2005-03 Just beyond Las Vegas s neon and fantasy live thousands of homeless people most of them men To the millions of visitors who come to Las Vegas each year to enjoy its gambling and entertainment the city s homeless people are largely invisible segregated from tourist areas because it s good business Now through candid discussions with homeless men analysis of news reports and years of fieldwork Kurt Borchard reveals the lives and desperation of men without shelter in Las Vegas Borchard s account offers a graphic disturbing and profoundly moving picture of life on Las Vegas s streets depicting the strategies that homeless men employ in order to survive from the search for a safe place to sleep at night to the challenges of finding food maintaining personal hygiene and finding an acceptable place to rest during a long day on the street That such misery and desperation exist in the midst of Las Vegas s hedonistic tourist economy and booming urban development is a cruel irony according to the author and it threatens the city s future as a prime tourist destination The book will be of interest to social workers sociologists anthropologists politicians and all those concerned about changing the misery on the street **The Pedagogical City** Rachel Berney,2008

Lost in Space Randall Amster,2008 Amster explores the historical and contemporary implications of homelessness as a social and spatial problem drawing upon academic disciplines and policy concerns ranging from urban geography to legal advocacy Homeless people find themselves in a struggle to preserve places that are theoretically open to everyone regardless of status Urban spaces in particular manifest a complex ecology comprised of people culture architecture technology and the natural environment expressed through gentrification redevelopment and privatization In this ecology homeless people are criminalized for performing basic activities such as sitting or sleeping These trends are evident across the U S and internationally linking local issues with wider forces of globalization **Social Justice** ,2003 **Deciphering the City** William A. Schwab,2005 Globalization has changed the roles of cities in the global economy the author conveys the need to understand the new order in our world especially in light of the events of 9 11 2001 The knowledge that can be acquired from this book provides readers with a unique benefit knowing about cities allows residents to see the opportunities as well as the risks that arise in them This book allows readers to understand how we cope in today s world and why we live our lives the way we do within our communities This book begins with an introduction to the phenomenon of globalization and how the changes it has brought about have affected the social political and economic institutions of societies in both the more developed and less developed worlds The book s second section concentrates on the psychology of the city and the community building process while its third section illustrates the city s structure and patterns Finally the author concentrates on urban problems and solutions to them An excellent up to date resource for urban sociologists and others who work in the fields of criminology urban planning health housing research and development **Shopping Spaces for People** Sagako Sugiura,2008 *In Search of New Public Domain* Maarten A. Hajer,Arnold Reijndorp,2001 In search of new

public domain is a report of an intensive quest to establish the preconditions for the design of new public spaces On the basis of an analysis of the cultural geography of the network city the authors develop a new perspective of cultural exchange as a typical urban quality They are critical of the laments about the decline of the city and public space as much as of a naive faith in architecture and urbanism as saving graces A critical investigation of the new collective spaces that are popping up across the whole of the urban field offers an insight into the factors that facilitate the development of new public domain Through their clarification of the theoretical background and analysis of topical issues such as public safety and social segregation the authors offer insights and instruments for policy makers and designers who are confronted with the new task of the design of public domain in the network city

Streets Zeynep Çelik,Diane Favro,Richard Ingersoll,1994 This collection of twenty one essays written by colleagues and former students of the architectural historian Spiro Kostof 1936 1991 presents case studies on Kostof s model of urban forms and fabrics The essays are remarkably diverse the range includes pre Columbian Inca settlements fourteenth century Cairo nineteenth century New Orleans and twentieth century Tokyo The theme of the volume is that the street presents itself as the basic structuring device of a city s form and also as the locus of its civilization Each essay is a detailed investigation of a single urban street with unique historical conditions The authors shared concern regarding anthropological political and technical aspects of street making coalesce into a critical discourse on urban space

A Sense for Public Space Brenda F. Berrian,Camilo Herrera,Cristián Samper,Eliot Weinberger,Fernando Savater,Ian Gregory Strachan,Julio Escoto,Maria Grazia Mattei,Michael Chibnik,Patricia Ginton-Meicholas,Rafael Viñoly,Roch Carrier,Salomón Lerner Febres,Wade Davis,William Ospina,2000

Community as Public Culture in Modern India Anne Elizabeth Hardgrove,1999 **The Making of Miami Beach, 1933-1942** Jean-François Lejeune, Lawrence Murray Dixon,Allan T. Shulman,Bass Museum of Art,2000 Yet what makes Miami Beach remarkable is not only the way in which Dixon and his colleagues used Art Deco to meet the local need for lower cost resort architecture but the way in which they adapted the style to incorporate local motifs and historical styles The result is the unique architecture of South Beach as it is now known the largely restored international vacation hotspot and the country s first twentieth century architectural district to be placed on the National Register of Historic Places

Italian Americana ,2004 Democratic Places Through Democratic Means with Participatory Evaluative Action Research (PEAR), a Model of Inquiry for Habits and Habitats where Public Life Matters Annalisa Lewis Raymer,2007 How the lack of public space diminishes our democratic society isn t always apparent to people who ve not experienced a vital pedestrian public realm When we no longer traverse any ground other than commercial private territory in the course of our daily rounds what happens to public life and our sense of people as human beings and citizens The loss of public space the destruction of our civic habitat holds dire consequences for not only the Homo Civitas but also our ability to enact the wide range of humanity s quirky messy erratic gifted ways of being beyond the narrow sliver of those behaviors readily accommodated in environments engineered to increase consumption How can a

society be democratic without places for being persons rather than consumers Overview
