Handbook of the Sociology of Education in the 21st Century Barbara Schneider, 2018-10-10 This handbook unifies access and opportunity two key concepts of sociology of education throughout its 25 chapters It explores today's populations rarely noticed such as undocumented students first generation college students and LGBTQs and emphasizing the intersectionality of gender race ethnicity and social class Sociologists often center their work on the sources and consequences of inequality This handbook while reviewing many of these explanations takes a different approach concentrating instead on what needs to be accomplished to reduce inequality A special section is devoted to new methodological work for studying social systems including network analyses and school and teacher effects Additionally the book explores the changing landscape of higher education institutions their respective populations and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways Written by leading sociologists and rising stars in the field each of the chapters is embedded in theory but contemporary and futuristic in its implications This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them

Trends in the Use of School Choice, 1993 to 1999 Stacey Bielick, Christopher Chapman, 2003 The National Household Education Surveys Program NHES provides a comprehensive set of information that may be used to estimate the use of school choice in the United States In this country school choice is primarily comprised of programs that allow students to attend any public school within or outside of their local school district a magnet or charter school a private school or homeschool This report examines data from three administrations or the NHES 1993 1996 and 1999 in which children's parents were asked if their children attended their assigned public schools public schools that they had chosen private schools that are church related or private schools that are not church related and about their satisfaction and involvement within these schools The report provides information about trends in the use and users of public schools of choice and private schools and outcomes of these choices parent satisfaction and involvement and student plans for postsecondary education The report also provides a brief analysis of homeschooled students This report cannot answer questions about the availability of public school choice or other school choice programs The report shows that

the percentage of children enrolled in public assigned schools for grades 1 through 12 decreased from 80% in 1993 to 76% in 1999 The decrease in public assigned school enrollment was almost completely offset by an increase from 11 to 14% in public chosen school enrollment Enrollment in private church related schools remained relatively stable at 7 to 8% between 1993 and 1999 and enrollment in private not church related schools was about 2% in each year An appendix contains tables of numbers Contains 4 figures 11 tables and 42 references Author SLD

Logics of Socialist Education Tom G.

Griffiths,Zsuzsa Millei,2012-09-14 For some socialism is a potent way of achieving economic political and social transformations in the twenty first century while others find the very term socialism outdated This book engages readers in a discussion about the viability of socialist views on education and identifies the capacity of some socialist ideas to address a range of widely recognized social ills It argues that these pervasive social problems which plague so called developed societies as much as they contribute to the poverty humiliation and lack of prospects in the rest of the world fundamentally challenge us to act In our contemporary world system distancing ourselves from the injustices of others is neither viable nor defensible Rather than waiting for radically new solutions to emerge this book sees the possibility of transformation in the reconfiguration of existing social logics that comprise our modern societies including logics of socialism The book presents case studies that offer a critical examination of education in contemporary socialist contexts as well as reconsidering examples of education under historical socialism In charting these alternatives and retooling past solutions in a nuanced way it sets out compelling evidence that it is possible to think and act in ways that depart from today s dominant educational paradigm It offers contemporary policy makers researchers and practitioners a cogent demonstration of the contemporary utility of educational ideas and solutions associated with socialism A pioneering collection of essays which is central to understanding the historical and contemporary meanings of socialism in the context of neoliberal globalization It is a most timely contribution to a growing intellectual project that challenges the hegemony of capitalism while re thinking and theorizing alternatives Iveta Silova Associate Professor of Comparative Education Lehigh University Bethlehem PA USA In this significant contribution to recent scholarship the authors use the lens of socialist education to offer an original critique of hegemonic capitalism and present an intellectually rigorous search for alternatives by reconsidering historical socialism and advancing promising educational experiments that challenge the global architecture of education Anders Breidlid Professor of International Education and Development Oslo University College Norway

Social Class and Transnational Human Capital Jürgen Gerhards, Hans Silke, Sören Carlson, 2017-06-26 Due to globalization processes foreign language skills knowledge about other countries and intercultural competences have increasingly become important for societies and people's social positions Previous research on social inequality however has dominantly focused on the reproduction of class structures within the boundaries of a particular nation state without considering the importance of these specific skills and competences Within *Social Class and Transnational Human Capital* authors Gerhards Hans and Carlson refer to these skills as transnational human capital and ask to what extent access to this increasingly sought after resource depends on social class Based on Pierre Bourdieu's theory of class they investigate this question via both quantitative and qualitative empirical analyses In doing so the authors focus among other examples on the so called school year abroad i.e. students spending up to a year abroad while attending school a practice which is rather popular in Germany but also quite common in many other countries Thus this insightful volume explores how inequalities in the acquisition of transnational human capital and new forms of social distinction are produced within families depending on their class position and the educational strategies parents pursue when trying to prepare their children for a globalizing world An enlightening title this book will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as sociology social inequality research globalization studies and educational studies
