conference focuses on as they have become new centers of knowledge production in arts and humanities and in the future seem to be able to grow significantly as a major contributor of culture science and arts to the globalized world The book will help shed light on what arts and humanities scholars in Asia and the Pacific have done in terms of research and knowledge development as well as the new frontiers of research that have been explored and opening up which can connect the two regions with the rest of the globe Martin Waldseemüller's 'Carta marina' of 1516 Chet Van Duzer,2019-10-09 This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography Martin Waldseemüller's Carta marina of 1516 By transcribing translating into English and detailing the sources of all of the descriptive texts on the map as well as the sources of many of the images the book makes the map available to scholars in a wholly unprecedented way In addition the book provides revealing insights into how Waldseemüller went about making the map information that can't be found in any other source The Carta marina is the result of Waldseemüller's radical re-evaluation of what a world map should be he essentially started from scratch when he created it rejecting the Ptolemaic model and other sources he had used in creating his 1507 map and added more descriptive texts and a wealth of illustrations Given its content the book offers an essential reference work not only on this map but also for anyone working in sixteenth century European cartography **Reprints in Print-series, 1969** Sam P. Ming-Southeast Asian Overland Interactions, 1368-1644 Laichen Sun, 2000 Over the last fifty years Southeast Asia has been narrowly defined based on its modern political boundaries and when scholars look for external factors affecting Southeast Asian history the maritime approach has dominated This dissertation redresses these problems by defining a zone termed Northern Mainland Southeast Asia encompassing southern Yunnan northeast India and northern parts of mainland Southeast Asia and by focusing on Ming Southeast Asian overland interactions Utilizing a large number of primary sources in Chinese Vietnamese Tai and Burmese it examines the transfer of military technology from Ming China to Southeast Asia Ming China's political expansion overland trade and the migration of Han Chinese into Northern Mainland Southeast Asia It argues that the overland stimuli especially military technology and trade from Ming China contributed to the emergence of Northern Mainland Southeast Asia between the 1430s and 1530s which was epitomized in the rise of the Maw Shans the decisive defeat of Champa by Dai Viet Dai Viet's long march as far as the Irrawaddy River the prosperity and military strength of Lan Na the rise of Mongmit and Mohnyin and the sack of Ava by Mohnyin and the expansion of the Ahoms However after the arrival of European military technology via the maritime route after the early sixteenth century the tables were turned Southern Mainland Southeast Asia as represented by Burma Myanmar started its northward and eastward expansion at the expense of Northern Mainland Southeast Asia Without denying internal dynamics this dissertation demonstrates that the shift of external stimuli in particular military technology changed the orientation of mainland Southeast Asian history and Sino Southeast Asian overland interactions
