 the Roman age the traditional stories of Greek myth had long since ceased to reflect popular culture Mythology had become
 instead a central element in elite culture If one did not know the stories one would not understand most of the allusions in
 the poets and orators classics and contemporaries alike nor would one be able to identify the scenes represented on the
 mosaic floors and wall paintings in your cultivated friends houses or on the silverware on their tables at dinner Mythology
 was no longer imbibed in the nursery nor could it be simply picked up from the often oblique allusions in the classics It had
 to be learned in school as illustrated by the extraordinary amount of elementary mythological information in the many

surviving ancient commentaries on the classics notably Servius who offers a mythical story for almost every person place and even plant Vergil mentions Commentators used the classics as pegs on which to hang stories they thought their students should know A surprisingly large number of mythographic treatises survive from the early empire and many papyrus fragments from lost works prove that they were in common use In addition author Alan Cameron identifies a hitherto unrecognized type of aid to the reading of Greek and Latin classical and classicizing texts what might be called mythographic companions to learned poets such as Aratus Callimachus Vergil and Ovid complete with source references Much of this book is devoted to an analysis of the importance evidently attached to citing classical sources for mythical stories the clearest proof that they were now a part of learned culture So central were these source references that the more unscrupulous faked them sometimes on the grand scale **The Barrasford alphabetical index racing guide, July 1902** Thomas
