The Speculative Turn The Speculative Turn:

The Speculative Turn Levi Bryant, Levi R. Bryant, Nick Srnicek, Graham Harman, 2011 Continental philosophy has entered a new period of ferment The long deconstructionist era was followed with a period dominated by Deleuze which has in turn evolved into a new situation still difficult to define However one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy Among the current giants of this generation this new focus takes numerous different and opposed forms It might be hard to find many shared positions in the writings of Badiou DeLanda Laruelle Latour Stengers and Zizek but what is missing from their positions is an obsession with the critique of written texts All of them elaborate a positive ontology despite the incompatibility of their results Meanwhile the new generation of continental thinkers is pushing these trends still further as seen in currents ranging from transcendental materialism to the London based speculative realism movement to new revivals of Derrida As indicated by the title The Speculative Turn the new currents of continental philosophy depart from the text centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself This anthology assembles authors of several generations and numerous nationalities who will be at the center of debate in continental philosophy for decades to come

After the "Speculative Turn": Realism, Philosophy, and Feminism Katerina Kolozova, Eileen A. Joy, 2016 Recent forms of realism in continental philosophy that are habitually subsumed under the category of speculative realism a denomination referring to rather heterogeneous strands of philosophy bringing together object oriented ontology OOO non standard philosophy or non philosophy the speculative realist ideas of Quentin Meillassoux and Marxism have provided grounds for the much needed critique of culturalism in gender theory and the authority with which post structuralism has dominated feminist theory for decades This publication aims to bring forth some of the feminist debates prompted by the so called speculative turn while demonstrating that there has never been a niche of speculative realist feminism Whereas most of the contributions featured in this collection provide a theoretical approach invoking the necessity of foregrounding new forms of realism for a feminism beyond gender as culture some of the essays tackle OOO only to invite a feminist critical challenge to its paradigm while others refer to some extent to non philosophy or the new materialisms but are not reducible to either of the two We have invited essays from intellectual milieus outside the Anglo Saxon academic center bringing together authors from Serbia Slovenia France Ireland the UK and Canada aiming to promote feminist internationalism rather than a generous act of cultural inclusion CONTENTS Katerina Kolozova Preface After the Speculative Turn Nina Power Philosophy Sexism Emotion Rationalism Katherine Behar The Other Woman Anne Francoise Schmid Libreria pist mologiquement le f minisme Patricia Ticineto Clough Notes for And They Were Dancing Joan Copjec No Foucault Jelisaveta Blagojevic Thinking Without Marina Grzinic Rearticulating the Speculative Turn Frenchy Lunning The Crush The Firey Allure of the Jolted Puppet Nandita Biswas Mellamphy Women out of Time Metis Medea Mahakali Michael O'Rourke Girls

Exceptional Technologies Dominic Smith,2018-08-23 A discussion of the rapidly growing field from a thinker at the forefront of research at the interface of technology and the humanities this is a must read for anyone interested in contemporary developments in Continental philosophy and philosophy of technology Philosophy of technology regularly draws on key thinkers in the Continental tradition including Husserl Heidegger and Foucault Yet because of the problematic legacy of the empirical turn it often criticizes bad continental tendencies lyricism pessimism and an outdated view of technology as an autonomous transcendental force This misconception is based on a faulty image of Continental thought and in addressing it Smith productively redefines our concept of technology By closely engaging key texts and by examining

exceptional technologies such as imagined failed and impossible technologies that fall outside philosophy of technology's current focus this book offers a practical guide to thinking about and using continental philosophy and philosophy of technology It outlines and enacts three key characteristics of philosophy as practiced in the continental tradition close reading of the history of philosophy focus on critique and openness to other disciplinary fields Smith deploys the concept of exceptional technologies to provide a novel way of widening discussion in philosophy of technology navigating the relationship between philosophy of technology and Continental philosophy the history of both these fields the role of imagination in relation to technologies and the social function of technologies themselves Birthing Techno-Sapiens

Robbie Davis-Floyd, 2021-03-31 This ground breaking book challenges us to re think ourselves as techno sapiens a new species we are creating as we continually co evolve ourselves with our technologies While some of its chapters are imaginary they are all empirically grounded in ethnography and richly theorized from diverse disciplines The authors go far beyond a techno optimism vs techno pessimism stance stretching our thinking about birthing techno sapiens to consider not only how our cyborgian reproductive lives are constrained and or enabled by technology but are also about emotions and spirit The world of reproductive health care and particularly that of genetic engineering is developing exponentially and current challenges are vastly different from those of a decade ago The book is provocative intended to generate debate ideas and future research and to influence ethical policy and practice in human techno reproduction It will be of interest across the social sciences and humanities for reproductive scholars bioethicists techno scientists and those involved in the development and delivery of maternity services **What's Wrong with Antitheory?** Jeffrey R. Di Leo, 2019-11-14 Antitheory has long

been a venerable brand of theory and although seemingly opposite the two impulses have long been intertwined Antitheory is the first book to explore this vexed relationship from the 20th century to the present day examining antitheory both in its historical context and its current state The book brings together leading scholars from a wide range of Humanities disciplines to ask such questions as What is antitheory What does it mean to be against theory in the new millennium What is the current state of post theory the alleged deaths of theory and the critique of critique *Restless Subjects in Rigid Systems*

Susanne Wegener, 2014-06-15 The anticipatory logic of speculation and preemptive politics of risk are increasingly gaining significance in a globalizing neoliberal world This study traces risk and speculation as aesthetic and political economic strategies in factual and fictional discourses emerging at the North American Pacific Rim within a decade around 2000 Its exemplary close readings in particular focus on three fictional texts Kathryn Bigelow's Hollywood film *Strange Days* 1995 Karen T Yamashita's novel *Tropic of Orange* 1997 and Larissa Lai's novel *Salt Fish Girl* 2002 whose intricate aesthetics pass perceptive critique on concurrent political economic discourses and their subtle reconfiguration of race class and gender The speculative near future scenarios projected by these artifacts expose the rise of risk as a new rationality of governance At the same time they illustrate neoliberal speculation as a new paradigm of subject formation at a hyper capitalist millennial
