Cosmopsychism and Original Sin Harvey Cawdron, 2025-09-18 Cawdron s book explores the applications of cosmopsychism the idea that the universe is conscious to contemporary discussions of original sin in Christian analytic theology There are two issues in the scholarship of original sin that the book focuses on The first is the transmission issue which explains how original sin is transmitted between humans The second is the apparent tension between original sin and moral responsibility In doctrines that include original guilt where later humans are considered guilty for the first sin one has trouble with moral responsibility because later humans cannot have prevented something that happened before they were born This problem also impacts doctrines that do not include original guilt as one has to explain how people can be guilty for sinful acts if original sin makes the

performance of these acts inevitable Cawdron argues that cosmopsychism can help us resolve both of these issues suggesting that the placing of consciousness at the fundamental level in cosmopsychism and the fact that the cosmic subject must individuate or de combine to form other subjects can provide us with a useful understanding of the transmission of original sin Cawdron also uses cosmopsychism to develop two models of original sin one including the doctrine of original guilt and another that does not to address tensions between the doctrine and moral responsibility **God and the Meanings of Life**

T. J. Mawson, 2016-10-20 Some philosophers have thought that life could only be meaningful if there is no God For Sartre and Nagel for example a God of the traditional classical theistic sort would constrain our powers of self creative autonomy in ways that would severely detract from the meaning of our lives possibly even evacuate our lives of all meaning Some philosophers by contrast have thought that life could only be meaningful if there is a God God and the Meanings of Life is interested in exploring the truth in both these schools of thought seeking to discover what God could and couldn't do to make life meaningful as well as what he would and wouldn't do Mawson espouses a version of the amalgam or pluralism thesis about the issue of life's meaning in essence that there are a number of different legitimate meanings of meaning and indeed life in the question of life's meaning According to Mawson God were he to exist would help make life meaningful in some of these senses and hinder in some others He argues that whilst there could be meaning in a Godless universe there could be other sorts of meaning in a Godly one and that these would be deeper **Radical Business** John A. Davis, 2022-04-19

Businesses are major contributors to the global problems we face but they are also well placed to effect positive change John Davis offers examples of companies that are taking action and presents a framework to help C suite leaders and executive teams develop their own blueprint for putting societal value at the heart of their business **Educational Policy,**

Sensorimotor Psychotherapy Pat Ogden, Janina Fisher, 2015-04-27 A book for clinicians and clients to use together that explains key concepts of body psychotherapy The body's intelligence is largely an untapped resource in psychotherapy yet the story told by the somatic narrative gesture posture prosody facial expressions eye gaze and movement is arguably more significant than the story told by the words The language of the body communicates implicit

meanings and reveals the legacy of trauma and of early or forgotten dynamics with attachment figures To omit the body as a target of therapeutic action is an unfortunate oversight that deprives clients of a vital avenue of self knowledge and change Written for therapists and clients to explore together in therapy this book is a practical guide to the language of the body It begins with a section that orients therapists and clients to the volume and how to use it followed by an overview of the role of the brain and the use of mindfulness The last three sections are organized according to a phase approach to therapy focusing first on developing personal resources particularly somatic ones second on utilizing a bottom up somatic approach to memory and third on exploring the impact of attachment on procedural learning emotional biases and cognitive distortions Each chapter is accompanied by a guide to help therapists apply the chapter s teachings in clinical practice and by worksheets to help clients integrate the material on a personal level The concepts interventions and worksheets introduced in this book are designed as an adjunct to and in support of other methods of treatment rather than as a stand alone treatment or manualized approach By drawing on the therapeutic relationship and adjusting interventions to the particular needs of each client thoughtful attention to what is being spoken beneath the words through the body can heighten the intimacy of the therapist client journey and help change take place more easily in the hidden recesses of the self
