Wild Apples and Other Natural History Essays Henry D. Thoreau,2010-04-15 This volume of seven essays and a late lecture by Henry David Thoreau makes available important material written both before and after Walden First appearing in the 1840s through the 1860s the essays were written during a time of great change in Thoreau's environs as the Massachusetts of his childhood

became increasingly urbanized and industrialized William Rossi's introduction puts the essays in the context of Thoreau's other major works both chronologically and intellectually Rossi also shows how these writings relate to Thoreau's life and career as both writer and naturalist his readings of Ralph Waldo Emerson and Charles Darwin his failed bid for commercial acceptance of his work and his pivotal encounter with the utter wildness of the Maine woods In the essays themselves readers will see how Thoreau melded conventions of natural history writing with elements of two popular literary forms travel writing and landscape writing to explore concerns ranging from America's westward expansion to the figural dimensions of scientific facts and phenomena Thoreau the thinker observer wanderer and inquiring naturalist all emerge in this distinctive composite picture of the economic natural and spiritual communities that left their marks on one of our most important early environmentalists *Thoreau and the Language of Trees* Richard Higgins, 2017-04-04 Trees were central to Henry David Thoreau's creativity as a writer his work as a naturalist his thought and his inner life His portraits of them were so perfect it was as if he could see the sap flowing beneath their bark When Thoreau wrote that the poet loves the pine tree as his own shadow in the air he was speaking about himself In short he spoke their language In this original book Richard Higgins explores Thoreau's deep connections to trees his keen perception of them the joy they gave him the poetry he saw in them his philosophical view of them and how they fed his soul His lively essays show that trees were a thread connecting all parts of Thoreau's being heart mind and spirit Included are one hundred excerpts from Thoreau's writings about trees paired with over sixty of the author's photographs Thoreau's words are as vivid now as they were in 1890 when an English naturalist wrote that he was unusually able to to preserve the flashing forest colors in unfading light Thoreau and the Language of Trees shows that Thoreau with uncanny foresight believed trees were essential to the preservation of the world
