Aspects of Computational Intelligence: Theory and Applications Ladislav Madarász, Jozef Živčák, 2012-08-11 This volume covers the state of the art of the research and development in various aspects of computational intelligence and gives some perspective directions of development Except the traditional engineering areas that contain theoretical knowledge applications designs and projects the book includes the area of use of computational intelligence in biomedical engineering Aspects of Computational Intelligence Theory and Applications is a compilation of carefully selected extended papers written on the basis of original contributions presented at the 15th IEEE International Conference on Intelligence Engineering Systems 2011 INES 2011 held at June 23 26 2011 in AquaCity Poprad Slovakia *Computer Networks* Andrzej Kwiecien, Piotr Gaj, Piotr Stera, 2009-06-07 The continuous and very intense development of IT has resulted in the fast development of computer networks Computer networks as well as the entire field of IT are subject to constant change triggered by the general technological advancement and the influence of new IT technologies These methods and tools of designing and modeling computer networks are becoming more advanced Above all the scope of their application is growing thanks to for example the results of new research and because of new proposals of application which not long ago were not even taken into consideration These new applications stimulate the development of scientific research as the broader application of system solutions based on computer networks results in a wide range of both theoretical and practical problems This book proves that and the contents of its chapters concern a variety of topics and issues Generally speaking the contents can be divided into several subject groups The first group of contributions concerns new technologies applied in computer networks particularly those related to nano molecular and quantum technology **Advances in Emerging Trends and Technologies** Miguel Botto-Tobar, Omar S. Gómez, Raúl Rosero Miranda, Angela Díaz Cadena, 2020-12-18 This book constitutes the proceedings of the 2nd International Conference on Advances in Emerging Trends and Technologies ICAETT 2020 held in Riobamba Ecuador on 26 30 October 2019 proudly organized by Facultad de Informática y Electrónica FIE at Escuela Superior Politécnica de Chimborazo and supported by GDEON ICAETT 2020 brings together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations Presenting high quality peer reviewed papers the book discusses the following topics Communication e Government and e Participation e Learning Electronic Intelligent Systems Machine Vision Security Technology Trends Fourth International Symposium on Recycling of Metals and Engineered Materials Donald L. Stewart, Jr., James C. Daley, Robert L. Stephens, 2013-09-12 This proceedings collection continues the tradition established by earlier TMS Recycling Meetings in this series by presenting fundamental and practical aspects of recycling metals and engineered materials **Programmable Devices and Systems (PDS 2000)** Vilém Srovnal, K. Vlček, 2000 Paperback The IFAC Workshop on Programmable Devices and Systems PDS started in the middle of the nineties in Poland The organisers believe

that in the area of programmable devices and systems there are some problems specific to them which sufficiently justifies the decision to organise the PDS 2000 IFAC Workshop The Workshop s main objective is to provide a forum to present the latest research results and experiences in the area of the design and application of programmable devices and systems and a forum to discuss the current status and future trends of this particular branch of the programmable devices in measurement control and computer science

Focused Genograms Rita DeMaria, Gerald R. Weeks, Larry Hof, 2013-06-17 The interpersonal relationships that make up family life are a complex web between many individuals spanning several generations at one time This web is further complicated by the influence of other factors such as culture and gender It can be a daunting task for a therapist to unravel this tangle and understand the specific dynamics and individual development within the family The Multifocused Family Genogram MFG is a powerful tool that allows the therapist

to record and structure these different elements that make up the family system By combining the Basic Genogram the Family Map and several Focused Genograms the MFG provides a clear picture of dynamic family history that aids in individual and family assessment Focused Genograms provides a thorough account of the use of MFGs in family therapy and practice The authors present a clinically useful method for collecting the information in key areas of individual and family functioning needed to create Focused Genograms In addition the authors carefully explain the diagnostic use and therapeutic applications of this tool The book is supplemented by extensive examples of Focused Genograms Family Maps and Time Lines used in MFG construction Suggested readings listed at the close of each chapter provide links between techniques fully described in the book and other therapeutic techniques beyond the scope of this work A thorough presentation of innovative methods for using Focused Genograms makes this an important text for students of marriage and family therapy as well as an indispensable resource for professionals KfK ,1993
