Working Together Collective Action The Commons And Multiple Methods In Practice:

Working Together Amy Poteete, Marco A. Janssen, Elinor Ostrom, 2010-04-12 Advances in the social sciences have emerged through a variety of research methods field based research laboratory and field experiments and agent based models However which research method or approach is best suited to a particular inquiry is frequently debated and discussed Working Together examines how different methods have promoted various theoretical developments related to collective action and the commons and demonstrates the importance of cross fertilization involving multimethod research across traditional boundaries The authors look at why cross fertilization is difficult to achieve and they show ways to overcome these challenges through collaboration The authors provide numerous examples of collaborative multimethod research related to collective action and the commons They examine the pros and cons of case studies meta analyses large N field research experiments and modeling and empirically grounded agent based models and they consider how these methods contribute to research on collective action for the management of natural resources Using their findings the authors outline a revised theory of collective action that includes three elements individual decision making microsituational conditions and features of the broader social ecological context Acknowledging the academic incentives that influence and constrain how research is conducted Working Together reworks the theory of collective action and offers practical solutions for researchers and students across a spectrum of disciplines

Elinor Ostrom and the Bloomington School of Political Economy

Daniel H. Cole, Michael D. McGinnis, 2014-12-24 Elinor Lin Ostrom was awarded the 2009 Nobel Memorial Prize in Economic Sciences for her pathbreaking research on economic governance especially the commons but she also made important contributions to several other fields of political economy and public policy The range of topics she covered and the multiple methods she used might convey the mistaken impression that her body of work is disjointed and incoherent This four volume compendium of papers written by Lin alone or with various coauthors most notably including her husband and partner Vincent supplemented by others expanding on their work brings together the common strands of research that serve to tie her impressive oeuvre together That oeuvre together with Vincent's own impressive body of work has come to define a distinctive school of political economic thought the Bloomington School Each of the four volumes is organized around a central theme of Lin's work Volume 1 explores the roles played by the concept polycentricity in the disciplines of public administration political science and other forms of political economy Polycentricity denotes a complex system of governance in which public authorities citizens and private organizations work together to establish and enforce the rules that guide their behavior It encapsulates an approach toward policy analysis that blurs standard disciplinary boundaries between the social sciences Throughout their long and remarkably productive careers Elinor and Vincent Ostrom never tired of reminding us of the capacity of ordinary humans to transcend their own limitations by engaging with others in the myriad forms of collective action required to build and sustain a self governing society Their careers stand as exemplars of the proper

relationship between rigorous scholarship and responsible citizenship , *Routledge Handbook of the Study of the Commons* Blake Hudson,Jonathan Rosenbloom,Dan Cole,2019-01-04 The commons has come to mean many things to many people and the term is often used inconsistently The study of the commons has expanded dramatically since Garrett Hardin s *The Tragedy of the Commons* 1968 popularized the dilemma faced by users of common pool resources This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems *The Oxford Handbook of Law, Regulation and Technology* Roger Brownsword,Eloise Scotford,Karen Yeung,2017-07-25 The variety pace and power of technological innovations that have emerged in the 21st Century have been breathtaking These technological developments which include advances in networked information and communications biotechnology neurotechnology nanotechnology robotics and environmental engineering technology have raised a number of vital and complex questions Although these technologies have the potential to generate positive transformation and help address grand societal challenges the novelty associated with technological innovation has also been accompanied by anxieties about their risks and destabilizing effects Is there a potential harm to human health or the environment What are the ethical implications Do this innovations erode of antagonize values such as human dignity privacy democracy or other norms underpinning existing bodies of law and regulation These technological developments have therefore spawned a nascent but growing body of law and technology scholarship broadly concerned with exploring the legal social and ethical dimensions of technological innovation This handbook collates the many and varied strands of this scholarship focusing broadly across a range of new and emerging technology and a vast array of social and policy sectors through which leading scholars in the field interrogate the interfaces between law emerging technology and regulation Structured in five parts the handbook I establishes the collection of essays within existing scholarship concerned with law and technology as well as regulatory governance II explores the relationship between technology development by focusing on core concepts and values which technological developments implicate III studies the challenges for law in

responding to the emergence of new technologies examining how legal norms doctrine and institutions have been shaped challenged and destabilized by technology and even how technologies have been shaped by legal regimes IV provides a critical exploration of the implications of technological innovation examining the ways in which technological innovation has generated challenges for regulators in the governance of technological development and the implications of employing new technologies as an instrument of regulatory governance V explores various interfaces between law regulatory governance and new technologies across a range of key social domains

Peri-urban Water and Sanitation Services Mathew Kurian, Patricia McCarney, 2010-08-17 More than 2.6 billion people in the developing world lack access to safe water and sanitation service The Millennium Development Goal's MDG target is to halve the number of people without access to a sustainable source of water supply and connection to a sewer network by 2015 That target is unlikely to be met If there is anything that can be learnt from European experience it is that institutional reform occurs incrementally when politically enfranchised urban populations perceive a threat to their material well being due to contamination of water sources

The Governance of Urban Green Spaces in the EU Judith Schicklinski, 2017-04-28 Across European cities the use of urban space is controversial and subject to diverging interests On the one hand citizens are increasingly aware of the necessity for self organising to reclaim green spaces On the other hand local authorities have started to involve citizens in the governance of urban green spaces While an increased level of citizen participation and conducive conditions for citizens self organisation are a desirable development per se the risk of functionalising civil society actors by the local authority for neoliberal city

development must be kept in mind Drawing on qualitative and quantitative data collected in 29 European cities from all four European geographic regions this book examines the governance of urban green spaces and urban food production focusing on the contribution of citizen driven activities Over the course of the book Schicklinski identifies best practice examples of successful collaboration between citizens and local government The book concludes with policy recommendations with great practical value for local governance in European cities in times of the growth turn This book will be of great relevance to students scholars and policy makers with an interest in environmental governance urban geography and sustainable development
