Things Without A Name:

Things Without A Name Joanne Fedler, 2011 Love stories Large Print This is a beautifully written big hearted love story that will resonate with any woman who has thought about giving up on love and hope but chooses not to At 34 Faith Roberts isn't so different from most women her age Okay so her cleavage is rather disappointing and she's still single but she has a busy job the usual dysfunctional family and clinically depressed best friend Practically normal then Faith used to think about falling in love but that was a long time ago As a counsellor in a women's crisis centre she's heard one too many love gone wrong stories so it's hard for her not to give up on the big things like love hope and trust let alone the chance of getting a decent haircut or meeting a halfway normal bloke Then one night a twist of fate finds Faith in a situation that transforms her life bringing her to finally understand what she has always needed to know that before you can save others you have to save yourself THINGS WITHOUT A NAME. title does not treat philosophy as an abstract theoretical discipline but as living experience **An Historical Introduction to the Philosophy of Mathematics: A Reader** Russell Marcus, Mark McEvoy, 2016-02-11 A comprehensive collection of historical readings in the philosophy of mathematics and a selection of influential contemporary work this much needed introduction reveals the rich history of the subject An Historical Introduction to the Philosophy of Mathematics A Reader brings together an impressive collection of primary sources from ancient and modern philosophy Arranged chronologically and featuring introductory overviews explaining technical terms this accessible reader is easy to follow and unrivaled in its historical scope With selections from key thinkers such as Plato Aristotle Descartes Hume and Kant it connects the major ideas of the ancients with contemporary thinkers A selection of recent texts from philosophers including Quine Putnam Field and Maddy offering insights into the current state of the discipline clearly illustrates the development of the subject Presenting historical background essential to understanding contemporary trends and a survey of recent work An Historical Introduction to the Philosophy of Mathematics A Reader is required reading for undergraduates and graduate students studying the philosophy of mathematics and an invaluable source book for working researchers *The Dialectical Method of Nagarjuna* Kamaleswar Bhattacharya, 1978-01-01 Though only a minor work in form regards its contexts the Vignahavyavartani is a fundamental text of Madhyamaka as well as of the early Indian dialectical tradition Not only does it admirably illustrate the dialectical method followed by Nagarjuna the founder of the school but it also clarifies the idea of Voidness which has been so often misunderstood not only in modern times and abroad but in India itself and in Nagarjuna's own time Long lost in India this text was fortunately discovered by Rahula Sankrityayana in a Tibetan monastery Report Illinois Farmers' Institute, 1907 *The Problem of Two Truths in Buddhism and Vedānta* G.M.C. Sprung, 2012-12-06 It would be a bulky and intricate volume indeed that treated adequately of the problem of two truths in Buddhism and Vedānta the present volume is slim and unpretentious Not the less incisive for that it is hoped but certainly neither systematic nor complete and this in several senses Not all schools of Buddhism are dealt with Theravada Indian Yogacara and the Logicians are missing among the Indian schools and there is no reference to Chinese and Japanese Buddhism The Vedānta discussed is only Advaita non dualist and that virtually limited to Sankara Nor does the volume as a whole take up the problem of two truths thematically though each paper raises the philosophical questions its author thinks appropriate The title The Problem of Two Truths in Buddhism and Vedānta promises more than the book itself contains The reason for this is given in the prefatory Note each chapter is a paper read and discussed at a working conference All the papers from the conference are here published and no others The book has thus the contours dictated by the availability of scholars at the time of the conference *Sullivan's School Series* Sullivan, Brothers, 1905 The Metaphysics of Philosophical Daoism Kai Zheng, 2020-11-09 Drawing on evidence from a wide range of classical Chinese texts this book argues that xing'er shang xue the study of beyond form constitutes the core argument and intellectual foundation of Daoist philosophy The author presents

Daoist xingershangxue as a typical concept of metaphysics distinct from that of the natural philosophy and metaphysics of ancient Greece since it focusses on understanding the world beyond perceivable objects and phenomena as well as names that are definable in their social political or moral structures In comparison with other philosophical traditions in the East and West the book discusses the ideas of dao de and spontaneously self so which shows Daoist xingershangxue s theoretical tendency to transcendence The author explains the differences between Daoist philosophy and ancient Greek philosophy and proposes that Daoist philosophy is the study of xingershangxue in nature providing a valuable resource for scholars interested in Chinese philosophy Daoism and comparative philosophy **Gift of Language** Alexander García

Düttmann,2000-01-01 This text focuses on the relevance of the proper name in the conceptions of language and history that inform the thought of Adorno Benjamin Heidegger and Rosenzweig Their interest in the proper name is because it does not simply operate as a conventional linguistic sign A specific experience of the Jewish religious tradition Adorno Benjamin Rosenzweig and a vision of poetry resulting from the reading of Hoelderlin Heidegger lead to the idea of an absolute singularity it is a singularity that resists all conceptual identificaiton and the proper name expresses this singularity in language In this analysis history is conceived as a movement that both betrays and tends towards the absolute singularity that manifests itself in the unsayable i e in the name of God or in poetical language questions of gesture translation and melancholia and the moment of apparition in the work of art are comprehensible within Dr Duttmann s discussion which should be of interest to students of language philosophy and theology *The Works of Thomas Reid ...
