Thinking With Animals New Perspectives On Anthropomorphism:

Thinking with Animals Lorraine Daston, Gregg Mitman, 2005-02-02 Is anthropomorphism a scientific sin Scientists and animal researchers routinely warn against animal stories and contrast rigorous explanations and observation to facile and even fanciful projections about animals Yet many of us scientists and researchers included continue to see animals as humans and humans as animals As this innovative new collection demonstrates humans use animals to transcend the confines of self and species they also enlist them to symbolize dramatize and illuminate aspects of humans experience and fantasy Humans merge with animals in stories films philosophical speculations and scientific treatises In their performance with humans on many stages and in different ways animals move us to think From Victorian vivisectionists to elephant conservation from ancient Indian mythology to pet ownership in the contemporary United States our understanding of both animals and what it means to be human has been shaped by anthropomorphic thinking The contributors to *Thinking with Animals* explore the how and why of anthropomorphism drawing attention to its rich and varied uses Prominent scholars in the fields of anthropology ethology history and philosophy as well as filmmakers and photographers take a closer look at how deeply and broadly ways of imagining animals have transformed humans and animals alike Essays in the book investigate the changing patterns of anthropomorphism across different time periods and settings as well as their transformative effects both figuratively and literally upon animals humans and their interactions Examining how anthropomorphic thinking works in a range of different contexts contributors reveal the ways in which anthropomorphism turns out to be remarkably useful it can promote good health and spirits enlist support in political causes sell products across boundaries of culture of and nationality crystallize and strengthen social values and hold up a philosophical mirror to the human predicament *Thinking Animals* Kari Weil, 2012 Kari Weil provides a critical introduction to the field of animal studies as well as an appreciation of its thrilling acts of destabilization Examining real and imagined confrontations between human and nonhuman animals she charts the presumed lines of difference between human beings and other species and the personal ethical and political implications of those boundaries Weil's considerations recast the work of such authors as Kafka Mann Woolf and Coetzee and such philosophers as Nietzsche Heidegger Derrida Deleuze Agamben Cixous and Hearne while incorporating the aesthetic perspectives of such visual artists as Bill Viola Frank Noelker and Sam Taylor Wood and the visual thinking of the autistic animal scientist Temple Grandin She addresses theories of pet keeping and domestication the importance of animal agency the intersection of animal studies disability studies and ethics and the role of gender shame love and grief in shaping our attitudes toward animals Exposing humanism's conception of the human as a biased illusion and embracing posthumanism's acceptance of human and animal entanglement Weil unseats the comfortable assumptions of humanist thought and its species specific distinctions *Cosmopolitanism and the Literary Imagination* C. Patell, 2015-02-19 Through contemporary theories of cosmopolitanism and analyses of literary texts such as *Heart of Darkness* *Lilith's Brood* and *Moby Dick* this book

explores the cosmopolitan impulses behind the literary imagination Patell argues that cosmopolitanism regards human difference as an opportunity to be embraced rather than a problem to be solved [Making Our Beasts](#) Elana Shever,2025-12-30 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more *Making Our Beasts* is an ethnography of science in action that uses a familiar topic dinosaurs to lead readers to understand science and its objects in new ways Through fieldwork and interviews conducted at laboratories dig sites museums and entertainment sites Elana Shever explores vertebrate paleontology in the United States showing how the practices of scientists and the materiality of fossils together shape the social world and also are shaped by it Foregrounding elements of scientific inquiry that have been sidelined including affect touch material agency and the labor of volunteers technicians and other nonscientists Shever reveals how paleontology continues to be structured by race gender and colonialism *The Nonhuman in American Literary Naturalism* Karin M. Danielsson,Kenneth K. Brandt,2023-09-05 *The Nonhuman in American Literary Naturalism* responds to a need to expand and refine the connections among nonhuman studies and American literary naturalism and to productively expand the scholarly discourse surrounding this vital movement in American literary history This collection focuses on that which becomes visible when the human subject is skirted or moved off center in other words the representation of nonhuman animals and other vital or inert species things entities cityscapes and seascapes that play an important part in American literary naturalism Informed by animal studies ecocriticism posthumanism new materialism and other recent theoretical perspectives the essays in this collection discuss early naturalist texts as well as more recent naturalistic oriented authors **Ethical Materialities in Art and Moving Images** Silke Panse,2024-12-26 Starting from the premise that after modernism and postmodernism in the Anthropocene an artwork cannot rest upon its separation from the planet this volume develops new ethical practice and thought with respect to art philosophy and moving images Practitioners and theorists examine how the relations between the ethical and the material figure in a context in which a dearth of ethical practice and thought has caused the materialities of the Anthropocene and the climate catastrophe Ethics are generally regarded as constituted through immaterial relations guided by moral imperatives By contrast this volume argues that the singular ethicalities that are manifested in a work cannot be captured by abstract ethics The explorations of the ethical here are not prescriptive but creative Through artistic and philosophical thought and practice the contributions move beyond the division between an active practice of ethics and a contemplative theory of aesthetics They ask what ethicalities and materialities are at play in the relations between the artist the art their worlds and the planet after new materialism and posthumanism Rather than transcending the ethical through the material or the material through the ethical the contributions articulate the singular relations between them and consider the inter and intra active ethical and material relations of art and images in biodiverse environments They suggest that to bring out the ethical dimensions of the material and the material dimension of the ethical without identifying one with the

other is a responsibility of art and images **Disaster in the Early Modern World** Ovanes Akopyan, David Rosenthal, 2023-11-17 How did early modern societies think about disasters such as earthquakes or floods How did they represent disaster and how did they intervene to mitigate its destructive effects This collection showcases the breadth of new work on the period ca 1300 1750 Covering topics that range from new thinking about risk and securitisation to the protection of dikes from shipworm and with a geography that extends from Europe to Spanish America the volume places early modern disaster studies squarely at the intersection of intellectual cultural and socio economic history This period witnessed fresh speculation on nature the diffusion of disaster narratives and imagery and unprecedented attempts to control the physical world The book will be essential to specialists and students of environmental history and disaster as well as general readers who seek to discover how pre industrial societies addressed some of the same foundational issues we grapple with today

All Thoughts Are Equal John Ó Maoilearca, 2015-09-15 *All Thoughts Are Equal* is both an introduction to the work of French philosopher François Laruelle and an exercise in nonhuman thinking For Laruelle standard forms of philosophy continue to dominate our models of what counts as exemplary thought and knowledge By contrast what Laruelle calls his non standard approach attempts to bring democracy into thought because all forms of thinking including the nonhuman are equal John Maoilearca examines how philosophy might appear when viewed

with non philosophical and nonhuman eyes He does so by refusing to explain Laruelle through orthodox philosophy opting instead to follow the structure of a film Lars von Trier s documentary The Five Obstructions as an example of the non standard method Von Trier s film is a meditation on the creative limits set by film both technologically and aesthetically and how these limits can push our experience of film and of ourselves beyond what is normally deemed the perfect human All Thoughts Are Equal adopts film s constraints in its own experiment by showing how Laruelle s radically new style of philosophy is best presented through our most nonhuman form of thought that found in cinema The Page is Printed Carrie Smith,2021 This book chronicles the major untold story of Ted Hughes s poetic development by exploring the drafts typescripts source reading letters additions and deletions that form his poetic palimpsests In the process it offers a template for new approaches in authorship studies reframing one of the twentieth century s most iconic literary figures through the unseen histories of his creative processes *Conversations with the Animate 'Other'* Aloka Parasher-Sen,2023-09-30 Human interventions with living entities have had to be in a constant state of negotiating space necessary for co habitation with animals birds trees plants grasslands forests hills water bodies in the creation of villages and other settlements The book argues that negotiating this space meant sharing which impacted economic strategies religious experiences cultural interactions and oral performances that humans have strategized and preserved This intersectional theme through individual case studies ultimately provides us the civilizational ethos of the Indian sub continent on how human non human relations informed it The book provides a window on how this relationship was represented in a variety of material and literary texts visual representations archival records folklore and oral testimonies It brings to the fore these narratives over the longue dur e to explicate the complex and delicate relationships in region specific ecological settings and thus give readers a perspective that crosses disciplinary and conceptual boundaries *Environment, Media, and Popular Culture in Southeast Asia* Jason Paolo Telles,John Charles Ryan,Jeconiah Louis Dreisbach,2022-05-30 This book addresses the increasingly important subject of ecomedia by critically examining the interconnections between environment ecology media forms and popular culture in the Southeast Asian region exploring methods such as textual analysis thematic analysis content analysis participatory ethnography auto ethnography and semi structured interviewing It is divided into four sections I Activism Environment and Indigeneity II Political Ecologies and Urban Spaces III Narratives Discourses and Aesthetics and IV Imperialism Nationalism and Islands covering topics such as broadcast media radio and TV and the environment green cinema and ecodocumentaries ecodigital art digital environmental literature It is of great interest to researchers students practitioners and scholars working in the area of humanities media communications cultural studies environmental humanities environmental studies and sustainability Elephant Tourism in Nepal Michelle Szydlowski,2024-02-01 A study of elephant tourism in Nepal from its origins in the 1960s to the present day this book examines the challenges faced by captive elephants Used as human conveyance on anti poaching patrol teams as rescue vehicles and in forestry service elephants have worked with and for

Tamil Love Poetry Martha

Ann Selby, 2011-06-07 Dating from the early decades of the third century C E the Ainkurunuru is believed to be the world's earliest anthology of classical Tamil love poetry Commissioned by a Cera dynasty king and composed by five masterful poets the anthology illustrates the five landscapes of reciprocal love jealous quarreling anxious waiting and lamentation clandestine love before marriage elopement and love in separation and patient waiting after marriage Despite its centrality to literary and intellectual traditions the Ainkurunuru remains relatively unknown beyond specialists Martha Ann Selby well known translator of classical Indian poetry and literature takes the bold step of opening this anthology to all readers presenting crystalline translations of 500 poems dense with natural imagery and early examples of South Indian culture Because of their form's short length the anthology's five authors rely on double entendre and sophisticated techniques of suggestion giving their poems an almost haikulike feel Groups of verse center on one unique figure in some cases an object or an animal in others a line of direct address or a specific conversation or situation Selby introduces each section with a biographical sketch of the poet and the conventions at work within the landscape She then incorporates notes explaining shifting contexts Excerpt He has gone off all by himself beyond the wastes where tigers used to prowl and the toothbrush trees grow tall their trunks parched on the flinty mountains while the lovely folds of your loins wide as a chariot's seat vanish as your circlet worked from gold grows far too large for you
