Third World Environmentalism Case Studies From The Global South:

Third World Environmentalism N. Patrick Peritore, 1999 An impressive tour de force in its analytical and theoretical foci It speaks with unique insight to the future of our world forging a powerful link between ideology politics and the environment Daniel G Zirker University of Idaho Enriches our understanding of global environmental beliefs and their place among the world's political elite Among the most theoretically based discussions of environmentalism founded on real data to date Steven R Brechin University of Michigan Focusing on seven developing countries India Korea Brazil Mexico Puerto Rico Romania and Iran where such data are rare Patrick Peritore presents a detailed look at the environmental attitudes and policies of leaders in government business and environmental groups The position that emerges one considerably more optimistic than ever previously presented rests outside old political poles of left and right thinking Leaders in all three sectors studied hold the balance of power between the more utopian Greens and the economically inclined promoters of sustainable development The author maintains that Third World decision makers hold international postmodern attitudes toward the environment that correspond closely to Western thought They seek consensus and scientific information as the basis for making decisions and are risk averse and highly concerned about the environment In addition he says their awareness of these issues is far in advance of their own public political parties and mass media The author creates a model of a new international environmental politics that flies in the face of much conventional wisdom and will be of keen interest to a range of scholars and policy makers N Patrick Peritore professor of political science at the University of Missouri Columbia is the author of Socialism Communism and Liberation Theology in Brazil An Opinion Survey Using Q Methodology and coeditor of Biotechnology in Latin America Politics Impacts and Risks **The Global South and Literature** Russell

West-Pavlov, 2018-03-08 The Global South has largely supplanted the Third World in discussions of development studies postcolonial studies world literature and comparative literature respectively The concept registers a new set of relationships between nations of the once colonized world as their connections to nations of the North diminish in significance Such relationships register particularly clearly in contemporary cultural theory and literary production The Global South and Literature explores the historical cultural and literary applications of the term for twenty first century flows of transnational cultural influence tracing their manifestations across the Global Southern traditions of Africa Asia and Latin America This collection of interdisciplinary contributions examines the origins development and applications of this emergent term employed at the nexus of the critical social sciences and developments in literary humanities and cultural studies This book will be a key resource for students graduates and researchers working in the field of postcolonial studies and world literature

Environmentalism and Global International Society Robert Falkner, 2021-07-15 Explains how environmentalism became a fundamental norm in international relations and explores the impact of the greening of international society

Environmental Leadership in Developing Countries Paul F. Steinberg, 2001 The first in depth study of the politics of

environmental policy reform in developing countries with emphasis on Costa Rica and Bolivia

Historical Dictionary of Environmentalism Peter Dauvergne, 2016-09-09 To capture the diversity within environmentalism this dictionary takes a global tack with a focus on ideas events institutions initiatives and green movements since the 1960s It strives to avoid a common error in many histories of environmentalism to exaggerate the input of the wealthy countries of Europe and North America and understate the influence of Africa Asia South and Central America and the Polar Regions It aims as well for a more comprehensive analysis than most histories of the modern environmental movement understanding environmentalism as emerging not only from grassroots and formal nongovernmental associations but also from corporate governmental and intergovernmental organizations and initiatives This assumes the ideas and energy infusing environmentalism with political purpose arise from hundreds of thousands of sources from corporate boardrooms to bureaucratic policies to international negotiations to activists Thus environmentalists are not only indigenous people blocking a logging road Greenpeace activists protesting a seal hunt or green candidates contesting an election an equal or larger number of environmentalists are working within the Japanese bureaucracy to implement environmental policies within the World Bank to assess the environmental impacts of loans within Wal Mart to green its purchasing practices or within intergovernmental forums to negotiate international environmental agreements This second edition of Historical Dictionary of Environmentalism contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important events issues organizations ideas and people shaping the direction of environmentalism worldwide This book is an excellent access point for students researchers and anyone wanting to know more about environmentalism

Security, the Environment and Emancipation Matt McDonald, 2011-08-24 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be

viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Comparative Environmental Politics Paul F. Steinberg, Stacy D. VanDeveer, 2012 Combining the theoretical tools of comparative politics with the substantive concerns of environmental policy experts explore responses to environmental problems across nations and political systems

Social Organizations and the Authoritarian State in China Timothy Hildebrandt, 2013-02-18 An analysis of the emergence of NGOs across China in three different issue areas environmental protection HIV AIDS prevention and gay and lesbian rights

The A to Z of Environmentalism Peter Dauvergne, 2009-09-02 Environmentalism involves hundreds of international environmental groups thousands of national groups and tens of thousands of local ones It also includes hundreds of international agreements hundreds of national environmental agencies and countless environmental sections in other organizations from those in multinational corporations to ones in regional and international organizations Such environmental concepts as sustainable development the precautionary principle corporate social responsibility and eco labeling percolate from all of these sources Every year new ideas refinements policies institutions markets and problems continue to enter into environmental debates and discourses making it nearly impossible to keep abreast of the changes constantly taking place The A to Z of Environmentalism is a paperback edition of the Historical Dictionary of Environmentalism It strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This goal is accomplished through a chronology an introductory essay and over 300 cross referenced dictionary entries

Environmental Politics for a Changing World Ronnie D. Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct

current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoeengineering NGO Discourses in the Debate on Genetically Modified Crops Ksenia Gerasimova,2017-07-20 The development and use of genetically modified organisms GMOs has been a contentious topic for the last three decades While there have been a number of social science analyses of the issues this is the first book to assess the role of Non Governmental Organizations NGOs in the debate at such a wide geographic scale The various positions for and against GMOs particularly with regard to transgenic crops articulated by NGOs in the debate are dissected classified and juxtaposed to corresponding campaigns These are discussed in the context of key conceptual paradigms including nature fundamentalism and the organic movement post colonialism food sovereignty anti globalisation sustainability and feminism The book also analyses how NGOs interpret the debate and the persuasive communication tactics they use This provides greater understanding of the complexity of negotiations in the debate and explains its specific features such as its global scope and difficulty in finding compromises The author assesses the long term interests of various participants and changes in perceptions of science and in public communication as a result Examples of major NGOs such as Greenpeace Oxfam and WWF are included but the author also provides new research into the role of NGOs in Russia Regional Integration in the Asia Pacific Issues and Prospects OECD,The Bob Hawke Prime Ministerial Centre at the University of South Australia,2005-04-28 This report published by the OECD s International Futures Programme in co operation with the Bob Hawke Prime Ministerial Centre in Australia aims to stimulate informed debate about the main integration issues facing the Asia Pacific region in the The Oxford Handbook of the Cold War Richard H. Immerman,Petra Goedde,2013-01-31 The Oxford Handbook of the Cold War offers a broad reassessment of the period war based on new conceptual frameworks developed in the field of international history Nearing the 25th anniversary of its end the cold war now emerges as a distinct period in twentieth century history yet one which should be evaluated within the broader context of global political economic social and cultural developments The editors have brought together leading scholars in cold war history to offer a new assessment of the state of the field and identify fundamental questions for future research The individual chapters in this volume evaluate both the extent and the limits of the cold war s reach in world history They call into question orthodox ways of ordering the chronology of the cold war and also present new insights into the global dimension of the conflict Even though each essay offers a unique perspective together they show the interconnectedness between cold war and national and transnational developments including long standing conflicts that preceded the cold war and persisted after its end or global transformations in areas such as human rights or economic and

cultural globalization Because of its broad mandate the volume is structured not along conventional chronological lines but thematically offering essays on conceptual frameworks regional perspectives cold war instruments and cold war challenges The result is a rich and diverse accounting of the ways in which the cold war should be positioned within the broader context of world history Citizenship, Sustainability and Environmental Research John Barry, John L. R. Proops, 2000-01-01 In the study the authors use Q methodology a qualitative methodology for the systematic study of subjectivity and shared discourses and at the same time they evaluate its usefulness for social scientific environmental research **The Next Generation of Responsible Investing** Tessa Hebb, 2011-11-09 In the face of the recent financial crisis there is increased focus on long term investment strategies This is particularly true for institutional investors who manage our retirement savings Simultaneously there is increased demand that financial assets be invested with an understanding of long term environmental and social sustainability Responsible investing provides a long term sustainable investment strategy that values environmental social and governance ESG factors in investment decision making Responsible Investing has always had a broad mandate Put simply it is a long term sustainable investment strategy that seeks to reduce risk in investment portfolios through managing ESG issues in today's corporations The Next Generation of Responsible Investment explores this topic in an edited volume intended for those with an interest in finance and business *Ideology, Social Theory, and the Environment* William D. Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity *Trouble in Paradise* J Roberts Timmons, 2003-07-03 Environmental degradation in Latin America has become one of the most pressing issues on the international agenda The volume began to crescendo when space shuttle astronauts photographed five thousand fires on a single night in the Brazilian Amazon state of Rondonia in 1985 and grew shrill when rubber tapper Chico Mendes was shot in 1988 trying to **Environment and Citizenship** Benito Cao, 2015-03-05 The increasing awareness of the human impact on the environment is having a profound effect on the concept and content of citizenship one of the

fundamental institutions that structures human relations In what is the first introduction of its kind this book provides an accessible stimulating and multidimensional overview of the many ways in which concern for the environment driven primarily by the preoccupation with sustainability is reshaping our understanding of citizenship Environment and Citizenship is structured into three parts Part I introduces the reader to the concept and theories of citizenship and explores the impact that environmental concerns is having on contemporary formulations of citizenship both traditional e g national liberal and republican and emerging e g cosmopolitan ecological and ecofeminist Part II explores the practical manifestations of environmental citizenship with each chapter focusing on a particular actor citizens governments and corporations These chapters include references to examples and case studies from a wide range of countries broadly categorized as belonging to the Global North and the Global South Part III explores the making of green citizens and outlines the dominant articulations of environmental citizenship that emerge from formal education news media and popular culture The book concludes with a general reflection on the present and future of environmental citizenship The book contains a variety of illustrations boxed case studies links to online resources and suggestions for further reading This original and engaging text is essential reading for students and scholars of environmental politics sustainability studies and development studies as well as for environmental activists policy practitioners and environmental educators More broadly this book will appeal to anyone interested in and concerned with issues of sustainability social justice and citizenship in the twenty first century

Social Discourse and Environmental Policy Helen Addams, John L. R. Proops, 2000-11-27 As governments and the wider public become increasingly concerned about environmental problems the necessity for competent environmental policies is growing The contributors to this highly original book attempt to demonstrate how the use of Q methodology can result in the development of more effective socially sensitive environmental policy options The book highlights the history of Q methodology a technique for systematically studying the subjectivity of individuals and provides a brief yet comprehensive account of its theory and a detailed guide to the various stages of a Q study The methodology is then applied to explore the discourses concerning the relationship between society and a diverse range of environmental issues including environmental protest civil aviation policy forest policy and land use options

Climate Change, Disaster Risk, and the Urban Poor Judy L. Baker, 2012-04-01 The urban poor living in slums are at particularly high risk from the impacts of climate change and natural hazards This study analyzes key issues affecting their vulnerability with evidence from a number of cities in the developing world
