Threats Without Enemies Facing Environmental Insecurity:

Threats Without Enemies Gwyn Prins, 1993 A series of essays arguing that the most serious threats the world faces today are not military but environmental Threats Without Enemies Gwyn Prins, 2013-11-05 The world is moving into a new era which will be dominated by a new range of threats and a new range of priorities Already headlines tell of storms and droughts mass emigrations the danger of old Soviet nuclear reactors and the thinning ozone layer and with the menaces of global warming deforestation pollution and loss of biodiversity the picture is likely to get bleaker Unlike traditional threats these are not made deliberately and standard military responses are usually inappropriate They are threats without enemies and they present quite new and fundamental challenges to the international community which has to find new methods and institutions as well as the resolve to tackle them In this book eminent experts describe the new threats and the scale of the dangers which they present and set out the political military and institutional changes needed Gwyn Prins is Director of the Global Security Programme at the University of Cambridge He is author of *Top guns and Toxic Whales* also published by Earthscan Progress For A Small Planet Three topics dominate discussions of the global environment pollution the consequences of the affluent running ever faster through finite resources and the growing tensions between rich and poor as a third of humanity continues to live and die in desperate poverty In this exceptional book Barbara Ward co author with Rene Dubos of the bestselling *Only One Earth* refused to see these processes as inevitable It describes new technologies for recycling waste for energy for getting more for less linking them to ordinary people s working lives It also suggests a strategy for meeting the basic needs of the disadvantaged and shows how the vast inequalities between countries can be reduced This perceptive survey of policies outlines a planetary bargain between the world s nations that would guarantee individual freedom from poverty and keep our shared biosphere in good working order Originally published in 1993 *The Language Of Environment* George Myerson, Yvonne Rydin, 2014-03-05 First published in 1996 Environment challenges modern knowledge and its institutions academic disciplines research groups journals and presses syllabuses and texts professions and data banks media experts and policy advisors The language of environment makes no policy proposals it is not prescriptive But it is an attempt to think about the cultural context of all proposals and prescriptions the cultures of authority and expertise in our time How is knowledge made to count and how do all the different claims connect or collide

Communicating Environmental Patriotism Anne Marie Todd, 2013-06-07 Environmental patriotism the belief that the national environment defines a country s greatness is a significant strand in twentieth century American environmentalism This book is the first to explore the history of environmental patriotism in America through the intriguing stories of environmental patriots and the rhetoric of their speeches and propaganda The See America First movement began in 1906 with the aim of protecting and promoting the landscapes of the American West In 1908 Gifford Pinchot and President Theodore Roosevelt hosted the White House Conservation Conference to promote the wise use of natural resources for

generations of Americans In 1912 Pittsburgh's smoke investigation condemned the effects of coal smoke on the city's environment In World War II a massive propaganda effort mobilized millions of Americans to plant victory gardens to save resources for the war abroad While these may not seem like crucial moments for the American environmental movement this new history of American environmentalism shows that they are linked by patriotism The book offers a provoking critique of environmentalists' communication strategies and suggests patriotism as a persuasive hook for new ways to make environmental issues a national priority This original research should be of interest to scholars of environmental communication environmental history American history and environmental philosophy

Bush **The Philosophical Foundations of Environmental Law** Sean Coyle, Karen Morrow, 2004-04 Legal regulation of the environment is often construed as a collection of legislated responses to the problems of modern living Treated as such environmental law refers not to a body of distinctive juristic ideas such as one might find in contract law or tort but to a body of black letter rules out of which a distinct jurisprudence might grow This book challenges the accepted view by arguing that environmental law must be seen not as a mere instrument of social policy but as a historical product of surprising antiquity and considerable sophistication Environmental law it is argued is underpinned by a series of tenets concerning the relationship of human beings to the natural world through the acquisition and use of property By tracing these ideas to their roots in the political philosophy of the seventeenth century and their reception into the early law of nuisance this book seeks to overturn the perception that environmental law s philosophical significance is confined to questions about the extent to which a state should pursue collective well being and public health through deliberate manipulation and restriction of private property rights Through a close re examination of both early and modern statutes and cases this book concludes that far from being intelligible in exclusively instrumental terms environmental law must be understood as the product of sustained reflection upon fundamental moral questions concerning the relationship between property rights and nature Doing International Research Christopher Williams, 2015-05-15 This energetic and thought provoking book encourages a reflexive non nationalistic approach to doing world research and sets out how to understand plan do and use this research Williams introduces a range of frameworks from desk based studies and traditional ethnography to the use of internet satellites robots drones and big data and provides exciting interdisciplinary examples This book is presented in a clear international style and uses creative approaches to researching peoples places and world systems It explains desk based research using international data including documentaries museum objects archives data sets and working with groups such as refugees tourists and migrants distance research using online videos surveys and remote methods such as video conferencing and crowdsourcing fieldwork abroad including ethnography street observation and mapping The book is also accompanied by a website with the following features For Students Weblinks for each chapter Examples summaries templates related to text marked with Additional thinking zones An overview of data capture technologies For Lecturers Copies of all the figures and thinking zones for use in teaching material PowerPoint slides for each chapter Built upon the foundations of the author s 30 years of research experience and including original case studies from international students this is an essential guide for anyone in the social sciences using or doing international and global research **The Environment in Anthropology** Nora Haenn, Richard Wilk, 2006 Presenting ecology and current environmental studies from an anthropological point of view this book gives readers a strong intellectual foundation as well as offering practical tools for solving environmental problems

Environmental Change, Adaptation, and Security S. Lonergan, 2012-12-06 The chapters in this volume are edited versions of papers presented at the NATO Advanced Research Workshop on Environmental Change Adaptation and Security

held in Budapest Hungary from October 16 18 1997 As is evident in this volume the papers ranged from descriptions of environmental and health issues in Russia and Eastern Europe to models of sustainable land use This diversity of perspectives on environment and security is indicative of both the breadth of this new area of research as well as the varied background of the researchers involved The discussions at the NATO workshop were remarkably animated and exciting not surprising given the interest in the topic I think this vitality is reflected in the papers in this volume as well The main purpose of the NATO ARW is to foster research links among researchers from NATO countries and Central and Eastern European States Russia and the Newly Independent States In editing this volume a decision was made to keep to the spirit of this purpose and if at all possible include all papers prepared for the workshop This required extensive editing and rewriting of some of the papers and consequent delays in production A determination was made early in the process by the workshop steering committee that the value of publishing the entire collection of articles outweighed the advantages of accepting only a limited number

Understanding Global Environmental Politics M. Paterson, 2000-04-07 *Understanding Global Environmental Politics* develops a new critical approach to global environmental politics It argues that the major power structures of world politics are deeply problematic in ecological terms and that they cannot be easily used to resolve major environmental challenges such as global warming Instead of simply advocating the construction of new international institutions to respond to such challenges therefore the book argues that the construction of alternative social and political structures is necessary

Security and the Environment Rita Floyd, 2010-05-06 In 1993 the first Clinton administration declared environmental security a national security issue but by the end of the Bush administration environmental security had vanished from the government's agenda This book uses changing US environmental security policy to propose a revised securitisation theory one that both allows insights into the intentions of key actors and enables moral evaluations in the environmental sector of security *Security and the Environment* brings together the subject of environmental security and the Copenhagen School's securitisation theory Drawing on original interviews with former key players in United States environmental security Rita Floyd makes a significant and original contribution to environmental security studies and security studies more generally This book will be of interest to international relations scholars and political practitioners concerned with security as well as students of international environmental politics and US policy making

The Heart of War Gwyn Prins, 2003-08-29 Written by one of the most highly regarded experts on global security this is a controversial look at the changing face of war and the role of the military in the twenty first century

International Bibliography of the Social Sciences, 1994 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

Critical Security Studies: Concepts and Cases Keith Krause, 2005

Environmental Security in the Anthropocene Judith Nora Hardt, 2017-09-22 This book provides a critical assessment of the theories and practice of environmental security in the

context of the Anthropocene The work analyses the intellectual foundations the evolution and different interpretations strengths and potential of the link between environment and security but also its weaknesses incoherencies and distortions To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene Furthermore the book examines the practice theory divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities This book will be of great interest to students and academic scholars of Environmental Security Critical Security Studies Green Political Theory Global Governance and International Relations in general

Global Warming and Global Politics Matthew Paterson, 2013-02-01 Examines the major theories within international relations and how these can help us understand the emergence of global warming as a political issue

The New Security Agenda in the Asia-Pacific Region Denny Roy, 2016-07-27 The field of security studies is undergoing a major re evaluation in the post Cold War era and this has important implications for the region The security dangers of the 1990s and beyond are different and more complex than those of the Cold War and strategic thinkers both in the academic and policy making spheres must begin to understand the new environment lest they fall into the old trap of planning for the next conflict based on the conditions of the last conflict This book is designed to survey the new environment assessing what has changed and what remains the same and suggesting what types of demands future strategists will face

Disaster, Conflict and Society in Crises Dorothea Hilhorst, 2013-07-18 Humanitarian crises resulting from conflict natural disaster or political collapse are usually perceived as a complete break from normality spurring special emergency policies and interventions In reality there are many continuities and discontinuities between crisis and normality What does this mean for our understanding of politics aid and local institutions during crises This book examines this question from a sociological perspective This book provides a qualitative inquiry into the social and political dynamics of local institutional response international policy and aid interventions in crises caused by conflict or natural disaster Emphasising the importance of everyday practices this book qualitatively unravels the social and political working of policies aid programmes and local institutions The first part of the book deals with the social life of politics in crisis Some of the questions raised are What is the meaning of human security in practice How do governments and other actors use crises to securitize and hence depoliticize their strategies The second part of the book deals with the question how local institutions fare under and transform in response to crises Conflicts and disasters are breakpoints of social order with a considerable degree of chaos and disruption

but they are also marked by processes of continuity and re ordering or the creation of new institutions and linkages This part of the book focuses on institutions varying from inter ethnic marriage patterns in Sri Lanka to situation of institutional multiplicity in Angola The final part of the book concerns the social and political realities of different domains of interventions in crisis including humanitarian aid peace building disaster risk reduction and safety nets to address chronic food crises This book gives students and researchers in humanitarian studies disaster studies conflict and peace studies as well as humanitarian and military practitioners an invaluable wealth of case studies and unique political science analysis of the humanitarian studies field
