Lingfeng Zeng, Ning Zhang, Wenhua Ling, Claudio Lucchiari, 2024-03-08 The human skeleton undergoes a life long remodeling process Bone homeostasis requires a potential balance between bone resorbing osteoclasts and bone forming osteoblasts With old age bone homeostasis undergoes deregulation and normal bone remodeling could not make bone mass stable thus causing osteopenia and osteoporosis Osteoporosis is a systemic bone disease characterized by reduced bone mass degraded bone microstructure increased bone fragility and raised risk of fracture Osteoporosis is a frequently occurring and common disease in the aging population especially in postmenopausal women and elderly men The updated research found that one third of women aged 60 to 70 suffer from osteoporosis Two thirds of women aged 80 years or older have osteoporosis About 20 25% of women over 50 years of age have one or more vertebral fractures Recent research evidence indicates that an increasing number of plant based natural products or secondary metabolites such as polyunsaturated fatty acids phytosterols flavonoids and other botanicals active compounds have beneficial effects on the risk of osteoporosis Compared with conventional therapies plant based natural products with thousands of years of medical use experience are gradually approved for clinical use due to fewer adverse reactions low toxicity high efficiency and good tolerance Natural products

have been an important source of inspiration for new drug development. However, most of the evidence regarding the anti-osteoporosis effects of natural products comes from in vitro and preclinical in vivo studies, and only a few natural products have been used clinically. All of these above mentioned still require rigorously designed studies and further verification.

The Potential Effects and Mechanisms of Chinese Traditional Medicine on Bone Homeostasis and Remodeling Jun Liu, Bo Liu, Xiaoqin Wu, Qi Wang, 2023-09-20 Osteoporosis is a systemic skeletal disease strongly affecting postmenopausal women and characterized by an increased risk of bone fragility and a decrease in bone mass. Bone homeostasis requires a balance between bone-forming osteoblasts and bone-resorbing osteoclasts. When this balance is impaired, normal bone remodelling cannot keep bone mass stable, leading to osteopenia and osteoporosis. About 30-50% of all women in the world suffer from fractures due to osteoporosis throughout their lives. The treatments include improving metabolic abnormalities through complementary and alternative therapies, drug application, and surgical therapy for the management of overweight, obesity, and hormone metabolism disorder. Chinese traditional medicine has been increasingly considered as an effective therapy for osteoporosis. A series of formulae, herbs, and natural products have been indicated for their effects in the prevention and treatment of osteoporosis, such as Liu Wei Di Huang Wan formula, *Morinda officinalis* Radix herb, Longspur epimedium glycoside, natural product. However, the mechanisms of action remain largely unexplored.

Xie's Chinese Veterinary Herbology Huisheng Xie, Vanessa Preast, 2011-11-16 Xie's Chinese Veterinary Herbology serves as a practical guide to the theory and application of Chinese Herbal Medicine into veterinary practices. Divided into three parts, the book covers herbal materia medica used in treating various disorders and diseases, herbal formulas, and the clinical application of treatments. The book also outlines each herb's history, the formulation of herbal recipes, energetic actions, indications, and contraindications of each formula, dosages, and clinical and pharmacological studies performed with herbal treatments. This text serves as an invaluable reference to veterinarians looking to expand treatment options.

Thirty Great Inventions of China Jueming Hua, Lisheng Feng, 2020-12-14 The book presents thirty great Chinese inventions, both ancient and modern, which are original, distinct, have made outstanding contributions, and had extensive influence in China and around the globe. It also clarifies the misunderstandings and provides a clear definition and classification of the evaluation criteria for great inventions.
