**Coming to Our Senses** Susan R. Barry, 2021-06-08 A neurobiologist reexamines the personal nature of perception in this groundbreaking guide to a new model for our senses We think of perception as a passive mechanical process as if our eyes are cameras and our ears microphones But as neurobiologist Susan R Barry argues perception is a deeply personal act Our environments our relationships and our actions shape and reshape our senses throughout our lives This idea is no more apparent than in the cases of people who gain senses as adults Barry tells the stories of Liam McCoy practically blind from birth and Zohra Damji born deaf in the decade following surgeries that restored their senses As Liam and Zohra learned entirely new ways of being Barry discovered an entirely new model of the nature of perception Coming to Our Senses is a celebration of human resilience and a powerful reminder that before you can really understand other people you must first recognize that their worlds are fundamentally different from your own
