the world's wealthiest and most successful individuals rich in money, relationships, power, peace of mind, and social standing have built and maintained their prosperity. It is the foundational principle of Napoleon Hill's Science of Success program, an achievement philosophy that effectively helped end the Great Depression and that has since made more millionaires, cultural icons, and thought leaders than any other. Hill was born in 1883 in a one-room cabin on the Pound River in Wise County, Virginia. He began his writing career at age thirteen as a mountain reporter for small-town newspapers. In 1908, as a young special investigator for a nationally known business magazine, he was sent to interview the great steel magnate Andrew Carnegie. During that interview, Carnegie shared the secrets that had enabled him to acquire hundreds of millions of dollars: a magic law of the human mind, a little-known psychological principle that was amazing in its power. Believing that this magic formula should be shared with those who did not have the time or resources to discover it on their own, Carnegie tasked Hill with spending twenty years or more developing this principle into a philosophy of personal success. This research would be conducted without pay; Carnegie merely provided Hill with access to over five hundred of America's greatest business leaders in order to test his success formula. In 1937, after twenty-nine years of research and writing, Hill published *Think and Grow Rich*, which contains the thirteen success principles that form the core of the Science of Success. Since its release, it has sold over one hundred million copies worldwide. No literary work in the personal development genre has had a greater creative impact than *Think and Grow Rich*.
