Design Thinking in the Middle Grades

Reagan Curtis, Darran R. Cairns, Johnna J. Bolyard, 2023 Too often mathematics and science are taught in isolation from each other and from meaningful problems that matter to students This book draws on the authors experiences with teacher colleagues including time spent in their classrooms co developing and refining lessons The core of their approach is to encourage learners to pursue solutions to everyday challenges through design based learning cycles Students use mathematical modeling to describe or summarize a phenomenon predict which potential solutions may be successful and or to test actual performance against predictions The authors emphasize connecting grade appropriate science and math content standards and integrating literacy with evidence based argument through design briefs and presentations Teachers will learn how to support productive struggle and structure group learning that promotes equity while teaching in the classroom or virtually as needed The middle grades are a pivotal time to engage the next generation so that they are prepared to solve tomorrow s challenges Classroom teachers pre service educators and faculty in teacher education programs can use Design Thinking in the Middle Grades as a foundational text for math science and integrated STEM teaching Book Features Identifies the content standards objectives and practices from math science and language arts for each lesson sample Combines mathematical modeling with engineering design as a tool to facilitate deep learning Offers a range of design activities to produce both artifacts and processes Describes design activities focused on easily obtained

inexpensive or found materials to avoid narrowing access in underfunded schools

Transreform Radical Humanism
 Gale Russell, 2017-08-24 In *Transreform Radical Humanism* A Mathematics and Teaching Philosophy a methodological collage of auto ethnography Gadamerian hermeneutics and grounded theory is used to analyze a diverse collection of data the author's evolving relationship with mathematics the philosophies of mathematics the math wars the achievement gap for Indigenous students in mathematics and some of the lessons learned from ethnomathematics and risk education as an emerging topic within mathematics curricula Foundational to this analysis is a new theoretical framework that envelops an Indigenous worldview and the Traditional Western worldview acting as a pair of voices and lenses that speak to the points of tension conflict and possibility found throughout the data This analysis of the data sets results in the emergence of a new theory the Transreform Approach to the teaching and learning of mathematics and in the transreform radical humanistic philosophy of mathematics Within these pages mathematics the teaching and learning of mathematics hegemony and the valuing of different kinds of knowledge and ways of knowing collide sometimes merge and most frequently become transformed in ways that hold promise for students teachers society and even mathematics itself As the assumed incommensurability of worldviews is challenged so too new possibilities emerge It is hoped that readers will not just read this work but engage with it exploring the kinds of knowledge and ways of knowing that they value within mathematics and the teaching and learning of mathematics and why

Principles of Mathematics Book 1 Teacher Guide Katherine Loop, 2016-08-05 Teacher Guide for Book 1 of the *Principles of Mathematics* Biblical Worldview Curriculum for junior high Math is a real life tool that points us to God and helps us explore His creation yet it often comes across as dry facts and meaningless rules Here at last is a curriculum that has a biblical worldview integrated throughout the text and problems not just added as an afterthought The resources in the Teacher Guide will help students master and apply the skills learned in the Student Textbook What does this Teacher Guide include Worksheets Quizzes and Tests These perforated three hole punched pages help provide practice on the principles taught in the main student textbook Answer Keys The answers are included for the worksheets quizzes and tests found in this Teacher Guide Schedule A suggested calendar schedule is provided for completing the material in one year though this can be adapted to meet individual student needs There is also an accelerated schedule for completing the material in one semester Are there any prerequisites for this course This curriculum is aimed at grades 6-8 fitting into most math approaches the year or two years prior to starting high school algebra If following traditional grade levels Book 1 should be completed in grade 6 or 7 and Book 2 in grade 7 or 8 In Book 1 students should have a basic knowledge of arithmetic basic arithmetic will be reviewed but at a fast pace and while teaching problem solving skills and a biblical worldview of math and sufficient mental development to think through the concepts and examples given Typically anyone in sixth grade or higher should be prepared to begin The focus of the course is actually learning math for life not simply preparing to pass a test

The Core Leigh A. Bortins, 2025-10-16 In the past correct

spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can't advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In *The Core* Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences
