Thinking Without Thinking In The Victorian Novel:

Thinking Without Thinking in the Victorian Novel Vanessa L. Ryan, 2012-06-07 In Thinking without Thinking in the Victorian Novel Vanessa L. Ryan demonstrates how both the form and the experience of reading novels played an important role in ongoing debates about the nature of consciousness during the Victorian era Revolutionary developments in science during the mid and late nineteenth century including the discoveries and writings of Herbert Spencer William Carpenter and George Henry Lewes had a vital impact on fiction writers of the time Wilkie Collins George Eliot George Meredith and Henry James read contributions in what we now call cognitive science that asked what is the mind These Victorian fiction writers took a crucial step asking how we experience our minds how that experience relates to our behavior and questions of responsibility how we can gain control over our mental reflexes and finally how fiction plays a special role in understanding and training our minds Victorian fiction writers focus not only on the question of how the mind works but also on how it seems to work and how we ought to make it work Ryan shows how the novelistic emphasis on dynamic processes and functions on the activity of the mind rather than its structure or essence can also be seen in some of the most exciting and comprehensive scientific revisions of the understanding of thinking in the Victorian period This book studies the way in which the mind in the nineteenth century view is embedded not just in the body but also in behavior in social structures and finally in fiction

Stylistic Virtue and Victorian Fiction Matthew Sussman, 2021-07-01 What is style and why does it matter This book answers these questions by recovering the concept of stylistic virtue once foundational to rhetoric and aesthetics but largely forgotten today Stylistic virtues like ease and grace are distinguishing properties that help realize a text's essential character First described by Aristotle they were integral to the development of formalist methods and modern literary criticism The first half of the book excavates the theory of stylistic virtue during its period of greatest ascendancy in the late eighteenth and nineteenth centuries when belletristic rhetoric shaped how the art of literary style and the aesthetic were understood The second half offers new readings of Thackeray Trollope and Meredith to show how stylistic virtue changes our understanding of style in the novel and challenges conventional approaches to interpreting the ethics of art

The Routledge Research Companion to Anthony Trollope Deborah Denenholz Morse, Margaret Markwick, Mark W. Turner, 2016-09-01 Bringing together leading and newly emerging scholars The Routledge Research Companion to Anthony Trollope offers a comprehensive overview of Trollope scholarship and suggests new directions in Trollope studies The first volume designed especially for advanced graduate students and scholars the collection features essays on virtually every topic relevant to Trollope research including the law gender politics evolution race anti-Semitism biography philosophy illustration aging sport emigration and the global and regional worlds

Mindful Aesthetics Chris Danta, Helen Groth, 2013-11-07 In the last few decades literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind This cognitive turn has been equally generative and

contentious While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present critics have questioned its literalism and selective borrowing of scientific authority Mindful Aesthetics presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice This collection contributes to the forging of a new interdisciplinarity to paraphrase Alan Richardson s recent preface to the Neural Sublime that is more concerned with addressing how rather than why we should navigate the increasingly narrow gap between the humanities and the sciences **The Cambridge**

Companion to Literature and Science Steven Meyer,2018-05-03 In 1959 C P Snow lamented the presence of what he called the two cultures the apparently unbridgeable chasm of understanding and knowledge between modern literature and modern science In recent decades scholars have worked diligently and often with great ingenuity to interrogate claims like Snow s that represent twentieth and twenty first century literature and science as radically alienated from each other The Cambridge Companion to Literature and Science offers a roadmap to developments that have contributed to the demonstration and emergence of reciprocal connections between the two domains of inquiry Weaving together theory and empiricism individual chapters explore major figures Shakespeare Bacon Emerson Darwin Henry James William James Whitehead Einstein Empson and McClintock major genres and modes of writing fiction science fiction non fiction prose poetry and dramatic works and major theories and movements pragmatism critical theory science studies cognitive science ecocriticism cultural studies affect theory digital humanities and expanded empiricisms This book will be a key resource for scholars graduate students and undergraduate students alike [Pain and the Aesthetics of US Literary Realism](#) Cynthia J.

Davis,2021 Demonstrates the importance of physical pain to late nineteenth century aesthetic sensibilities and in particular to American literary realism with a focus on the work of William Dean Howells Henry James Edith Wharton Mark Twain and Charles Chesnutt **The Intelligent Unconscious in Modernist Literature and Science** Thalia Trigoni,2020-11-16 This book reassesses the philosophical psychological and above all the literary representations of the unconscious in the early twentieth century This period is distinctive in the history of responses to the unconscious because it gave rise to a line of thought according to which the unconscious is an intelligent agent able to perform judgements and formulate its own thoughts The roots of this theory stretch back to nineteenth century British physiologists Despite the production of a number of studies on modernist theories of the relation of the unconscious to conscious cognition the degree to which the notion of the intelligent unconscious influenced modernist thinkers and writers remains understudied This study seeks to look back at modernism from beyond the Freudian model It is striking that although we tend not to explore the importance of this way of thinking about the unconscious and its relationship to consciousness during this period modernist writers adopted it widely The intelligent unconscious was particularly appealing to literary authors as it is intertwined with creativity and artistic novelty through its ability to move beyond discursive logic The book concentrates primarily on the works of D H Lawrence

Virginia Woolf and T S Eliot authors who engaged the notion of the intelligent unconscious reworked it and offered it for the consumption of the general populace in varied ways and for different purposes whether aesthetic philosophical societal or ideological Shortlisted for the Modernist Studies Association MSA First Book Prize and for the 2021 British Society for Literature and Science Book Prize **The Cambridge Companion to the Body in Literature** David Hillman, Ulrika Maude, 2015-05-19 This Companion offers the first systematic analysis of the representation of the body in literature It historicizes embodiment by charting our evolving understanding of the body from the Middle Ages to the present day and addresses such questions as sensory perception technology language and affect maternal bodies disability and the representation of ageing eating and obesity pain death and dying and racialized and posthuman bodies This Companion also considers science and its construction of the body through disciplines such as obstetrics sexology and neurology Leading scholars in the field devote special attention to poetry prose drama and film and chart a variety of theoretical understandings of the body *Imagining Otherwise* Debra Gettelman, 2024-08-13 From fan fiction to relatability the assessment of novels based on how easy it is to imagine the represented experiences the individual reader's imagination has become a determining part of the contemporary literary environment Literary studies has a long history of critical approaches from New Criticism to surface reading devoted to minimizing the associations and inventiveness that readers bring to a text *Imagining Otherwise* instead seeks to explain how we came to view fiction as available for imaginative appropriation in the first place Gettelman argues for the Victorian roots of the core modernist belief that readers complete an author's vision As novel readership expanded in the nineteenth century many Victorian writers became frustrated with readers formulaic expectations and sought to engage aesthetically with their readers' imaginations Gettelman argues that the elevation of the novel as a genre began when writers started to incorporate rather than exclude the common reader's daydreams and emotions into their work Taking a fresh look at works by Austen Dickens George Eliot and Trollope as well as some of their modernist successors Henry James Virginia Woolf and others Gettelman traces narrative techniques including direct address verb tense syntax and prose style that reflect Victorian authors' changing perceptions of and engagement with their readers

The Novel in Nineteenth-Century Bengal Sunayani Bhattacharya, 2023-07-13 How does a reader learn to read an unfamiliar genre The Novel in Nineteenth Century Bengal answers this question by looking at the readers of some of the first Bengali novelists including Bankimchandra Chattopadhyay and Mir Mosharraf Hossain Moving from the world of novels periodicals letters and reviews to that of colonial educational policies this book provides a rich literary history of the reading lives of some of the earliest novel readers in colonial India Sunayani Bhattacharya studies the ways in which Bengalis thought about reading how they approached the thorny question of influence and uncovers that they relied on classical Sanskrit and Perso Arabic literary and aesthetic models whose attendant traditions formed not a distant past but coexisted albeit contentiously with the everyday present Challenging dominant postcolonial scholarship The Novel in Nineteenth Century

Bengal engages with the lived experience of colonial modernity as it traces the import of the Bengali reader's choices on her quotidian life and grants access to 19th century Bengal as a space in which the past is to be found enmeshed with the present

Rimsky-Korsakov and His World Marina Frolova-Walker, 2018-09-11 A rare look at the life and music of renowned Russian composer Nikolai Rimsky Korsakov During his lifetime Nikolai Rimsky Korsakov 1844 1908 was a composer whose work had great influence not only in his native Russia but also internationally While he remains well known in Russia where many of his fifteen operas and various orchestral pieces are still in the standard repertoire very little of his work is performed in the West today beyond *Scheherazade* and arrangements of *The Flight of the Bumblebee* In Western writings he appears mainly in the context of the *Mighty Handful* a group of five Russian composers to which he belonged at the outset of his career *Rimsky Korsakov and His World* finally gives the composer center stage and due attention In this collection Rimsky Korsakov's major operas *The Snow Maiden* *Mozart and Salieri* and *The Golden Cockerel* receive multifaceted exploration and are carefully contextualized within the wider Russian culture of the era The discussion of these operas is accompanied and enriched by the composer's letters to Nadezhda Zabela the distinguished soprano for whom he wrote several leading roles Other essays look at more general aspects of Rimsky Korsakov's work and examine his far reaching legacy as a professor of composition and orchestration including his impact on his most famous pupil Igor Stravinsky The contributors are Lidia Ader Leon Botstein Emily Frey Marina Frolova Walker Adalyat Issiyeva Simon Morrison Anna Nisnevich Olga Panteleeva and Yaroslav Timofeev The Bard Music Festival Bard Music Festival 2018 Rimsky Korsakov and His World Bard College August 10 12 and August 17 19 2018

Hardy, Conrad and the Senses Hugh Epstein, 2019-11-12 This book reads the highly descriptive impressionist writings of Hardy and Conrad together in the light of a shared attention to sight and sound

Handbook of the American Novel of the Twentieth and Twenty-First Centuries Timo Müller, 2017-01-11 Increasing specialization within the discipline of English and American Studies has shifted the focus of scholarly discussion toward theoretical reflection and cultural contexts These developments have benefitted the discipline in more ways than one but they have also resulted in a certain neglect of close reading As a result

students and researchers interested in such material are forced to turn to scholarship from the 1960s and 1970s much of which relies on dated methodological and ideological presuppositions The handbook aims to fill this gap by providing new readings of texts that figure prominently in the literature classroom and in scholarly debate from James s The Ambassadors to McCarthy s The Road These readings do not revert naively to a time before theory Instead they distil the insights of literary and cultural theory into concise introductions to the historical background the themes the formal strategies and the reception of influential literary texts and they do so in a jargon free language accessible to readers on all levels of qualification

Signs of the Material World Melissa Frazier,2025-04-01 Signs of the Material World traces the literary effects of nineteenth century materialism that includes the mind and body within a multifaceted living life The book examines a range of scientists from Auguste Comte and the vulgar materialists to Charles Darwin James Clerk Maxwell George Henry Lewes Charles Sanders Peirce and the Russian Nikolai Strakhov The book sets Fyodor Dostoevsky in complex opposition to his fellow writers Lev Tolstoy and Nikolai Chernyshevsky while also exploring the formal connections that he shares with contemporaries across Europe and the United States including Wilkie Collins Charles Dickens George Eliot Nathaniel Hawthorne and Friedrich Schiller Melissa Frazier argues that Dostoevsky s art serves as his science both in his reliance on plot and in his recourse to an often extravagant figurative language This combined literary and scientific practice reflects Dostoevsky s transnational and interdisciplinary reading it also transforms our own In George Eliot s words Dostoevsky changes the lights for us Once drawn into his orbit Eliot herself no longer looks quite the same Finally Signs of the Material World argues that Eliot and Dostoevsky s particular strain of nineteenth century materialism lends itself to an ambivalent political stance as they both confront the certainties of social utopianism with a deliberate embrace of ambiguity

Human Forms Ian Duncan,2024-12-17 A major rethinking of the European novel and its relationship to early evolutionary science The 120 years between Henry Fielding s Tom Jones 1749 and George Eliot s Middlemarch 1871 marked both the rise of the novel and the shift from the presumption of a stable universal human nature to one that changes over time In Human Forms Ian Duncan reorients our understanding of the novel s formation during its cultural ascendancy arguing that fiction produced new knowledge in a period characterized by the interplay between literary and scientific discourses even as the two were separating into distinct domains Duncan focuses on several crisis points the contentious formation of a natural history of the human species in the late Enlightenment the emergence of new genres such as the Romantic bildungsroman historical novels by Walter Scott and Victor Hugo that confronted the dissolution of the idea of a fixed human nature Charles Dickens s transformist aesthetic and its challenge to Victorian realism and George Eliot s reckoning with the nineteenth century revolutions in the human and natural sciences Modeling the modern scientific conception of a developmental human nature the novel became a major experimental instrument for managing the new set of divisions between nature and history individual and species human and biological life that replaced the ancient schism between animal body and immortal soul

The first book to explore the interaction of European fiction with the natural history of man from the late Enlightenment through the mid Victorian era *Human Forms* sets a new standard for work on natural history and the novel
