Architectural Colossi and the Human Body Charalampos Politakis, 2017-08-10 The human body has been used as both a model and metaphor in architecture since antiquity This book explores how it has been an inspiration for the exterior form of architectural colossi through the years It considers the body as a source of architectural and artistic representation and in doing so explores the results of such practices in colossal sculptures and architectural praxis within a philosophical discourse of space time and media Architectural Colossi and the Human Body discusses the role of Platonic and Cartesian philosophy and how philosophers such as Heidegger and Merleau-Ponty and theoreticians such as Frascari and Pallasmaa have seen described and analysed the human body and the role of architecture and perception Drawing upon three key case studies and by employing theoretical ideas of Venturi and others this book will provide an understanding of the role of anthropomorphism and the relation and use of the human body with reference to selected architects and artists

The Architectural Models of Theodore Conrad Teresa Fankhänel, 2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910-1994 the most prominent and prolific architectural model maker of the 20th century Conrad's innovative models were instrumental in the design and realization of many icons

of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad s work and his impact on 20th century architectural history With exclusive access to Conrad s archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad s work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad s models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers

The Darkness of the Present Steve McCaffery, 2012-11-19 The Darkness of the Present includes essays that collectively investigate the roles of anomaly and anachronism as they work to unsettle commonplace notions of the contemporary in the field of poetics In the eleven essays of The Darkness of the Present poet and critic Steve McCaffery argues that by approaching the past and the present as unified entities the contemporary is made historical at the same time as the historical is made contemporary McCaffery s writings work against the urge to classify works by placing them in standard literary periods or disciplinary partitions Instead McCaffery offers a variety of insights into unusual and ingenious affiliations between poetic works that may have previously seemed distinctive He questions the usual associations of originality and precedence In the process he repositions many texts within genealogies separate from the ones to which they are traditionally assigned The chapters in The Darkness of the Present might seem to present an eclectic fa ade and can certainly be read independently They are linked however by a common preoccupation reflected in the title of the book the

anomaly and the anachronism and the way their empirical emergence works to unsettle a steady notion of the contemporary or new

Personal States Catherine Alexander, 2002 Catherine Alexander charts how Turkish people both within and outside the state bureaucracy attempt to personalise the impersonality of the state Based on a detailed study of the nationalized Turkish Sugar Corporation she considers how people from the highest levels of the state bureaucracy to farming villages understand the state and how in turn they imagine themselves to be perceived The narratives and metaphors used in these constructions draw on resources close to hand such as the material organization of state factory compounds state personnel encountered in the course of everyday life and the image of the family structure By also exploring notions of state and personhood within the highest echelons of the administration itself Alexander shows how ideas of the state recede once one is actually within For officials the state becomes other institutions and Ministries with which they have little contact The continual process of striving to make connections with other groups and people occurs both at all hierarchical levels of the Sugar Corporation and between farmers and factory engineers This elegant nuanced ethnography of modernity will cause scholars of state institutions across a broad range of disciplines radically to rethink what the state actually is and the relations that create it thus taking understandings of the state to an entirely new level

Cornucopia Limited Richard Coyne, 2007-09-28 Using the liminality of design its uneasy position between creativity and commerce to explore the network economy The network economy presents itself in the transactions of electronic commerce finance business and communications The network economy is also a social condition of discontinuity indefinite limits and in between spaces In *Cornucopia Limited* Richard Coyne uses the liminality of design its uneasy position between creativity and commerce to explore the network economy He argues that design with its open ended and

transgressive explorations provides a new way to think about the world of commerce design's inter territorial precinct its in between condition offers a way to frame the problems of the Internet economy for profit vs for free private vs public security vs open access defense vs permeability Design says Coyne has a natural affinity with the edge condition and the position between polar opposites Edgy design starts with an idea brings to mind its opposite and then works with what emerges from the friction between the two The designer of a Web portal for example might take on the problem of security by focusing on the limits of permeability Design is edgy and risky argues Coyne in the same way that breaches in network security are risky In Cornucopia Limited he examines the threshold between conditions exemplified by the boundary between design and commerce Coyne uses five metaphors of design to develop his argument the household in economics historically opposed to the market with its relationship to the street mediated by various portals the machine rampant and glitchy the game competitive but simulated the gift precursor to commerce and the threshold The threshold condition Coyne says is the site of edgy design and a portal into the new The threshold he argues provides the most potent metaphor for understanding the liminal dwellers of the network economy
