countries including nationally specific models the political economy and the histories of Canada and the United States as settler societies *Strangers No More* delves into issues of pivotal importance for the present and future of Western societies where immigrants and their children form ever larger shares of the population Citizenship, Political Engagement, and Belonging Deborah Reed-Danahay, Caroline B. Metropolitan Latinidad A. K. Sandoval-Strausz, 2025-04-30 A wide ranging collection of essays that centers Latinos in the history of American cities and suburbs Latino urban history has been underappreciated not only in its own right but for the centrality of its narratives to urban history as a field A scholarly discipline that has long scrutinized economics politics and the built environment has too often framed race as literally Black and white This has resulted in a fundamental misunderstanding of the full social canvas of American cities since at least the early twentieth century Traversing metropolitan areas like Atlanta Chicago El Paso Fort Worth Los Angeles Miami and New York this collection of essays brings together both established and emerging scholars including long time urbanists and academics working in the fields of Latino borderlands political landscape and religious history Organized at different scales including city suburb neighborhood and hemisphere this impressive body of work challenges long standing narratives about metropolitan America The contributors Llana Barber Mauricio Castro Eduardo

McAlister, 2008-06-09 This collection of essays from a special issue of *American Quarterly* explores the complex and sometimes contradictory ways that religion matters in contemporary public life. *Religion and Politics in the Contemporary United States* offers a groundbreaking cross-disciplinary conversation between scholars in American studies and religious studies. The contributors explore numerous modes through which religious faith has mobilized political action. They utilize a variety of definitions of politics ranging from lobbying by religious leaders to the political impact of popular culture. Their work includes the political activities of a very diverse group of religious believers: Christians, Jews, Muslims, Hindus, Buddhists, and others. In addition, the book explores the meanings of religion for people who might contest the term: those who are spiritual but not religious, for example, as well as activists who engage symbols of faith and community but who may not necessarily consider themselves members of a specific religion. Several essays also examine the meanings of secular identity, humanist politics, and the complex evocations of civil religion in American life. No other book on religion and politics includes anything like the diversity of religions, ethnicities, and topics that this one does, from Mormon political mobilization to attempts at Americanizing Muslims in the post-9/11 United States, from Cesar Chavez to James Dobson, from interreligious cooperation and conflict over Darfur to the global politics surrounding the category of Hindus and South Asians in the United States.

The Metropolitan Revolution Jon C. Teaford, 2006-05-16 In this absorbing history, Jon C. Teaford traces the dramatic evolution of American metropolitan life. At the end of World War II, the cities of the Northeast and the Midwest were bustling, racially and economically integrated areas frequented by suburban and urban dwellers alike. Yet since 1945, these cities have become peripheral to the lives of most Americans. Edge cities are now the dominant centers of production and consumption in post-suburban America. Characterized by sprawling freeways, corporate parks, and homogeneous malls and shopping centers, edge cities have transformed the urban landscape of the United States. Teaford surveys metropolitan areas from the Rust Belt to the Sun Belt and the way in which postwar social, racial, and cultural shifts contributed to the decline of the central city as a hub of work, shopping, transportation, and entertainment. He analyzes the effects of urban flight in the 1950s and 1960s, the subsequent growth of the suburbs, and the impact of financial crises and racial tensions. He then brings the discussion into the present by showing how the recent wave of immigration from Latin America and Asia has further altered metropolitan life and complicated the black-white divide. Engaging in original research and interpretation, Teaford

tells the story of this fascinating metamorphosis
