The Kid of Coney Island Woody Register,2003 A portrait of the pioneering entrepreneur who designed and built Luna Park which in 1903 transformed Coney Island into a respectable venue for middle class recreation and created the Hippodrome the world s largest theater when it opened in 1905 filling it with lavish spectacles at affordable ticket prices The author also explores the development of the idea of adult amusements in America during Thompson s day and ours

Winsor McCay Winsor McCay, 2003 This is the fourth volume in the Checker Book Publishing's series reprinting of the cartoons and illustrations of Winsor McCay. The majority of McCay's works published in these volumes are seeing print for the first time since their original publication in the early 1900s. Best known for Little Nemo in Slumberland, this volume features McCay's other popular but less well-known works such as the 1908 strips of Dream of the Rarebit Fiend and A Pilgrim's Progress. An assortment of McCay's editorial cartoons meticulously drawn and bitingly funny are also included in this volume. McCay's unique artistic approach to the comic strip medium combined so successfully with his unconventional themes and social satire earned him both public and critical acclaim during his career and a lasting influence upon future generations of illustrators, cartoonists, and animators. back cover

Reading Graphic Novels Achim Hescher, 2016-02-22

Distinguishing the graphic novel from other types of comic books has presented problems due to the fuzziness of category boundaries. Against the backdrop of prototype theory, the author establishes the graphic novel as a genre whose core feature is complexity, which again is defined by seven gradable subcategories: 1. multilayered plot and narration, 2. multireferential use of color, 3. complex text-image relation, 4. meaning-enhancing panel design and layout, 5. structural performativity, 6. references to texts, media, and 7. self-referential and metafictional devices. Regarding the subcategory of narration, the existence of a narrator as known from classical narratology can no longer be assumed. In addition, conventional focalization cannot account for two crucial parameters of the comics image: what is shown (point of view including mise en scène) and what is seen (character perception). On the basis of François Jost's concepts of ocularization and focalization, this book presents an analytical framework for graphic novels beyond conventional narratology and finally discusses aspects of subjectivity, a focal paradigm in the latest research. It is intended for advanced students of literature, scholars, and comics experts.
