Wired Tv Laboring Over An Interactive Future:

Wired TV Denise Mann, 2014-02-11 This collection looks at the post network television industry's heady experiments with new forms of interactive storytelling or wired TV that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular participatory Web 2.0 companies like Facebook YouTube and Twitter Contributors address a wide range of issues from the networks sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational corporate conglomeration on entrepreneurial creativity With essays from such top scholars as Henry Jenkins John T Caldwell and Jonathan Gray and from new and exciting voices emerging in this field Wired TV elucidates the myriad new digital threats and the equal number of digital opportunities that have become part and parcel of today's post network era Readers will quickly recognize the familiar television franchises on which the contributors focus including Lost The Office Entourage Battlestar Gallactica The L Word and Heroes in order to reveal their impact on an industry in transition While it is not easy for vast bureaucracies to change course executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities by incorporating social media members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era members of the Madison Avenue advertising community who were eager to rethink ad supported content and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series In the aftermath of the lengthy Writers Guild of America strike of 2007-2008 the networks clamped down on such collaborations and began to reclaim control over their operations locking themselves back into an aging system of interconnected bureaucracies entrenched hierarchies and traditional partners from the past What's next for the future of the television industry Stay tuned or at least online Contributors Vincent Brook Will Brooker John T Caldwell M J Clarke Jonathan Gray Henry Jenkins Derek Johnson Robert V Kozinets Denise Mann Katynka Z Mart nez and Julie Levin Russo **Off the Page** Daniel Bernardi, Julian Hoxter, 2017-09-12 Introduction screenwriting off the page Millennial manic crisis and change in the business of screenwriting Atop the tentpole hollywood screenwriting today Running the room screenwriting in expanded television New markets and microbudgets independent storytellers Screenwriter 2.0 the legitimization of writing for video games Conclusion scripting boundaries The New Gay for Pay Julia Himberg, 2018-01-13 Television conveys powerful messages about sexual identities and popular shows such as Will how those practitioners operate within media conglomerates and perhaps most important how they contribute to commonsense ideas about sexuality **#WWE** Dru Jeffries, 2019-12-01 The millions of fans who watch World Wrestling Entertainment WWE programs each year are well aware of their role in building the narrative of the sport WWE Professional Wrestling in the Digital Age explores the intersections

between media technology and fandom in WWE's contemporary programming and business practices. In the Reality Era of WWE 2011 to the present, wrestling narratives have increasingly drawn on real-life personalities and events that stretch beyond the story world created and maintained by WWE. At the same time, the internet and fandom have a greater influence on the company than ever before. By examining various sites of struggle and negotiation between WWE executives and in-ring performers, between the product and its fans, and between the company and the rest of the wrestling industry, the contributors to this volume highlight the role of various media platforms in shaping and disseminating WWE narratives. Treating the company and its product not merely as sports entertainment but also as a brand, an employer, a company, a content producer, and an object of fandom, WWE conceptualizes the evolution of professional wrestling's most successful company in the digital era.

Transmedia/Genre Matthew Freeman, Anthony N. Smith, 2023-02-05. This book brings genre back to the forefront of the current transmedia trend. Genres are perhaps the most innately transmedial of media constructs formed as they are from all kinds of industrial, technological, and discursive phenomena. Yet few have considered how genre works in a multiplatform context. This book does precisely that, making a uniquely transmedial contribution to the study of genre in the age of media convergence. The book interrogates how industrial, technological, and participatory transformations of digital platforms and emerging technologies reshape the workings of genre. The authors consider franchises such as Star Wars, streaming platforms such as Netflix, catch-up services such as ITV Hub, creative technologies such as virtual reality, and beyond. In setting the stage for the revival of genre theory in contemporary transmedia scholarship, this book pushes forward understandings of multiplatform media and the emerging form and function of genre across contemporary culture.

Online TV Catherine Johnson, 2019-01-04. With growth in access to high-speed broadband and 4G and increased ownership of smartphones, tablets, and internet-connected television sets, the internet has simultaneously begun to compete with and transform television. *Online TV* argues that these changes create the conditions for an emergent internet era that challenges the language and concepts that we have to talk about television as a medium. In a wide-ranging analysis, Catherine Johnson sets out a series of conceptual frameworks designed to provide a clearer language with which to analyse the changes to television in the internet era and to bring into focus the power dynamics of the online TV industry. From providing definitions of online TV and the online TV industry to examining the ways in which technology, rights, interfaces, and algorithms are used to control and constrain access to audiovisual content, *Online TV* is a timely intervention into debates about contemporary internet and television cultures. A must-read for any students, scholars, and practitioners who want to understand and analyse the ways in which television is intertwining with and being transformed by the internet.

[A Transmedia Archaeology of Film Promotion Online](#) Kim Walden, 2025-10-27. At a time when more films are released annually than there are days in the year, films must compete for audience attention. As a result, promotional budgets have risen exponentially, with online becoming the fastest-growing sector. Film websites don't just promote films; they chronicle backstories, map storyworlds,

introduce characters and provide spaces for audiences to congregate Yet as a hybrid of promotion storytelling and community hub these sites are ephemeral and when the promotional work is done they are often locked taken down and disappear without trace This book considers this emerging form Where have film websites been collected and archived What forms do these websites take And how do audiences engage with film websites Drawing on media archaeological methods as well as developing new strategies to investigate these intriguing media objects this book suggests that film websites are worthy of consideration as cultural artefacts in their own right In Beyond the Screen 2014 Sarah Atkinson describes film sites as new filmic objects and an unparalleled cultural form This book makes these new filmic objects its focus and sets out to discover more about them The Producers Guild of America s definition of transmedia practices extends to narrative commercial and marketing roll outs so one way these new filmic objects can be understood is as a kind of transmedia marketing However while there is no shortage of how to manuals on transmedia storytelling and transmedia marketing these practices remain under theorised in the literature So this is what this book sets out to do **Social TV** Cory

Barker,2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment Media Industries On March 15 2011 Donald Trump changed television forever The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real time reactions on Twitter generating more than 25 000 tweets and making the broadcast the most watched Roast in Comedy Central history The trumproast initiative personified the media and tech industries utopian vision for a multi screen and communal live TV experience In Social TV Multi Screen Content and Ephemeral Culture author Cory Barker reveals how the US television industry promised but failed to deliver a social media revolution in the 2010s to combat the imminent threat of on demand streaming video Barker examines the rise and fall of Social TV across press coverage corporate documents and an array of digital ephemera He demonstrates that despite the talk of disruption the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy Case studies from broadcast networks to tech start ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period To trace these unfulfilled promises and flopped ideas Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing Yet in placing this now forgotten material in recent historical context Social TV shows how the era altered how the industry pursues audiences Multi screen campaigns have shifted away from a focus on live TV and toward all day content streams The legacy of Social TV then is the further embedding of media and promotional material onto every screen and into every moment of life

Transmedia Storytelling and the Apocalypse Stephen Joyce,2018-08-21 This book confronts the question of why our culture is so fascinated by the apocalypse It ultimately argues that while many see the post apocalyptic genre as reflective of contemporary fears it has actually co evolved with the transformations in our mediascape to become a perfect vehicle for

transmedia storytelling The post apocalyptic offers audiences a portal to a fantasy world that is at once strange and familiar offers a high degree of internal consistency and completeness and allows for a diversity of stories by different creative teams in the same story world With case studies of franchises such as The Walking Dead and The Terminator Transmedia Storytelling and the Apocalypse offers analyses of how shifts in media industries and reception cultures have promoted a new kind of open world building narrative across film television video games and print For transmedia scholars and fans of the genre this book shows how the end of the world is really just the beginning

Doctor Who: The Unfolding Event — Marketing, Merchandising and Mediatizing a Brand Anniversary Matt Hills, 2015-07-22 The BBC TV series Doctor Who celebrated its 50th anniversary in 2013 this book analyses how promotion commemorative merchandise and 3D cinema screenings worked paratextually to construct a popular media event while sometimes uneasily integrating public service values and consumerist logics
