Creative Ecologies Bronislaw Malinowski, John Howkins, 2018-02-06 The main question of our age is how we live our lives As we struggle with this question we face others How do we handle ideas and knowledge both our own and those of others What relationship to ideas do we want Whose ideas do we want to be surrounded by Where do we want to think Most choose or have the choice made for them according to what family colleagues and friends do and say and what we read about and a more or less rational calculation of the odds Modern ecology results from the shift in thinking generated by quantum physics and systems theory from the old view based on reductionism mechanics and fixed quantities to a new view based on holistic systems where qualities are contingent on the observer and on each other This perception changes how people treat ideas and facts certainties and uncertainties and affects both art and science Worldwide it is part of the process of understanding the current crisis in the environment and the balance of economy creativity and control required in our response The book s starting point is the growing role that information has played in industrial economies since the 1800s and especially in the last thirty years It is an attempt to identify ecology of thinking and learning It is also based on the need to escape from old industrial ways and become more attuned to how people actually borrow develop and share ideas Throughout the book Howkins asks questions and offers signposts He gives no guarantee that creative ecologies will be sustainable but shows what should be aimed for

Art After the Bomb Darrell D. Davisson,2008 This book is requisite reading material for any person claiming to be an educated and informed member of the global community Our understanding in the West of the Eastern cultures specially the different cultures involving the Muslims is alarmingly low The book strives to offer a view from the ground a keyhole perspective that offers the readers a close and personal peek into some of the ethical underpinnings and the philosophical guiding parameters that inform the Muslim and the Eastern mind There are over 1.3 billion Muslims in the world It would be a serious intellectual fallacy to assume that they are all homogenous or to be more preposterous assume they are all terrorists It is extremely tragic that it took the Iranian hostage crisis to teach us about Shia Islam and 9 11 to teach us about

Wahabi Islam Properly acquired knowledge not just what we learn from the media will allow us to be anticipatory and rational rather than being reactive and emotional For the Muslim reader specially the children and the youth the book strives to offer a deeper understanding of Islam beyond the boundaries of ritual Islam into the wide open space of spiritual and intellectual Islam To inspire them to appreciate and live up to the wonderful legacy of Islam and not to be mired down into some deviant interpretations of people with questionable motives The book is designed to encourage the process of tearing down walls and building bridges We share common dreams aspirations and challenges We share a common globe and a common destiny The author believes that there are no clashes of civilizations just clashes of ignorance and misunderstanding
