Precup,Raul-Cristian Roman,Elena-Lorena Hedrea,Alexandra-Iulia Szedlak-Stinean,Iuliu Alexandru Zamfirache,2025-03-25
The book presents a detailed and unified treatment of the theory and applications of optimization applied to control and
modeling focusing on nature inspired optimization algorithms to optimally tune the parameters of linear and nonlinear
controllers and models with emphasis on tower crane systems and other representative applications Classical and Modern
Optimization Techniques Applied to Control and Modeling combines classical and modern approaches to optimization based
on the authors experience in the field and presents in a unified structure the essential aspects of optimization in control and
modeling from a control engineer s point of view It covers linear and nonlinear controllers and neural networks based on
reinforcement learning are considered and analyzed because of the need to reduce the complexity of the controllers and their
design so that they can be practical to implement as low cost automation solutions The chapters are designed to quickly
make the concepts of optimization control reinforcement learning and neural networks understandable to readers with
limited experience This book is intended for a broad audience including undergraduate and graduate students engineers
designers practitioners and researchers and anyone facing challenging control problems **Training and Reference
