Town Mouse House Mouse Histories:

Rodent Societies Jerry O. Wolff, Paul W. Sherman, 2008-09-15 *Rodent Societies* synthesizes and integrates the current state of knowledge about the social behavior of rodents providing ecological and evolutionary contexts for understanding their societies and highlighting emerging conservation and management strategies to preserve them. It begins with a summary of the evolution, phylogeny and biogeography of social and nonsocial rodents providing a historical basis for comparative analyses. Subsequent sections focus on group living rodents and characterize their reproductive behaviors, life histories and population ecology, genetics, neuroendocrine mechanisms, behavioral development, cognitive processes, communication mechanisms, cooperative and uncooperative behaviors, antipredator strategies, comparative socioecology, diseases and conservation. Using the highly diverse and well studied Rodentia as model systems to integrate a variety of research approaches and evolutionary theory into a unifying framework, *Rodent Societies* will appeal to a wide range of disciplines both as a compendium of current research and as a stimulus for future collaborative and interdisciplinary investigations.

History of the Graeco-Latin Fable Francisco Rodríguez Adrados, 1999 This translation of the original Spanish standard work on the fable traces the history of the Graeco-Latin fable, investigates its origins, reconstructs lost collections from the Hellenistic Age and establishes relationships between the Imperial Age and Greek and Latin fables.

The UFAW Handbook on the Care and Management of Laboratory and Other Research Animals Huw Golledge, Claire Richardson, 2024-05-07 The latest edition of the seminal reference on the care and management of laboratory and research animals. The newly revised ninth edition of *The UFAW Handbook on the Care and Management of Laboratory and Other Research Animals* delivers an up to date and authoritative exploration on worldwide developments, current thinking and best practices in the field of laboratory animal welfare science and technology. The gold standard in laboratory and captive animal care and management references, this latest edition continues the series tradition of excellence by including brand new chapters on ethical review, the care of aged animals and fresh guidance on the care of mice, rats, corvids, zebrafish and decapods. The book offers introductory chapters covering a variety of areas of laboratory animal use as well as chapters on the management and care of over 30 different taxa of animals commonly utilised in scientific procedures and research around the world. It also provides a thorough introduction to the design of animal experiments, laboratory animal genetics and the phenotyping of genetically modified mice. Comprehensive explorations of animal welfare assessment and the ethical review process. Practical discussions of legislation and oversight of the conduct of research using animals from a global perspective. In depth examinations of the planning, design and construction of efficient animal facilities, special housing arrangements and nutrition, feeding and animal welfare. *The UFAW Handbook on the Care and Management of Laboratory and Other Research Animals* Ninth Edition is essential for laboratory animal scientists, veterinarians, animal care staff, animal care regulatory authorities, legislators and professionals working in animal welfare, non governmental organizations.
