This book represents a significant contribution to the discussion on the part played by communication especially in its mediated forms in people s lives dwelling on the nature of the relationship between the notion of power and the media in current Western societies The media have dramatically increased their capacity to exercise their symbolic force over other fields of cultural production by partly structuring those intrinsic rules values and practices that organize for example the political system or the academic world from the inside On the other hand the media are intertwined environments subjected to the influence of other cultural economic and political forces which in turn reveal themselves to be capable of framing reality through the media themselves Particularly focusing on the topic of the economic crisis the various chapters of this edited volume highlight how the relationship between the media and other forces capable of pervasively exercising their power appears to be paradoxically as strict as it is opaque Social media and smart mobile technologies have increasingly affected the modalities whereby other institutions and organizations reflect on themselves and develop their worldviews At the same time however politics and economics experts and strategists have all learned how to exploit this potential for their own purposes Detecting the opacity that characterizes this form of exploitation is the first step in the acknowledgment of this phenomenon
